# Welcome From

## Western Oregon UNIVERSITY

Dear 2014 WPA Conference Attendees:

Western Oregon University is proud to be the host institution for the 94th Annual Western Psychology Association Convention in Portland, Oregon. I would like to thank the WPA Executive Board for selecting Portland for this year's event. In addition, I wish to acknowledge the efforts of Executive Board Members and Convention Program Co-Chairs, Western Oregon University's professors of psychology, Dr. Ethan McMahan and Dr. Eric Cooley for their efforts.

Located approximately one hour south of Portland, Western Oregon University (WOU) is situated in Monmouth, Oregon just outside of the state's capitol, Salem. Founded in 1856, WOU is the oldest in the seven university state system of universities. Our student body, comprised of

approximately 6,000 undergraduate students and 400 graduates, enjoys a vibrant and close-knit intellectual community comparable to the environment in a small liberal arts college.

From its origins as a normal school, WOU grew to become a nationally recognized leader in teacher preparation. In the seventies, WOU expanded its offerings with broad-based liberal education programs. Since then, the university has continued to emerge as a leading comprehensive public liberal arts institution, with approximately two-thirds of its students in the College of Liberal Arts and Sciences and the rest in the College of Education.

Among its distinctions, WOU achieved a LEED Platinum certification for Ackerman Hall, the first large-scale live/learn residence hall in the nation, and ranked among the 10 greenest in the world by Mother Nature Network. Recognizing WOU's strong commitment, engagement, and success in creating a university teaching and learning environment that embraces and celebrates the many benefits of a 21st century diverse university, Western received the first annual Higher Education Excellence in Diversity (HEED) award from INSIGHT Into Diversity magazine, the oldest and largest diversity-focused publication in higher education. Proudly, WOU was named the 2010 recipient of the Christa McAuliffe Award for Excellence in Teacher Education by the American Association of State Colleges and Universities (AASCU), in recognition of exemplary performance in teacher education. We are proud of our faculty and staff who have been named for National Academic Advising Association (NACADA) awards for five years in a row.

Best wishes for an outstanding annual meeting.

Sincerely,

A handwritten signature in black ink that reads "Mark Weiss". The signature is written in a cursive style with a large, stylized 'M' and 'W'.

WPA Distinguished Speaker

# Phil Zimbardo

Ph.D., Psychologist and  
Professor Emeritus at Stanford University

Thursday, 7:30 - 9 PM, Salon E

EXPLORING HUMAN NATURE

Dr. Zimbardo is one of the most distinguished living psychologists, having served as President of the APA, designed and narrated the award winning 26-part PBS series, *Discovering Psychology*, and has published more than 50 books and 400 professional and popular articles and chapters.

# Program Book Activity Descriptions

The WPA convention program book lists and briefly describes every activity at the convention. The convention activities and presentations include Invited Speaker Addresses, Symposia, Poster Sessions, Paper Sessions, Presidential Address, Receptions, Film Festival, and Exhibits.

**WPA Speakers:** Each year distinguished psychologists are invited to give presentations at WPA. This gives everyone an opportunity to hear the latest research findings and theoretical ideas from leading researchers. All convention attendees are welcome at the talks by the speakers. Also, conversation hours with students will be scheduled for some of the speakers.

**Poster Session:** In a poster session, 30 or more presenters display the highlights of their research studies as posters mounted on bulletin boards. Presenters stand by their posters as attendees stroll along the rows, reading the posters and discussing them with the presenters. These sessions give you the chance to meet active research psychologists and ask questions and discuss findings. Each presenter welcomes your interest and questions no matter who you are. This is also a good opportunity to find out about graduate and undergraduate programs at other colleges and universities from the presenting professors and their students. Don't be shy!

**Symposium and Panel Sessions:** Two or more authorities in an area of make brief presentation. After the presentations, there is usually time for commentary and discussion.

**Paper Session:** Each presenter in a paper session delivers a brief talk. Four or five papers are scheduled per session. After each paper is presented, or at the end of a session, the audience is given an opportunity to ask questions.

**Film Festival:** The Film Festival showcases new films that span all areas of psychology. The films are organized by content so that related films show consecutively.

**Exhibitors:** During the convention, publishers, universities, psychology organizations such as Psi Chi and the American Psychological Association, and companies that have psychology-related merchandise and research tools

are located in the same large ballroom where poster presentations occur. Here you can browse through the latest books, see demonstrations of lab equipment, talk with universities about their graduate programs. Be sure to stop in the booths that interest you and chat with the representatives. They appreciate your interest.

**Receptions:** Everyone is invited to receptions on Thursday and Friday.

# PROGRAM PLANNING AND ORGANIZATION

## **The Program Committee**

The primary function of the Program Chairperson is to plan and organize the invited portions of the program. This is a complex and demanding process that starts almost two years before a given convention and one that assures an attractive and diversified program. This year, Ethan McMahan and Eric Cooley accepted the challenge of serving as the Program Co-Chairs for the convention. Together with WPA President Victoria Follette, they arranged a splendid program that will provide each of us with an excellent and memorable convention. We thank them for their outstanding contributions to our association.

## **Teaching and Student Events**

In coordinating the planning and the organization of the Teaching and Student Events that enrich our program each year, we have had the opportunity and the pleasure of working with a number of dedicated people who are responsible for the excellence of this dimension of our program.

Special thanks go to the following people whose creativity, resourcefulness, and dedication to the teaching/learning process led to the development of outstanding program events of special interest to psychology teachers and students.

*Heidi Riggio*

Terman Teaching Conference

*Heidi Riggio*

Society for the Teaching of Psychology (STP)

*Jon Grahe*

The Teaching and Student Events at our annual convention receive needed financial support from several groups. Their generosity contributes substantially to the sustained high quality of these events. We thank the following groups for their help in enhancing the excellence of our convention with their financial support.

### **Lewis M. Terman Teaching Conference**

The Lewis M. Terman Western Regional Teaching Conference is designed to offer psychology teachers useful and interesting information and an opportunity to share innovations with their peers. We would like to thank Heidi Riggio, California State University, Los Angeles for undertaking the organization and execution of this exceptional program. She has gathered together a wonderful array of speakers in a program that will appeal to teaching faculty at all levels. This conference requires a separate registration.

# WPA COUNCIL OF REPRESENTATIVES

Eighty-nine western universities and college campuses have designated a member (or members) of their faculty to serve as a member of the WPA Council of Representatives. Members of this group, in addition to their advisory role, act as liaison on their campus for WPA. In forming this group, which is chaired by John Moritsugar, the current Representative-at-Large, our aim was to strengthen communication and, in so doing, enhance the ability of WPA to meet its goals. If you do not see your university or college among those listed below and you wish to become involved, please contact the WPA office.

## WPA STUDENT AWARDS

Based on a masked review of their abstracts, the Program Review Committee has selected the following students who were listed as first authors of their abstracts for the Western Psychological Foundation Scholarship Awards. Each of these outstanding students will receive their awards at the WPA Awards Presentation on Friday, at the Convention. Each student scholar will receive a cash award. The awards are made possible by the gifts of a substantial group of concerned WPA members who share the conviction that the development of excellence in research and scholarship among our student members is an important goal of our association.

## CONVENTION INFORMATION

### REGISTRATION

The Convention is open to anyone who has paid the appropriate registration fee. The on-site registration fees are as follows:

#### **Full Convention(USD)**

Current Professional Member	\$90
Professional Non-Member	\$165
Current Student Member	\$50
Student Non-Member	\$90
Non-professional guest/partner/spouse of registrant	\$50

#### **One Day Only**

Non Students	\$65
Students	\$40
One-Half Day, Sunday	\$20

### MEMBERSHIP IN WPA

The Western Psychological Association was founded in 1921 for the purpose of stimulating the exchange of scientific and professional information and ideas that are of interest to psychologists and, in so doing, to enhance interest in the processes of research and scholarship in the behavioral sciences. Membership in the Western Psychological Association is available

to both students and professionals who wish to support these goals and who would like to become part of the network that we have created to further them. Attendance at our annual meeting has more than doubled over the last ten years, which is tangible evidence that our reputation as being the most innovative and exciting of the major regional associations is valid.

Aside from the obvious advantages of the educational, professional and social interactions that membership in our association invites, WPA members enjoy, reduced registration fees for our convention and seminars, reduced travel costs and the knowledge that you are making a meaningful contribution to the enhancement of scholarship and the exchange of ideas.

If you are interested in becoming part of our group, the appropriate forms and information are at [westernpsych.org](http://westernpsych.org).

## CONVERSATION HOURS

The WPA student representatives have scheduled conversation hours following some of the presentations. Please join your colleagues for stimulating discussions with our speakers. Thanks to Amanda Chiapa for organizing the conversation hours.

## CONVENTION POLICIES

### **Identification Badges**

Identification badges will be available for those who have pre-registered at the registration booth upon arrival at the convention. Persons who choose to wait to register at the convention will receive a badge after they have paid their registration fee. We request that you wear your badge at all times because only persons who have registered for the convention will be admitted to any of the scheduled programs or activities.

### **Additional Programs**

Additional copies of the program may be purchased for \$10.00 until our limited supply of extra copies is exhausted.

### **Smoking Policy**

Smoking is not permitted in the hotel

### **Messages**

A message board will be maintained near Convention Registration. Messages left on the WPA phone will be picked up (928-277-4660).

## **Exhibitors**

Exhibits are located in the Exhibit Hall and will be open on Thursday, Friday, and Saturday. Our exhibitors provide substantial support for the convention, and the best way to say thank you is visit with them.

## **Advertisers**

Each advertisement is listed in the Table of Contents of this program.

# 2014 WPA FILM FESTIVAL

## ALPHABETICAL DESCRIPTION OF FILMS

The following alphabetical listing gives a brief description and presentation time of each offering included in this year's Film Festival. All films will be shown in the Salon D Room. All information provided in the listing is for DVDs and does not include shipping charges, if any. All presentations will be shown in groups according to content area as indicated in the film schedule for each day (given at the beginning of each day's activities within the daily program). Notably, a special Encore! Presentation of last year's Film Festival winner will take place Friday evening. Last year's winning films are so noted in the alphabetical listing below. A more complete description of each film will be available for your inspection in the screening room, and free brochures also will be available for most of the films. The names and addresses of participating film distributors are provided immediately following the present listing.

**BEST KEPT SECRET: AGING OUT WITH AUTISM (85 mins)**  
Thursday 10:15 a.m.

Best Kept Secret follows Ms. Mino and her students over the year and a half before graduation. The clock is ticking to find them a place in the adult world—a job or rare placement in a recreational center—so they do not end up where their predecessors have, sitting at home, institutionalized, or on the streets.

Alexander Street Press, (2013, DVD). Rental Price N/A; Purchase Price \$295

**BIOPHILIC DESIGN:  
THE ARCHITECTURE OF LIFE (62 mins)**

Thursday 8:15 a.m.

Biophilic Design is an innovative way of designing the places where we live, work, and learn. We need nature in a deep and fundamental fashion, but we have often designed our cities and suburbs in ways that both degrade the environment and alienate us from nature. Come on a journey through our evolutionary past and the origins of architecture to the world's most celebrated buildings in a search for the architecture of life. Together, we will encounter buildings that connect people and nature. Featured are communities and buildings from Scandinavia, Germany, France and Britain to the Canadian and American northwest, American southwest, and New England.

Bullfrog Films, (2011, DVD, Blu-Ray). Rental Price \$85; Purchase Price \$250

BITTERSWEET JOKE (52 mins)

Saturday 11:00 a.m.

There remains a strong social taboo against single parenthood in South Korea, where single mothers are still referred to as “unwed.” Bittersweet Joke is the first Korean film in which single mothers appear with their faces unobscured, and speak frankly about problems they face in a society that treats them as a problem.

Icarus Films, (2011, DVD). Rental Price N/A; Purchase Price \$390

BOB AND THE MONSTER (85 mins)

Saturday 12:30 p.m.

Bob and the Monster follows outspoken indie-rock hero Bob Forrest through his life-threatening struggle with addiction to his transformation into one of the most influential and controversial drug counselors in the US today (appearing alongside Dr. Drew Pinsky on shows such as “Celebrity Rehab” and “Sober House.”)

The Cinema Guild, (2013, DVD). Rental Price \$350; Purchase Price \$125

CHANGING YOUR MIND (44 mins)

Friday 7:00 p.m.

\*\*\*WINNER OF THE 2013 WPA FILM FESTIVAL \*\*\*

Illustrates new research into neuroplasticity and how the changing brain plays an important role in treating mental disorders and diseases.

Icarus Films, (2010, DVD). Rental Price \$60; Purchase Price \$248

CHOOSING CHILDREN (46 mins)

Friday 9:45 a.m.

Hailed as a pioneering achievement when it was first released in 1984, Choosing Children dramatically challenged the assumption that being lesbian means you can't be a mom. Six lesbian-headed families make decisions about how to become pregnant, navigate the process of adoption, whether to involve men in parenting, and address reactions from relatives, doctors and schoolmates. In so doing, they help redefine what “family” means and open the door for everyone to consider parenting, regardless of sexual orientation. This 30-year-old classic has just been re-released on DVD along with “The Back Story” (20 mins), an interview with the filmmakers about the making of the film and its impact on them personally and on the larger culture.

GroundSpark, (1985, DVD). Rental Price \$30; Purchase Price \$49-\$129 depending on the type of organization purchasing the film.

### GAMBLING BOYS (46 mins)

Saturday 2:00 p.m.

Who would think that teenagers playing a friendly game of poker, or joining an online game of Texas hold'em, could find themselves facing serious gambling problems and, for some, addiction? But young adults are vulnerable. With the barrage of marketing campaigns, television coverage of poker tournaments, and easy online access, it is no surprise that teens are increasingly affected.

### HEALING THE HURT: A TRAUMA INFORMED APPROACH (working title) (40 mins)

Friday 12:45 p.m.

Too many of our children, especially children of color, are exposed to poverty, violence, neglect and other forms of trauma and show symptoms similar to combat vets with PTSD. Except there is no 'post.' Traveling to Philadelphia and Oakland, what happens when we ask not "What's wrong with you?" but "What happened to you?" and how can we help individuals and traumatized neighborhoods heal?

### HOMEGOINGS (56 mins)

Friday 11:45 a.m.

Through the eyes of funeral director Isaiah Owens, the beauty and grace of African American funerals are brought to life. Filmed at the Owens Funeral Home in Harlem and the rural South, director Christine Turner's acclaimed Homegoings takes an up-close look at the rarely seen world of undertaking in the black community, where funeral rites draw on a rich palette of tradition, history and celebration. Homegoings will resonate with those familiar with the traditions as well as move and inform the uninitiated who want to understand how specific cultures deal with death and mourning.

### IN THE SHADOW OF THE SUN (85 mins)

Saturday 2:45 p.m.

A story about human rights, deep-rooted superstition, and incredible strength, In The Shadow of the Sun explores the troubling increase of violence and brutal murders in Tanzania targeting people with albinism.

Filmed over six years, In The Shadow Of The Sun tells the incredible story

of two albino men as they attempt to follow their dreams in the face of prejudice and fear: Vedastus, a quietly determined 15-year-old, who still hopes of completing his education, and Josephat Torner, a young man who has dedicated his life to campaigning against the discrimination of his people. In these two impassioned individuals, we recognize our most basic human needs: to belong to a community of others, to forge our own sense of personal identity, and the unimaginable lengths to which we must go to preserve our dignity.

MAN FOR A DAY (59 mins)

Thursday 2:00 p.m.

Performance artist and gender activist Diane Torr has appeared on stages around the world as a drag king, performing male characters and raising issues of gender and performativity. Now she holds workshops for other women in which they develop their own male characters and live as men for a day in an attempt to better understand the dynamics of gender in contemporary society. Man for a Day brings us inside Torr's workshop in Berlin. The artist guides a group of open-minded women from diverse backgrounds—an Angolan single mother, an Israeli lesbian, a young German beauty queen, among others—through the theoretical underpinnings of her work, and helps them develop male characters of their own.

#### PSYCHOLOGY AND THE NEW HEROISM (87 mins)

Friday 3:00 p.m.

Philip Zimbardo is professor emeritus of psychology at Stanford University and creator of the renowned Stanford Prison Experiment. Daniel Ellsberg served in the Pentagon under Secretary of Defense Robert McNamara and is best known as the whistleblower who released documents known as the Pentagon Papers. These two icons of progressive thought in America met for the first time to discuss a salient question for our times: Why are some people willing to take courageous nonviolent action in defense of ethical principles, even at personal risk to themselves?

#### REFUGE: CARING FOR SURVIVORS OF TORTURE (57 mins)

Friday 2:00 p.m.

More than a million refugees, asylum seekers, and other immigrants to the United States have been victims of politically motivated torture. Some survivors bear visible scars, but many more have been wounded in ways that remain hidden. Based on interviews with dozens of survivors, and with the healthcare and mental health professionals and volunteers who are helping them to heal, Refuge is a tribute to their courage and dedication, and a call to action.

#### SCHOOL'S OUT - LESSONS FROM A FOREST KINDERGARTEN (36 mins)

Thursday 9:30 a.m.

No classroom for these kindergarteners. In Switzerland's Langnau am Albis, a suburb of Zurich, children 4 to 7 years of age go to kindergarten in the woods every day, no matter what the weatherman says. This eye-opening film follows the forest kindergarten through the seasons of one school year and looks into the important question of what it is that children need at that age. There is laughter, beauty and amazement in the process of finding out.

### TOWARD DAYLIGHT (18 mins)

Saturday 12:00 p.m.

Suicide crosses all human boundaries and alters the lives of everyone involved. While the help of a friend may be a phone call away, people in deep isolation have difficulty reaching out, often because they feel guilty and ashamed of their situation. Toward Daylight kindles the hope necessary for the living to face, and move on from, the pain and loss of suicide.

XMAS WITHOUT CHINA (63 mins)

Thursday 3:00 p.m.

Pride and mischief inspire Chinese immigrant Tom Xia to challenge the Americans in his Southern California suburb to celebrate Christmas without any Chinese products. Exploring the intersection of consumerism and immigration in American culture, Xmas Without China is an intimate portrait of families wrestling with our drive to consume cheap products, but also with our desire for human connection and a sense of who we are in a fast-changing world.

Bullfrog Films, (2013, DVD). Rental Price \$85; Purchase Price \$275

YOUR DAY IS MY NIGHT (64 mins)

Thursday 4:15 p.m.

Blending autobiographical monologues, intimate conversations, and staged performances, Lynne Sachs' Your Day Is My Night documents the lives of Chinese immigrants sharing a "shift-bed" apartment in the heart of New York City's Chinatown, offering a deeply felt portrait of the Asian-American immigrant experience. Seven characters ranging in age from 58 to 78 play themselves and recount real experiences from their lives. As the bed transforms into a stage, the film reveals a collective history of Chinese immigrants in the United States. Through it all, Your Day is My Night addresses issues around privacy, intimacy, otherness, belonging and the urban experience via the basic human need of a place to sleep.

PRESENTERS AND PRESENTATIONS

INTEGRATING MEDIA INTO INTRODUCTORY  
PSYCHOLOGY

**Deborah Licht & Misty Hull**, Pikes Peak Community College  
Deborah Licht is a Professor of Psychology and co-chair of the Department  
of Psychology at Pikes Peak Community College in Colorado Springs,  
Colorado. She has had over two decades of teaching and research  
experience in a variety of settings, ranging from a small private university  
in the midwest to a large public university in Copenhagen, Denmark. She  
has taught introductory psychology, psychology of the workplace, abnormal  
psychology, the history of psychology, child development, and elementary  
statistics in a variety of formats (traditional, online, and hybrid courses).

- Wednesday

Deborah received her Bachelor of Science in Psychology from Wright State University, a Master's Degree in Clinical Psychology from the University of Dayton, and a PhD in Psychology (Experimental Psychopathology) from Harvard University in 2001. Her dissertation examined expressed emotion and the causal beliefs of relatives of patients with schizophrenia, depression, and bipolar disorder. While at Harvard, Deborah pursued a secondary line of research in the History of Science Department, focusing on the history of psychiatry and neurology, which provided her with a vastly different perspective on the field of psychology. She is greatly inspired by first-generation college students who turn to community colleges to pursue their education, and continues to be interested in research on causal beliefs and their influence on behavior, particularly in relation to how college students think about their successes and failures as they pursue their degrees. Deborah was honored by her inclusion in the Colorado Community College System's Portfolio of Faculty of Excellence in 2010. She is a co-author with Misty Hull and Coco Ballantyne on the first edition of *Scientific American: Psychology* (2014).

Misty Hull is a Professor of Psychology and co-chair of the Department of Psychology at Pikes Peak Community College in Colorado Springs, Colorado. She has taught a range of psychology courses at Pikes Peak Community College, including introductory psychology, human sexuality, and social psychology in a variety of delivery formats (traditional, online, and hybrid). Her love of teaching comes through in her dedication to mentoring new and part-time faculty in the teaching of psychology. She received her Bachelor of Science from Texas Tech University in Lubbock, TX, and her Master's in Professional Counseling at Colorado Christian University in Lakewood, CO. She has served in a variety of administrative roles at Pikes Peak Community College, including interim Associate Dean, and the Coordinator of the Student Crisis Counseling Office. In addition, she has helped to develop the state system's approach to teaching psychology, as the state psychology discipline chair of the Colorado Community College System from 2002-2010. One of her many professional interests includes investigation on the impact of student persistence in higher education. Misty is co-author with Deborah Licht and Coco Ballantyne on the first edition of *Scientific American: Psychology* (2014).

#### A THEME-BASED APPROACH TO TEACHING

**Vivian McCann**, Portland Community College

Vivian McCann is a senior faculty member in Psychology at Portland

Community College in Portland, Oregon, where she teaches numerous sections of introductory psychology, as well as courses in human relations, intimate relationships, and social psychology. Born and raised in the Southern California desert just 10 miles from the Mexican border, she learned early on the importance of understanding cultural backgrounds and values in effective communication and in teaching. She loves to travel and learn about people and cultures, and has visited 20 countries so far. Prior to beginning her tenure at Portland Community College in 1995, she worked in faculty development, counseling, and student services at several southern California colleges and universities. She is the author of a popular Introductory Psychology textbook with Philip Zimbardo and Robert Johnson called “Psychology: Core Concepts,” currently in its seventh edition; and of “Human Relations: The Art and Science of Building Effective Relationships.” Vivian is a regular speaker and contributor to WPA.

## EVIDENCE-BASED TEACHING AND LEARNING: FROM THEORY TO PRACTICE

**Sarah Grison**, Parkland College

Sarah Grison is an Associate Professor of Psychology at Parkland College. Sarah's received her Ph.D. in cognitive neuroscience from the University of Wales, Bangor in 2002. Sarah's research initially focused on investigating attention and memory processes. She now applies her background in cognitive psychology to her teaching practice by investigating how psychological research can improve both teachers' skills and student learning. She regularly teaches Introductory Psychology, Child Development, and Adolescent Development, among other courses, to undergraduate students in in face-to-face, hybrid, and online formats. Sarah also teaches graduate-level courses and professional development seminars for teachers. These are designed to support teachers in taking an evidence-based approach to teaching and learning by using empirically-supported pedagogies and embedded assessment to allow for continuous educational improvements. Sarah also works to “walk the walk” of evidence-based teaching and learning in her own courses by making her classrooms living laboratories where she explores the effectiveness of various pedagogical approaches to improve students' educational experiences. In addition to her teaching and research duties, Sarah has been involved in course assessment for institutional accreditation visits at the University of Illinois, and now provides service to Parkland College by assisting in development of course and program assessment for psychology. Sarah is a certified Teacher-Scholar who has been recognized on the University of

- Wednesday

Illinois List of Excellent Teachers. She has won the University of Illinois Provost's Initiative for Teaching Advancement Award and the Association for Psychological Science Award for Teaching and Public Understanding of Psychological Science. She is a member of the Association for Psychological Science; the American Educational Research Association; the International Mind, Brain, and Education Society; and the American Psychological Association (Division 2, Society for Teaching of Psychology).

#### ACCESSIBILITY OF MASTER'S PROGRAMS IN THE CSU: CHALLENGES FOR THE FUTURE

**Kimberly King, Brigitte K. Matthies, & Heidi R. Riggio**, California State University, Los Angeles

Kimberly R. King is an Associate Professor in the Department of Psychology and an associated faculty member in the Department of Pan-African Studies at California State University, Los Angeles, where she teaches courses in Community Psychology, Psychology of Gender, Prejudice and Discrimination, Research Methods, Multicultural Psychology Research Methods, and Psychology & African Americans. She has taught for over 10 years in the Educational Opportunity Program's Summer Bridge, an intensive 6-week program for first-generation college students, most of whom need remediation. Her research focuses on the psychological effects of poverty, race, gender, and class discrimination, evaluation of diversity courses, and academic success among low-income students. Dr. King is also producer and co-host of Beautiful Struggle, a weekly public affairs radio program on Pacifica's KPFK (90.7 FM Los Angeles). Dr. King was born and raised in Oakland, CA, and obtained her B.A. in Psychology from Yale College and her Ph.D. in Psychology at UCLA.

Dr. Brigitte Matthies is a Jamaican-born Clinical Psychologist who obtained her PhD from McGill University in Canada in 1994. She is passionate about student learning and has a long history in developing curriculum for psychology programs and in training students for clinical work. She headed the Psychology Unit at the University of the West Indies, Mona from 1998-2002 during which time they implemented a Masters and PhD Degree in Clinical Psychology and a Masters degree in Applied Psychology. She kept her clinical skills active by working as a Consultant Psychologist for the Section of Psychiatry, University Hospital of the West Indies which served as a training ground for students.

Brigitte Matthies is currently an Associate Professor of Psychology at California State University, Los Angeles, where she headed the now

discontinued Marriage and Family Therapy program and Psychology Clinic. Dr. Matthies was also the Supervisor of Clinical Training at Tarzana Treatment Centers from 2009-2010 and guided them in their application for APA accreditation. Recently she acted as a consultant to the University of Technology in Jamaica and helped develop curricula for their new PsyD program in Clinical Psychology. Dr. Matthies co-edited the text “Perspectives in Caribbean Psychology” and has authored a behavior management workbook and multiple journal articles. Her research interests are varied and include ethnic group preferences for psychotherapy models, eating disorders in culinary students, racial diversity in relationships, the measurement of depression and personality disorders, cross cultural manifestations of phobias, physical fitness in youth, and verbal abuse in intimate couples.

Heidi R. Riggio is an Associate Professor of Psychology at California State University, Los Angeles. Heidi earned her Ph.D. in Social Psychology from Claremont Graduate University in 2001, after earning her M.A. in Psychology from CSU Fullerton. Heidi began teaching at CSU Fullerton in 1996, and has taught at several schools in southern California, including Pomona College, Claremont McKenna College, Pitzer College, and Claremont Graduate University, teaching a variety of courses at the undergraduate and graduate level. Heidi has numerous empirical publications examining attitudes in personal relationships, political attitudes and persuasion, parental and sibling relationships in young adulthood, critical thinking, and self-efficacy. In addition, she has published multiple teaching materials, including a top-selling student workbook to accompany Diane Halpern’s very popular critical thinking textbook. From CSU Los Angeles, Heidi has received an Outstanding Teaching Award from the Student Athletic Advisory Board, and the Distinguished Woman Award. Heidi is a regular Reviewer for multiple empirical journals including Journal of Family Psychology, Journal of Social and Personal Relationships, Personal Relationships, and Journal of Marriage and Family. She is a Fellow of the Western Psychological Association.

LEARNING ABOUT INDIVIDUAL DIFFERENCES:  
INFORMATION ACROSS GENERATIONS

- Thursday

Presenter: Jessica Henderson Daniel, Boston Children's Hospital

Chair: John Moritsugu, Pacific Lutheran University

### Synopsis

Perceptions of others are often based on messages from our immediate and extended family members. Consequently, learning about human differences may entail becoming aware of possible messages received across generations, Change processes may include learning for the first time, un-learning and re-learning. This is a personal process presentation.

### Biography

Jessica Henderson Daniel, PhD, ABPP is Director of Training in Psychology at Boston Children's Hospital. She is also an Associate Professor of Psychology in the Department of Psychiatry at Harvard Medical School. Her career has focused on instruction, training and mentoring. She has served on the APA Board of Directors and as President of the Division 35, The Society for the Psychology of Women. In Massachusetts, she has chaired the Board of Registration of Psychologists.

### ACT IN THE LAB AND THE CLINIC: STUDENT RESEARCH AND CLINICAL OUTCOMES

Chair: Aaron L Bergman, Pacific University

#### Synopsis

Acceptance and Commitment Therapy (ACT) is a clinical intervention that aims to increase clients' psychological flexibility by facilitating mindfulness, acceptance, and values-informed behavioral activation (Hayes, Strosahl, & Wilson, 2012). ACT seeks to help clients take action to create a more meaningful life, while accepting the distress or pain inherent to our human experience. A review of randomized controlled trials (RCT's) has shown ACT to be an effective transdiagnostic treatment (Ruiz, 2010) that seems to work through different theoretical process than traditional

- Thursday

cognitive therapy, though conclusive superior or inferior outcomes have not been robustly established (Zettle, Rains, & Hayes, 2011). ACT is an effective intervention in community mental health settings (Forman, Herbert, Moitra, Yeomans, & Geller, 2007) and student therapists have demonstrated effective outcomes in using this treatment with a variety of presenting problems (Lappalainen, Lehtonen, Skarp, Taubert, Ojanen, & Hayes, 2007). The current symposium will present clinical and research ACT outcomes among clinical psychology graduate students. Three presentations will explore (1) outcomes of an ACT for anxiety group in a university-based psychological services center, (2) the effectiveness of acceptance versus suppression in a social anxiety lab study, and (3) a series of single case design ACT outcome studies across various treatment settings. A Portland-area professional will facilitate group discussion and share current research and practice perspectives for students interested in pursuing future research and training in ACT.

COPING WITH CHRONIC MEDICAL CONDITIONS: CREATING AN INTEGRATED NARRATIVE OF ILLNESS AND RECOVERY OF FUNCTION

Chair: Melanie P. Duckworth, University of Nevada, Reno

### Synopsis

Patients with chronic and/or multiple medical conditions experience physical and functional compromise, work difficulties; strained social interactions; reduced engagement in recreational activities/hobbies;

- Thursday

family, marital, and sexual difficulties; and emotional distress. The coping styles and strategies that have been employed by these patients are often insufficient to manage the unfamiliar and complex demands of their medical circumstance. Psychological treatments that are used in the context of managing medical conditions work to decrease emotional distress, increase understanding and acceptance of their medical circumstance, and increase adherence to medical treatment recommendations. In persuading medical patients of the usefulness of cognitive-behavioral change strategies, emphasis is placed on the multiple condition-related losses in function that have occurred, the increase in emotional distress experienced consequent to those losses, and the improvements in quality of life that can occur as a function of regaining purpose and achieving valued rehabilitation goals. The symposium has been designed to meet the following objectives: 1) describe effective strategies for comprehensively assessing patients presenting with chronic medical conditions and co-morbid medical and psychological conditions; 2) discuss rehabilitative goal setting in the context of chronic and multiple medical conditions; and 3) to discuss the functional utility of integrating the patient's medical narrative into the larger life narrative.

#### Presenters

REFINING THE MEDICAL NARRATIVE AND DEFINING THE REHABILITATION NARRATIVE: THE USE OF THERAPEUTIC WRITING AND READING AND ACTIVE THINKING TO IMPROVE MEDICAL OUTCOMES, Melanie P. Duckworth (University of Nevada, Reno)

LIMITING THE FALLOUT FROM CHRONIC MEDICAL CONDITIONS: THE USE OF ACTIVE ACCEPTANCE AND SELF-ADVOCACY IN MANAGING HEALTHCARE SYSTEMS, Tony Iezzi (London Health Sciences Centre)

FORMULATING A COPING NARRATIVE: THE USE OF BEHAVIORAL COPING TO CREATE A LIFE NARRATIVE THAT EMPHASIZES RECOVERY OF FUNCTION, Erika Shearer (University of Nevada, Reno and VA Puget Sound Health Care System American Lake Division)

### UNPACKING THE MYSTERY: HOW TO IMPROVE WORKER HEALTH AND WELL-BEING THROUGH OCCUPATIONAL HEALTH PSYCHOLOGY APPROACHES

Presenter: Leslie B. Hammer, Portland State University

Chair: Debi Brannen, Western Oregon University

#### Synopsis

Research has established the benefits of a safe and healthy workplace for both employees and employers. Occupational health psychology offers a unique and important lens from which to understand and develop preventative strategies to enhance employees' safety, mental health, physical health and work-family balance. This presentation will discuss health and safety interventions from an occupational health psychology perspective and common obstacles to implementing.

#### Biography

Dr. Leslie B. Hammer is the Director of the Center for Work-Family Stress, Safety, and Health, funded by grants from the National Institute for Child Health and Human Development and the National Institute for Occupational Safety and Health, and Director of the Occupational Health Psychology graduate training program at Portland State University that is funded through a training program grant from the National Institute for Occupational Safety and Health (NIOSH). She is the Associate Director of the NIOSH-funded Oregon Healthy Workforce Center (OHWC), one of four centers of excellence in Total Worker Health. Most recently Dr. Hammer was awarded a grant from the Department of Defense to study ways to increase supervisor support and enhance employment retention for veterans reintegrating into the workforce. Her research focuses on ways in which organizations can help reduce work and family stress and improve positive spillover among employees by facilitating both formal and informal workplace supports, such as Family Supportive Supervisor Behavior (FSSB)

training She is a Past Founding President of the Society for Occupational Health Psychology (SOHP) and is a Fellow of the Society for Industrial and Organizational Psychology (SIOP) and a Fellow of the American Psychological Association.

INTRODUCTION TO ITEM RESPONSE THEORY OR DON'T BE AFRAID OF IRT!

Presenter: Andrew Ainsworth, California State University Northridge

Chair: Kathleen S.J. Preston, California State University, Fullerton

### Synopsis

The focus of this workshop will be on applications of Item Response Theory (IRT) models to measuring psychological phenomenon. The workshop will begin with a brief discussion/review of related topics (e.g., classical test theory, logistic regression, latent variable models) will then focus on introducing basic Item Response Theory (IRT) models, assumptions and procedures. After establishing IRT fundamentals the modeling techniques will be illustrated conceptually using IRT software (e.g., FlexMIRT and EQSIRT) and data sets will be utilized throughout the workshop as examples. Workshop attendees will learn 1) basic IRT concepts, assumptions and procedures, 2) how IRT models can be applied to answer questions concerning psychological data, and 3) why psychologists should be using IRT models more frequently. This workshop is an excellent primer/refresher for Dr. Kathleen Preston's Advanced Topics in IRT workshop (Friday).

### Biography

Andrew Ainsworth is an Associate Professor in the Department of Psychology at California State University, Northridge where he teaches many advanced statistics courses including Applied Multivariate Analysis and Latent Variable Analysis. He earned his Ph.D. in 2007 in measurement and psychometrics from UCLA. His primary area of interest is applied multivariate statistics with a particular emphasis in structural equation modeling and item response theory. He is the co-director of the General Experimental psychology graduate program at CSU Northridge and he

is currently the statistical consultant for a few large grants, including the NIH funded Research Infrastructure for Minority Institutions (RIMI) grant which supports health related research across disciplines at CSU Northridge.

#### MATE CHOICE, MATING STRATEGIES, AND INTEREST IN INFANTS

Chair: Victor X. Luevano, California State University, Stanislaus

#### Synopsis

The drive to reproduce is an important factor shaping human behavior. The four presentations in this symposium directly address three reproductively relevant behaviors. The first presentation examines the effect of humor style on mate choice. The attractiveness of four humor styles (affiliative, self-enhancing, aggressive, and self-defeating) is assessed, as well as whether sociosexual orientation and attachment predict preferences for these humor styles. The next two presentations examine predictors of mating strategies, as defined by preference for, and experience with, various types of relationships (i.e., low-commitment relationships such as one-night-stands, booty-calls, and friends-with-benefits; and high-commitment serious romantic relationships), as well as sociosexual orientation, and extra-pair relationships. One presentation examines whether exposure to prenatal androgens (as assessed by the ratio of the second digit to the fourth digit of the hands, 2D:4D) predicts mating strategy. The other presentation examines whether psychopathy and the size of a physiological stress response (cortisol reactivity) predict mating strategy. The last presentation focuses on interest in infants as defined by attention to photos of infants (compared to adults) captured with an eye-tracker, and responses regarding preferences for infant or adult silhouettes. This presentation uses life-history theory to examine the effects of early stressors (e.g., father absence), as well as attachment style and sociosexual orientation on infant interest. Together, these four presentations describe several factors that contribute to differences in the ways humans approach mating and reproductively relevant behaviors.

### INTERNATIONAL REVIEW BOARDS: NAVIGATING ETHICS AND LOGISTICS IN INTERNATIONAL RESEARCH

Chair: Lynette Bikos, Seattle Pacific University

#### Synopsis

US researchers are required to have Institutional Review Board (IRB) approval prior to their participation in research. This poses challenges to calendaring, logistics, sequencing, and approval when multiple institutions, languages, and cultural standards are at play. Our presenters offer varied perspectives to these challenges.

Our first presenter discusses the evolving contexts and challenges of Institutional Review Boards (IRB) in the U.S. and South Korea over a 10 year period. Highlighted are the (a) increasing IRB restrictiveness in the approval of research materials, (b) considerations regarding the balance of power and control over research as it shifts from Western to non-Western institutions, and (c) the recognition of Western institutions of their role as collaborators.

- Thursday

Our second presenters discuss their experiences in a research collaborations between the US and China. Although ethical considerations were similar, the mandatory review of research protocols did not exist until recently. The presenters discuss the development of the Chinese “Ethics and Human Protection Committee” and discuss similarities and differences with Institutional Review Boards in the US.

Our third presentation reviews a pilot editor mentoring program and considers two questions: What is the role of the editor mentor (and, separately, the editorial board) in serving as a gatekeeper for the protection of human rights in research originating from cultures and contexts where ethical standards differ? What assurances are required when research emerges from a context where there is no human subjects protection process?

Our fourth presenter reports on the findings of an IRB steering committee at Alliant that is developing practice guidelines for international collaborations where the context of the collaborating partner (a) has little understanding of scientific methods, (b) has no local review process for the protection of human subjects and (c) the application of the current guidelines (i.e., Major Nationwide Reports, the Cochran report) are only partially helpful.

Our Discussant, an officer and fellow from APA’s Division of International Psychology (D52), will summarize themes, contradictions, and limitations across the presentations and will moderate a short discussion with those in the audience.

### MULTICULTURAL KIDNEY EDUCATION PROGRAM (MP): PREVENTING CHRONIC KIDNEY DISEASE AMONG LOW- INCOME MINORITY YOUTH

Chair: Susan T. Li, Pacific University

#### Synopsis

Multicultural Integrated Kidney Education Program (MP) is a unique upstream project-based service learning program designed to prevent precursors to chronic kidney disease such as obesity, high blood pressure, and poor nutrition in low-income minority youth. MP utilizes near peer mentors to empower youth to be health leaders—ambassadors for healthy kidneys—through education, mentorship and community outreach within diverse communities ([www.mikeprogram.org](http://www.mikeprogram.org), 2013). MP emphasizes service delivery, mentoring, and project-based service learning in school settings with the goal of engaging youth in healthy behaviors in order to prevent kidney problems.

Over the last ten years, MP has grown and flourished while improving its service delivery, curriculum, and evaluation. The goal of this symposium is to provide an overview of MP that includes its development and current status, presents emerging evidence regarding the fetal origins of disease, discusses the importance of evaluation and university-community partnerships, and considers the process of ongoing performance evaluation to address barriers to implementation.

Cheryl Neal, MD will present the history, mission, and objectives of MP as related to its goal of preventing chronic kidney disease. This general introduction to MP will be followed by a presentation from Susan Bagby, MD highlighting new developments in the field of developmental origins of disease. These developments have changed the conceptualization of prevention of chronic disease highlighting the critical role of adolescent interventions prior to pregnancy. Susan Li, PhD will provide an overview of MP's university- community partnerships as a means to advancing outcome

evaluation for non-profit organizations as well as a summary of MP's health outcomes and research progress to date. Finally, Samantha Bellinger, MS and Tara Sharifan, BS will address barriers to MP implementation in nontraditional settings, lessons learned from MP's expansion into alternative school and after school programs, as well as the experiences and insights of MP's near peer mentors and their role in enhancing adolescent prevention programs. Dr. Li will facilitate a group discussion of best practices regarding the prevention of CKD with low income minority adolescents including the ongoing development and evolution of MP highlighted throughout this symposium.

COURAGE: UNDERSTANDING FEAR AND THE WILLINGNESS TO ACT

Presenter: Robert Biswas-Diener, Portland State University and Noba

Chair: Debi Brannen, Western Oregon University

### Synopsis

Although fear is a helpful emotion it can paralyze people and prevent them from taking small risks. In this presentation I will discuss research on fear and bravery. Dr. Biswas-Diener will focus, in particular, on two independent systems—managing fear and increasing the willingness to act—that lie at the heart of understanding courage. He will use data, stories, and offer practical suggestions for helping individuals increase their courage quotients.

### Biography

Dr. Biswas-Diener is widely known as the “Indiana Jones of Positive Psychology” because his research on happiness has taken him to such far-flung places as Greenland, India, Kenya and Israel. Dr. Biswas-Diener is a leading authority on strengths, culture, courage, and happiness. He has published dozens of scholarly articles and multiple books on diverse psychological topics. He is best known for his pioneering work in the application of positive psychology. Dr. Biswas-Diener is the foremost authority on positive psychology coaching and has consulted with a wide range of international organizations on performance management and leadership development.

COLLABORATION, TEACHING, AND LEARNING AT THE COMMUNITY COLLEGE IN THE 21ST CENTURY

Chair: Kathryn Clancy, South Puget Sound Community College

### Synopsis:

The APA Committee of Psychology Teachers at Community Colleges and the Psi Beta National Honor Society work together to assist in the teaching and learning of psychology at community colleges. This symposium is designed to inform community college psychology faculty of the vast array of resources available and outline the benefits of membership in both organizations.

### Presenters:

PT@CC RESOURCES FOR FACULTY, Ladonna Lewis (Glendale Community College)

The APA Committee of Psychology Teachers at Community Colleges has worked to produce high quality resources for faculty members at community colleges and in this presentation we will have a quick review of the available free resources, and let you know where you can find them.

BENEFITS OF PSI BETA MEMBERSHIP, Kris Leppien-Christensen (Saddleback College)

Psi Beta, the national honor society in psychology for community colleges, began in 1982 and offers many benefits to its advisors and members including, but not limited to, recognition for achieving the honor of

membership. In addition, members are eligible for a number of national awards and may participate in Psi Beta's National Research Project. This talk will highlight the aforementioned benefits along with additional benefits that result from being a Psi Beta member or advisor, and will address how the campus and community benefit from having an active Psi Beta chapter.

### THE LAST LECTURE

Chair: Heidi R. Riggio, California State University, Los Angeles

#### Synopsis

Each year, the Society for the Teaching of Psychology invites distinguished teachers to give their “last lecture” – a deliberately ambiguous assignment that involves a reflective look at teaching. The Last Lecture always elicits responses that are as fascinating as they are unpredictable. This year, we have a distinguished panel of speakers representing a myriad of backgrounds and experiences.

#### Presenters

THERE IS MORE TO LIFE THAN APPLIED PSYCHOLOGICAL SCIENCE: BUT NOT MUCH MORE, Stewart Donaldson (Claremont Graduate University)

LIFE LESSONS FROM SOCIAL PSYCHOLOGY: MOVING BEYOND THE LEARNING IN KINDERGARTEN, Delia S. Saenz (Arizona State University)

PSYCHOLOGY AS THE MEDIATOR BETWEEN APPEARANCE AND REALITY, Ray Hyman (Emeritus Professor, University of Oregon)

#### Biographies

Stewart I. Donaldson is Professor of Psychology, Dean of the School of Social Science, Policy, & Evaluation, and Dean of the School of Community & Global Health at Claremont Graduate University. His 10 books and numerous journal articles and chapters span topics on positive psychology, organizational psychology, applied psychological science, health promotion

- Thursday

and disease prevention, and program design and evaluation. He is a fellow of WPA, on the Board of the International Positive Psychology Association (IPPA), Co-Founder and Director of the Western Positive Psychology Association (WPPA), and was recently elected President of the American Evaluation Association (AEA). Professor Donaldson received early career achievement awards from WPA and AEA, and was the 2013 recipient of AEA's Paul F. Lazarsfeld Theory Award for sustained lifetime written contributions toward advancing evaluation theory and practice.

Dr. Delia Saenz holds a faculty appointment in the Psychology Department, and a research professorship, in the Hispanic Research Center at Arizona State University. She has served as vice provost for undergraduate education and vice provost for international and institutional inclusion at ASU. Her scholarly research focuses on diversity, tokenism, intergroup processes, inclusion, acculturation, and family dynamics, and is often cited for its innovation and contributions to the understanding of diversity in work groups. Dr. Saenz' research has been funded by several funding agencies including the National Institutes of Mental Health, the National Science Foundation, and the Ford and WT Grant Foundations. Currently, she serves as co-PI on the Sustainable Energy Education Consortium's "Vocational Training and Education for Clean Energy" (VOCTEC) program. This initiative is a USAID-funded project that focuses on enhancing knowledge, awareness, and capacity-building in renewable energy technologies among developing nations with a primary goal of broadening participation by women and other minority groups. Her specific role in VECTEC project builds on her scholarly expertise and provides gender inclusion training for policy makers, trainers, and technicians. Training sessions have been conducted in Guyana, South America, and in Fiji. Beyond her contributions to scholarship and administration, Dr. Saenz has been recognized at both institutional and national levels for outstanding contributions to the teaching and mentoring of undergraduate students and graduate students of color. Dr. Saenz earned her doctorate in Social Psychology from Princeton University in 1987.

Ray Hyman is Professor Emeritus of Psychology at the University of Oregon. Prior to obtaining his doctorate in 1953, he worked as a professional magician. His research publications have dealt with perception, cognition, information theory, and the psychology of deception. He has served on several governmental committees investigating allegedly paranormal applications involving intelligence, military and other agencies.

#### GETTING THE MOST OUT OF GRADUATE TRAINING IN DIALECTICAL BEHAVIOR THERAPY: A CLINICIAN-SCIENTIST MODEL

Chair: Jamie Bedics, California Lutheran University

##### Synopsis

Dialectical Behavior Therapy (DBT) has become the gold standard for the treatment of multi-diagnostic clients exhibiting suicidal behavior. Over 25 randomized-controlled trials support the efficacy of DBT for a variety of problems (e.g., borderline personality disorder, post-traumatic stress disorder, trichotillomania) across numerous treatment settings (e.g., university counseling, community mental health, in-patient/residential). The increasing effectiveness of DBT, for an ever-expanding range of problems, makes DBT an especially appealing treatment for graduate students to study and learn. Despite its appeal, training in DBT can be daunting. As a comprehensive and principle-based treatment, DBT operates through multiple modes of interventions while at the same time incorporating protocols from additional evidence-based treatments. To date, the majority of training in DBT has been provided through workshops outside of formal graduate training. These trainings occur at extra cost and time to the clinician with research suggesting that such training may not be sufficient for adherent DBT practice. The goal of this symposium is to provide graduate trainees with strategies for improving their ability to study and learn DBT principles and strategies during graduate school. The first presentation will describe a clinical-scientist program of excellence in DBT graduate training developed at the University of Washington. The second presentation will discuss strategies for examining the therapeutic relationship during DBT. A third presentation will review the role of therapy-interfering behavior as it arises during DBT training. The fourth presentation will discuss the role of validation as it occurs on the DBT supervision team and implications for trainee motivation, competence, and burnout. Through the presentation of original research, each of these papers will highlight particular strategies and principles within DBT and provide attendees with the necessary tools for more effective self-study, practice, and self-evaluation across a variety of training settings (e.g., medical center, community counseling).

EXPLORING HUMAN NATURE

Presenter: Philip G. Zimbardo, Heroic Imagination Project

Chair: Melinda Blackman, California State University, Fullerton

Synopsis

I've spent my entire career studying human nature. At times, my experiments have confirmed and perhaps explained what is considered common knowledge about how people tend to react in certain situations. But I have occasionally been astounded by entirely unpredictable and unexpected results. My most surprising discoveries have been studying ordinary people in extraordinary circumstances—and seeing them react in extraordinary ways. At times they react heroically, and make sound decisions that would save their own lives or help others in distress. At

other times, they remain silent—even in dangerous situations where their inaction could harm themselves and others—or react mindlessly, doing foolish things.

Tonight's presentation rests on my belief that we can all make smarter, more ethical decisions when we understand the social and situational forces that influence our better judgment. We will view and discuss a new video, *Exploring Human Nature*, that contains some of the most interesting recent illustrations of human nature with which I have been involved.

### Biography

Philip Zimbardo is internationally recognized as the 'voice and face of contemporary American psychology through his widely seen PBS-TV series, *Discovering Psychology*, his classic research, *The Stanford Prison Experiment*, authoring the oldest current textbook in psychology, *Psychology and Life*, going into its 19th Edition, and his popular trade books on Shyness in adults and in children; *Shyness: What it is, what to do about it*, and *The Shy Child*. Most recently, Zimbardo co-authored *The Time Paradox*, a new view of how time perspective influences our decisions and actions. He is also past president of the American Psychological Association and the Western Psychological Association.

Zimbardo has been a Stanford University professor since 1968 (now an Emeritus Professor), having taught previously at Yale, NYU, and Columbia University. He is currently on the faculty of the Pacific Graduate School of Psychology, and the Naval Postgraduate School at Monterey, CA. He has been given numerous awards and honors as an educator, researcher, writer, and service to the profession. Recently, he was awarded the Vaclav Havel Foundation Prize for his lifetime of research on the human condition. His more than 300 professional publications and 50 books convey his research interests in the domain of social psychology, with a broad spread of interests from shyness to time perspective, madness, cults, political psychology, torture, terrorism, and evil.

Zimbardo is Chair of the Western Psychological Foundation. He heads a philanthropic foundation in his name to promote student education in his ancestral Sicilian towns. Zimbardo adds further to his retirement list activities: serving as the new executive director of a Stanford center on terrorism -- the Center for Interdisciplinary Policy, Education, and Research on Terrorism (CIPERT). He was an expert witness for one of the soldiers in the Abu Ghraib Prison abuses, and has studied the interrogation procedures used by the military in that and other prisons as well as by

Greek and Brazilian police torturers. That research is presented in his recent book: *The Lucifer Effect: Understanding How Good People Turn Evil* -a New York Times best seller. Noted for his personal and professional efforts to actually 'give psychology away to the public, Zimbardo has also been a social-political activist, challenging the U.S. Government's wars in Vietnam and Iraq, as well as the American Correctional System.

Zim's new mission in life is "seeding the earth with everyday heroes" via his newly formed Heroic Imagination Project (HIP). Ask him about it.

### A NEW LOOK AT RELATIONSHIPS: CONTRIBUTIONS FROM POSITIVE PSYCHOLOGY RESEARCH

Chair: Stewart I. Donaldson, Claremont Graduate University

#### Synopsis

This symposium will focus on positive psychology's contributions to the study of relationships and explore new empirical research. The chair, Stewart Donaldson, will open the session with a brief overview of the emerging research on high quality relationships. Yacov Aviv will present a meta-analysis on the association between positive social relationships and measures of happiness, conceptualized as life-satisfaction, positive affect, positive mood, positive emotion, happiness, and subjective well-being. The second presentation by Hannah Lucas will describe a study on high-quality relationships and social flow. This investigation based on responses from 74 participants on 222 relationships shows that having high-quality relationships with co-workers strongly predicted workers experience of social flow. Further, the role of feedback, control and happiness are discussed. Finally, Meg Rao will discuss her investigation (n = 99) of socio-cognitive processes in high-quality work relationships and its impact on vitality. Specifically, she will describe findings from hierarchical regression, CFA and SEM analyses demonstrating that the link between high-quality relationships and employee vitality is fully mediated by relationship thinking. Finally, Stewart Donaldson will serve as discussant and facilitate audience participation.

#### GOAL DISRUPTION THEORY: THEORETICAL ADVANCES AND EMPIRICAL SUPPORT

Chair: Jason T. Siegel, Claremont Graduate University

##### Synopsis

Goal disruption theory (GDT) provides insight into when goal expectancy violations are most likely to cause psychological disequilibrium and the breadth of adaptive responses that occur as a result. Constructs that influence whether a goal expectancy violation will cause psychological disequilibrium include unexpectedness, violation imprint, expectation strength, and the current state of the person. Goal disruption theory posits that when a goal expectation violation causes psychological disequilibrium, system-wide adaptive changes occur; these changes are categorized into five 5 different categories (i.e., ability, disposition, allocation of resources, processing and perception, and tactics). While these automatic changes can be useful, and even lifesaving, in some contexts, these changes can also lead people to engage in seemingly irrational behavior. This symposium will provide an extensive presentation of GDT and provide empirical support for numerous components of the framework.

The first set of studies investigates the catalyst of a goal disruption. Four experiments showed that factors of the goal violation (i.e., greater unexpectedness & larger violations), and personality factors (i.e., an aversion to uncertainty & aversion to uncertainty) led people to report more severe disruptions. The next set of studies assessed the influence of a goal disruption on all five categories of adaptive change posited by GDT: ability, disposition, allocation of resources, processing and perception, and tactics. The third presentation highlights the applied utility of GDT by illustrating the ways in which the cognitive processes experienced during disruption are akin to that of intoxication. Findings showed that during disruption, participants experienced a hyper-focus on their goal, showing strong goal commitment regardless of their expectation of success. The final presentation further highlights the applied utility of GDT. In the

context of prescription drug use, three studies found that experiencing an unexpected goal violation led to increased intentions to use prescription drugs, but that this relationship is mediated by psychological disequilibrium and increased willingness to endure purposive harm.

### ADAPTATION AND THE PHENOMENOLOGY OF PERCEPTION

Presenter: Michael A. Webster, University of Nevada, Reno

Chair: Victoria M. Follette, University of Nevada, Reno

#### Synopsis

To what extent do individuals have shared or unique perceptual experiences? The answer partly depends on whether they have been exposed and thus adapted to similar environments. This talk will explore how vision is adapted to natural and social environments and how this profoundly influences many important perceptual judgments, from color to face recognition.

#### Biography

Michael Webster is a Foundation Professor of Psychology at the University of Nevada, Reno and Director of the Center for Integrative Neuroscience (an NIH COBRE award). He received his PhD at UC Berkeley and was a postdoctoral fellow at the University of Cambridge before coming to Reno in 1994, where his research on visual perception has been continuously funded by the National Eye Institute.

ADVANCED TOPICS IN IRT: EVALUATING THE EFFECTIVENESS OF EACH RESPONSE OPTION WITH THE NOMINAL RESPONSE MODEL

Presenter: Kathleen S.J. Preston, California State University, Fullerton

Chair: Andrew Ainsworth, California State University Northridge

### Synopsis

An essential aspect of psychological research is the measurement of individuals on a construct of interest. Furthermore, accurate measurement of individuals is imperative when high-stakes decisions are being made. Therefore, much of psychological research involves the development, revision, and application of measurement instruments. While most of the focus is on the item content, there is little focus on the appropriateness of the response options with a 5-, 7-, or even 9-point Likert-type response format being arbitrarily chosen. Fortunately, the nominal response model (NRM), a much underutilized polytomous item response theory (IRT) model, has the unique ability to estimate within-item category functioning, allowing researchers the opportunity to empirically evaluate the appropriateness of each response option. This more thorough and interesting way to analyze the effectiveness of each response option is especially important during scale development, or when concerned about the psychometric properties of an established measure.

This session will focus on scale development and revision under an IRT framework. We will begin with a conceptual overview of polytomous IRT models focusing on the NRM. We will then cover how to specify the NRM for analysis using modern IRT software, discuss some technical decisions, and interpret and plot the resulting category parameters. Finally, we will examine the within-item category functioning through the application of the Wald test, make empirically based modifications to the response options, and evaluate the psychometric properties of the resulting scale. A solid understanding of measurement theory and introductory knowledge of IRT such as that provided in Andrew Ainsworth's Introduction to IRT workshop (Thursday) would be beneficial.

### Biography

Kathleen Preston is an Assistant Professor in the Department of Psychology at California State University, Fullerton. She completed her Ph.D. in 2011 at the University of California, Los Angeles. Her primary research interests are in quantitative methodology, specifically utilizing psychometric theory to develop and refine psychological measurement tools. She teaches introductory statistics, advanced statistics, multivariate statistics, psychometrics, and structural equation modeling at California State University, Fullerton.

## PT@CC TEACHING TAKE-OUTS, ROUND 1

### 8:30 – 9:30 SALON F

---

Chair: Kris Leppien-Christensen, Saddleback College

### Synopsis:

Each year, the Teaching Take-Outs offer effective and engaging new teaching activities and ideas developed by college faculty for use in undergraduate psychology courses. This year's sessions offer an array of interactive strategies for teaching a variety of topics.

### Presenters:

**EMOTION-INFORMED TEACHING: A COMPASSION-FOCUSED THERAPY APPROACH TO PEDAGOGY**, Russell Kolts (Eastern Washington University)

The way different emotions play out in our minds has significant implications for our processes of attention, cognitive flexibility, and memory. We will discuss these dynamics as well as ways to consider and work with the emotional climate of the classroom in order to maximize student course investment and learning outcomes. Participants will receive an introduction to the 3-circles model of emotion regulation and methods for integrating these concepts into the classroom. Original Research for all students in Introduction to Psychology: A tried and true approach. Learn about a relatively simple and pedagogically sound way to introduce research methods in your Introduction to Psychology courses. Your students will learn how to perform a literature review, develop a hypothesis and method, carry out their own research and report their findings (no statistics

- Friday

necessary). Participants will receive a sample of detailed instructions for students and a step by step approach for professors.

#### THE BEST DAYS OF LIFE SPAN, Amy Kassler (South Puget Sound Community College)

A short presentation on some of what I consider to be the most memorable lectures and activities I use in my Life Span Psychology Class. From playing “Are you Smarter than a 5th Grader” to anti-aging pizza ads, this presentation promises to give participants some new ideas for engaging students regarding the many topics of Life Span.

#### CREATIVE PROBLEM SOLVING: USING BROCHURES TO DEMONSTRATE PSYCHOLOGICAL LITERACY, Jaye Van Kirk (San Diego Mesa College)

This activity provides faculty with a very adaptable, creative and engaging way for students to demonstrate their Psychological Literacy. Students create brochures for classes (e.g. physiological psychology, human sexuality, careers) with content derived from research by engaging in: problem solving, written communication, team work, cultural awareness and innovation. Students have a product to include in portfolios that demonstrate desirable skill sets related to career preparation.

#### PROBLEMS IN RACIAL AND ETHNIC IDENTITY RESEARCH: AN IN-DEPTH ANALYSIS

Chair: Eric L. Kohatsu, California State University, Los Angeles

#### Synopsis

Research in racial identity and ethnic identity experienced significant growth within the last 35 years. However, as the literature base in these areas has expanded there has been a corresponding movement to raise awareness of the conceptual and methodological problems that plague this type of research. Hence, the purpose of this symposium is to provide an in-depth analysis of the current problems and issues in racial and ethnic identity research, present empirical data documenting the existence of some of these major problems, and provide suggestions for enhancing future research. Three papers will address the following topics: 1) a brief

overview of Helms (1997) recommendations for racial and ethnic identity research; 2) highlights of a recent content analysis study examining racial/ethnic glossing and incorrectly matching construct with an identity measure in studies published during a six-year period; and 3) implications of the content analysis for racial and ethnic identity research in light of Helms' propositions. It is anticipated that the material presented will help illuminate persistent problems in racial and ethnic identity research with the goal of increasing awareness and the methodological rigor in these research areas.

#### Presenters

OVERVIEW: HELMS' RECOMMENDATIONS FOR RACIAL AND ETHNIC IDENTITY RESEARCH, Eric L. Kohatsu, Magie Maekawa, Nicole Ortiz, Cynthia Martinez, Anthony Yagual & Jonathan Pelletier (California State University, Los Angeles)

CONTENT ANALYSIS: AN EMPIRICAL EXAMINATION OF ERRORS IN R/EI RESEARCH, Eric L. Kohatsu, Magie S. Maekawa, Cynthia S. Martinez, Nicole C. Ortiz, Anthony Yagual & Jonathan Pelletier (California State University, Los Angeles)

LOOKING FORWARD: IMPLICATIONS AND SUGGESTIONS FOR FUTURE RESEARCH, Eric L. Kohatsu, Magie S. Maekawa, Cynthia S. Martinez, Nicole C. Ortiz, Anthony Yagual & Jonathan Pelletier (California State University, Los Angeles)

PSYCHOLOGY 2.0: MOVING BEYOND HUMAN-COMPUTER INTERACTION

Presenter: John Boyd, Google

Chair: Robert Levine, CSU Fresno

### Synopsis

As a thought experiment, imagine a modern day replication of one of the most famous psychology experiments of all time--the original Milgram

obedience study—with one small modern twist. Imagine that participants are allowed to use their smart phones. We know from Milgram’s follow-on studies that communicating with the experimenter over the phone reduced compliance. Perhaps using today’s ubiquitous technology to communicate with personal “connections” would do the same. If we were to actually replicate the study, however, we would face a very real quandary: Forbidding smart phone use in our replication may be faithful to the original study, but it may confound its generalizability today. There are, after all, fewer and fewer contexts in which technology and psychology can be separated. This fusion of humans and the possibilities that technology affords promises to reshape our conception of psychology, our world, and ourselves.

### Biography

John Boyd is Manager of User Experience Research at Google, where he leads design research on search products. He and his team are the “human” experts in the continuing quest to shape the human-computer interactions that pervade our lives. Prior to joining Google in 2008, Boyd spent six years at Yahoo! conducting research on the user experience of ads, email, instant messaging, groups, and front pages. Boyd is also the coauthor (with Phil Zimbardo) of the award winning book, *The Time Paradox*, which investigates how the psychology of time influences our lives. He has a PhD in social psychology from Stanford University and a BA in economics from UCLA.

### CAN YOU HEAR ME NOW?: INNOVATIVE USE OF TECHNOLOGY TO IMPROVE HEALTH AMONG YOUTH WITH DIABETES

Presenter: Kurt A. Freeman with Danny C. Duke & Michael A. Harris, Oregon Health & Science University

Chair: Victoria M. Follette, University of Nevada, Reno

### Synopsis

Access to evidence-based psychosocial treatments is limited due to a variety of factors. Beyond large, urban centers and/or universities, there are often insufficient numbers of providers well trained in evidence-based interventions. For patients, travel time, cost, and effort may

- Friday

preclude accessing providers even when they are available. Patient in rural communities face even greater barriers to accessing appropriate care. To address these issues, increasingly psychosocial treatments are being provided via use of technology. In this presentation, current state of literature on the use of technology to deliver psychosocial interventions to pediatric patients will be reviewed. Benefits and challenges will be discussed. A recent RCT conducted by the presenter and colleagues using Skype™ to delivery evidence based treatment to improve adherence among adolescents with poorly controlled diabetes will be used as an example to highlight how technology may be utilized to deliver evidence-based treatments.

#### Biography

Kurt A. Freeman, PhD, ABPP, professor of pediatrics and psychiatry and board certified clinical child and adolescent psychologist. Dr. Freeman's clinical and research activities emphasize application of behavioral principles to address child rearing and pediatric health challenges for youth with and without special health care needs. ### DIVERSE BRAINS

Presenter: Morton Ann Gernsbacher, University of Wisconsin-Madison

Chair: Jon Grahe, Pacific Lutheran University

#### Synopsis

Humans differ. Most read with their eyes, but some read with their fingertips. The majority communicates by speaking and listening, but a minority communicates by signing with their hands. Humans are diverse, and so are our brains. When should neuroscientists accentuate these differences – and when shouldn't they? Why should individuals, themselves, accept their brain differences? And how can we, as a society, accommodate those brain differences?

#### Biography

Morton Ann Gernsbacher is a Vilas Research Professor and the Sir Frederic C. Bartlett Professor of Psychology at the University of Wisconsin-Madison. She received her Ph.D. from the University of Texas at Austin in 1983, and was previously an assistant, associate, and full professor at the University of Oregon. She is a fellow of the American Association for the Advancement of Science, the Society for Experimental Psychologists, the American Psychological Association, the Association for Psychological Science, and the American Educational Research Association. She has received numerous professional awards including a Professional Opportunities for Women Award from the National Science Foundation and a Distinguished Scientific Contribution Award from the Society for Text and Discourse; she has been named the 2014 recipient of Ernest R. Hilgard Lifetime Achievement Award.

### CREATING A COALITION FOR NURTURING ENVIRONMENTS

Presenter: Anthony Biglan, Oregon Research Institute

Chair: Victoria M. Follette, University of Nevada, Reno

### Synopsis

An emerging convergence in the human sciences can guide the evolution of more nurturing societies. Biological and behavioral research has produced an integrated understanding of the biological and social conditions needed to ensure the successful development of children and adolescents. A growing body of experimental evidence has identified family, school, and community interventions that are capable of nurturing development from the prenatal period through adolescence. Increasingly research is turning to how these interventions can be widely and effectively implemented. At the same time, research in economics, political science, and sociology has delineated key features of the larger social context, including especially the recent evolution of corporate capitalism, that are more distal, but nonetheless critical influences on the wellbeing of young people. This converging understanding provides a framework for intentional efforts to evolve societies that have fewer psychological and behavioral disorders, less crime, less academic failure and much higher levels of prosociality. Using the techniques that dramatically altered the culture of cigarette smoking in the U.S., we can begin to create communities in which virtually every

- Friday

young person arrives at adulthood with the habits and values needed to live a productive life in caring relationships with others.

### Biography

Anthony Biglan, Ph.D. is a Senior Scientist at Oregon Research Institute. He has been conducting research on the development and prevention of child and adolescent problem behavior for the past 30 years. He is a former president of the Society for Prevention Research.

His work has included studies of the risk and protective factors associated with tobacco, alcohol, and other drug use; high-risk sexual behavior; and antisocial behavior. He has conducted numerous experimental evaluations of interventions to prevent tobacco use both through school-based programs and community-wide interventions. And, he has evaluated interventions to prevent high-risk sexual behavior, antisocial behavior, and reading failure.

In recent years, his work has shifted to more comprehensive interventions that have the potential to prevent the entire range of child and adolescent problems. He was a member of the Institute of Medicine Committee on Prevention, which released its report in 2009 documenting numerous evidence-based preventive interventions that can prevent multiple problems. His recent review of preventive interventions concluded that diverse psychological, behavioral, and health problems can be prevented through the promotion of nurturing families, schools, and communities.

### INTERPERSONAL AND INSTITUTIONAL BETRAYAL

Presenter: Jennifer J. Freyd, University of Oregon

Chair: Stephanie M. Hoover, Western Oregon University

### Synopsis

Although historically the diagnosis and treatment of trauma emphasized psychological responses to the fear-inducing aspects of traumas, new research suggests that betrayal is just as important – maybe even more important – in predicting response to interpersonal atrocities and severe relational violations. Betrayal traumas are events and patterns of events

that involve traumas perpetrated by a trusted other (such as child abuse committed by a parent on his or her own child) or even by a trusted institution (such as an organization punishing those who report sexual assault). Betrayal blindness is the unawareness, not-knowing, and forgetting often exhibited by people towards such betrayal. Victims, perpetrators, and witnesses may display betrayal blindness in order to preserve relationships, institutions, and social systems upon which they depend. Freyd will discuss research on interpersonal and institutional betrayal, including findings regarding the impact of betrayal on memory and physical and mental health, the role of gender in risk of interpersonal betrayal trauma, and the exacerbative effect of institutional betrayal on interpersonal traumas.

### Biography

Jennifer J. Freyd, PhD, is Professor of Psychology at the University of Oregon. Freyd directs a laboratory investigating the impact of interpersonal and institutional trauma on mental and physical health, behavior, and society. She has published over 150 articles and she is author of the award-winning Harvard Press book *Betrayal Trauma: The Logic of Forgetting Childhood Abuse*. Her new co-authored book *Blind to Betrayal* was published in English by John Wiley & Sons in March 2013. It has been translated into Traditional Chinese and Portuguese. Additional translations of her *Blind to Betrayal* into Simple Chinese, Russian, and Korean are in process. Freyd has received numerous honors including the Award for Outstanding Contributions to Science in Trauma Psychology from the American Psychological Association's Trauma Division. She is a Fellow of the American Psychological Association, the American Psychological Society, and the American Association for the Advancement of Science. She currently serves as the Editor of the *Journal of Trauma & Dissociation*.

### CONDUCTING ETHNOCULTURALLY SENSITIVE RESEARCH IN PSYCHOLOGY

Chair: Courtney E. Ahrens, California State University, Long Beach

Between 2000-2010, the Asian-American population grew by 46%, and the Latino population grew by 43% (U.S. Census, 2010). But despite calls for inclusion of racial and ethnic minorities in all areas of psychological theory, research, and practice (e.g., APA, 2002), research has simply not

- Friday

kept pace with changing demographics. To help encourage more culturally relevant research in the field, the current symposium will bring together groups of experienced researchers to discuss theoretical, methodological, and analytical strategies that they have used in their research with ethnic minority populations across a broad array of topics. Structured as a panel discussion, brief presentations by each of the research teams will be followed by an extended question and answer session with the audience designed to help both new and more experienced researchers identify strategies for conducting culturally competent research in their own field. The goal of these discussions is to raise awareness about important cultural considerations and to help new researchers learn from the successes and failures of more experienced researchers in the field. This generative dialogue will conclude with a set of take-home recommendations and resources for conducting ethnoculturally sensitive research in psychology.

THE PSYCHOLOGICAL SCIENCE BEHIND PARTISANSHIP VERSUS COOPERATION. HOW YOU AND I CAN FIX OUR BROKEN GOVERNMENT

Presenter: Diane F. Halpern, Minerva Schools at KGI

Chair: Jodie B. Ullman, CSU San Bernardino

#### Synopsis

Our government is broken. Negativity toward Congress is at an all-time high with hyperpartisanship as the new bigotry in the US. I will use the lens of psychological science to view the problem and to suggest corrective actions that we can take to fix our broken government.

- Friday

### Biography

Diane F. Halpern is Dean of the College of Social Sciences at Minerva Schools at KGI. She is the McElwee Family Professor of Psychology at Claremont McKenna College and a past president of the American Psychological Association. Diane has published hundreds of articles and many books including, *Thought and Knowledge: An Introduction to Critical Thinking* (5th Ed., 2014) and *Sex Differences in Cognitive Abilities* (4th ed.). Most recently, she won the 2013 James McKeen Cattell Award from the Association for Psychological Science (the highest award given) and the 2013 Arthur W. Staats Award from the American Psychological Association.

Diane is currently working on two projects related to enhancing thinking skills. Along with her co-principal investigators Keith Millis (Northern Illinois University) and Art Graesser (University of Memphis) she designed Operation ARA, a computerized learning game that teaches critical thinking/scientific reasoning using principles from the science of learning and serious games. In addition, she recently published the Halpern Critical Thinking Assessment (HCTA; Schuhfried Publishers) as part of the Vienna Test System. The HCTA is the only test of critical thinking that uses multiple response formats, which allow test takers to demonstrate their ability to think about everyday topics using both constructed response and recognition formats.

### EMERGING SCIENTIFIC FINDINGS AND CONTROVERSIES IN POSITIVE PSYCHOLOGY

Presenter: Stewart I. Donaldson, Claremont Graduate University

Chair: Ethan A. McMahan, Western Oregon University

#### Synopsis

Seligman and Csikszentmihalyi (2000) ignited positive psychology at the turn of the century with their special issue of the *American Psychologist* on Happiness, Excellence, and Optimal Human Functioning. Almost a decade later, Ruark (2009) described positive psychology as an intellectual movement for the masses. That is, she asserted while most scholars labor in obscurity, positive psychologist's ideas, concepts, theories, research findings, and applications are in incredibly high demand across the globe. The almost exclusive focus on pathology that has dominated traditional psychology for decades, has now been augmented by this new attempt to develop a science of optimal human functioning and flourishing. The science of positive psychology is committed to the prevention of pathologies that arise when life is barren and meaningless, and to understanding how best to improve quality of life and make life worth living. While there has been an explosion of research activity and acclaim for positive psychology, it has also been plagued by controversies and sharp criticism. In this address, Professor Donaldson will present some of the latest scientific findings from positive psychology and explore some of the fields' limitations, controversies, and challenges for creating a more productive future.

#### Biography

Stewart I. Donaldson is Professor of Psychology, Dean of the School of Social Science, Policy, & Evaluation, and Dean of the School of Community & Global Health at Claremont Graduate University. His 10 books and numerous journal articles and chapters span topics on positive psychology, organizational psychology, applied psychological science, health promotion

- Friday

and disease prevention, and program design and evaluation. He is a fellow of WPA, on the Board of the International Positive Psychology Association (IPPA), Co-Founder and Director of the Western Positive Psychology Association (WPPA), and was recently elected President of the American Evaluation Association (AEA). Professor Donaldson received early career achievement awards from WPA and AEA, and was the 2013 recipient of AEA's Paul F. Lazarsfeld Theory Award for sustained lifetime written contributions toward advancing evaluation theory and practice.

### STUDENT VOICES ON CAMPUS SEXUAL ASSAULT

Chair: Christine Fiore, University of Montana

#### Synopsis

Violence in relationships is a serious and complicated social and cultural problem (Barnett, Miller-Perin, & Perin, 2010). Starting with the seminal study by Mary Koss (1988), it became apparent that college dating relationships also come with significant risk for violence. The University of Montana came into the national spotlight in 2012 (e.g. Associated press 2012) when campus rapes and sexual assaults became the focus of a Department of Justice (DOJ) investigation. In response to a University agreement with the DOJ the campus is addressing education, services, reporting policies, and procedures regarding campus sexual assaults. Once such effort was to conduct focus groups with small groups of students in summer 2013 to discover more specifically what their knowledge, attitudes and ideas are around the campus sexual assaults, services, reporting and communicating information to students. This symposium is a series of papers that qualitatively examine the transcripts of the focus groups to understand student experiences and ideas.

PROTECTIVE FACTORS AND MENTAL HEALTH ACROSS THE LIFESPAN

Chair: Douglas C. Smith, Southern Oregon University

Substance abuse, domestic violence, obesity, diabetes and related health concerns, school failure, dropout and unemployment are all examples of public health concerns that negatively impact our quality of life. Historically, intervention efforts in these areas have focused on identifying and ameliorating risk factors associated with such negative developmental trajectories. Although the impact of these efforts have met with mixed reviews, a more recent approach has been to identify and promote protective factors, including both internal and external assets and resources, which may be cultivated to offset and overcome certain risk factors and lead, ultimately to more desirable outcomes.

Such an approach to positive mental health has resulted in several subfields of multidisciplinary and interrelated inquiry, including positive psychology, resilience studies, positive youth development, strength-based approaches, and social-emotional learning. Previous research in this area has shown

- Friday

that increased numbers of external assets (e.g., supportive family, peer, and school and work relationships) and internal assets (e.g., positive affect, self-efficacy, goal-directedness ) are positively associated with desirable developmental outcomes, such as academic achievement, physical health, and prosocial behaviors and negatively associated with deleterious life outcomes including substance use, unemployment, and physical and emotional distress.

This symposium will feature presentations in several areas related to cultivating protective factors across the lifespan and their role in mental health. Our goal is to highlight the important role that protective factors play in positive developmental outcomes and describe some to the pathways through which these influences emerge.

PREVENTION OF DRUG MISUSE BY ADOLESCENTS:  
EXPORTING THE LABORATORY TO THE FIELD

Presenter: William D. Crano, Claremont Graduate University

Chair: Debi Brannen, Western Oregon University

## Synopsis

The history of evaluations of media-based campaigns designed to retard the use of illicit drugs is littered with costly disappointments. Failure of drug prevention crusades is difficult to square with social psychology's long history of successful research on persuasion, which over the years has produced important insights into the factors affect attitudes, intentions, and actions. The picture is not completely bleak, however. Review of the literature applied to drug prevention and desistance reveals some noteworthy successes, and it is instructive to compare them with the

- Friday

more numerous and often more striking failures. This comparison reveals shortcomings in prior prevention research that are both remediable and hold promise of more impressive payoffs in future applications. Current prevention attempts often have been closely tied to established theory, but the theoretical frameworks adopted to guide prevention practice and research operate at a level of detail that is not particularly useful in the design of the specific communications that form the core of the prevention messages, the core of any persuasion campaign. A more fundamental approach may help to remedy this state of affairs. In this approach, hard-won findings from the social psychological research laboratory would be brought to bear in the design of preventive communications. The research discussed in this presentation lays out a basic model of persuasive message construction that has proved successful in attenuating initiation of illicit substances by adolescents, and that may be generalized to prevention of other risky behaviors.

#### Biography

William D. Crano is the Oskamp Professor and Chair of the Department of Psychology at Claremont Graduate University. Throughout his career, has been involved in research in persuasion, and for the past decade or two has studied the application of persuasive principles in offsetting the misuse of illicit drugs by young people. His research has been supported by NIDA for 20 years. Currently, he serves as an advisor on drug prevention to the UN Office on Drugs and Crime and the U.S. Department of State.

ETHNIC AND RACIAL ISSUES: WHY CAN'T WE ALL JUST GET ALONG?

Presenter: Stanley Sue, Palo Alto University

Chair: Chehalis M. Strapp, Western Oregon University

### Synopsis

In our long history of trying to solve ethnic and racial conflicts, we seem to overcome one issue, just to see another one appear. Why do we continue to see problems involving prejudice and discrimination, violence, and disparities in privilege? Does the election and re-election of a Black American President reveal improving race relations? In this talk, I argue that underlying ethnic and racial issues are five fundamental conflicts of principles, laws, ideals, or cherished values. My belief is that many programs and practices in psychology reflect conflicts in which the clashes of values and the fruitlessness of single solutions have not been clearly recognized. Moreover, in trying to resolve issues, one side has been dominant, often to the detriment of ethnic minority groups. I conclude by indicating the tasks that need to be accomplished in addressing these issues and the contributions that can be made by psychologists.

### Biography

Stanley Sue is Distinguished Professor and Co-Director of the Center for Excellence in Diversity at Palo Alto University. Dr. Sue has received numerous awards for his research, including the 2003 American Psychological Association's Distinguished Contributions to Applied Research Award, 2005 Lifetime Achievement Award from the California Psychological Association, and 2011 Elizabeth Hurlock Beckman Award for Mentoring. He served as 2010 President of the Western Psychological Association and was elected President, Society for the Psychological Study of Culture, Ethnicity, and Race, APA Division 45 for 2015-2016.

### THE ACADEMIC'S TOOLBOX: ESSENTIAL TECHNOLOGY

Presenter: Sue Frantz, Highline Community College

Chair: Lauren Roscoe, Western Oregon University

#### Synopsis

The fast pace of technological change has left many of us feeling behind. Our day-to-day work leaves us feeling too busy to seek out tech tools that may help us function more efficiently. How much of your day is spent with email, managing files, finding time to meet with colleagues or students? What are the newest technologies that you can use right now that will help you spend less time managing and more time on task?

#### Biography

Sue Frantz is a 20-year veteran of the college classroom with the last ten spent at Highline Community College near Seattle. Her Technology for Academics blog, SueFrantz.com, features new tech tools with instructions on how to use them as well as tips for using not-so-new technologies more effectively. Acting as an interpreter, she brings technology to the average user. She currently serves as Vice President for Resources for APA Division 2: Society for the Teaching of Psychology.

### RECENT PROGRESS IN THE SCIENCE OF GRATITUDE: EXPLORING HOW GRATITUDE TRAINS YOUR BRAIN FOR HAPPINESS

Presenter: Phil Watkins, Eastern Washington University

Chair: Eric Cooley, Western Oregon University

#### Synopsis

Past research has shown that gratitude enhances well-being, and current research is exploring how gratitude increases happiness. I summarize this research by arguing that gratitude enhances well-being because it

- Friday

amplifies the good in one's life. Promising new research suggests that gratitude amplifies the good in one's ongoing experience and the good in one's relationships. This presentation also highlights how gratitude amplifies the good in cognitive processes, and thus "trains the brain" so to speak, for happiness. I will present the results of a recent treatment outcome study, showing how grateful recounting enhances happiness well after the treatment has ceased. Gratitude exercises may produce an upward trajectory of well-being because they train cognitive habits that are important for flourishing. Gratitude may train individuals to look for the good in their life, interpret social situations in a more benevolent manner, and reflect on the good from their past. In this way, gratitude may amplify the good in attention, interpretation, and memory.

### Biography

Phil Watkins received his B.S. in psychology from the University of Oregon and his Ph.D. from Louisiana State University. He has taught at Eastern Washington University since 1990. After investigating implicit memory biases in depression, Phil shifted his focus to gratitude and how it impacts well-being. He developed one of the most utilized measures of trait gratitude, and has been called a "pioneer in gratitude research." His work has focused on the relationship of gratitude to well-being, distinguishing gratitude from indebtedness, coping via grateful reappraisal, and exploring cognitive mechanisms of the gratitude/happiness relationship. Recently he served as an associate editor of the *Journal of Positive Psychology*, and has published an academic book on the science of gratitude titled *Gratitude and the Good Life: Toward a Psychology of Appreciation*.

### CREATING STUDENT RESEARCH OPPORTUNITIES THROUGH RESEARCH INTENSIVE SERVICE-LEARNING PROJECTS

Chair: Jerry L. Rudmann, Irvine Valley College

### Synopsis

The Irvine Valley College psychology department encourages students to gain research experience. This symposium includes presentations on three new service-learning projects. Each project includes a research component offering opportunities for student research. The first project is Psi Beta's

version of the Heroic Imagination Project, a project in which groups of students prepare and then present intervention workshops on psychological topics (e.g., the Bystander Effect, Mindset, Prejudice) to high school and college classes, and community groups. The CONNECT Peer-Mentor project assigns pairs of peers-mentors to introductory psychology classes. The peer-mentors encourage their Psychology 1 students to connect to the college, learn self-regulation and study skills, and to become thriving students. The third program is the Psi Beta Chapter Research Committee which engages students in a variety of research studies. The presenters will point out how all three student-driven projects address many of the APA's recently published learning goals. The projects are readily available to all psychology departments having a Psi Beta chapter. Departments without a Psi Beta chapter can have access to the projects by starting a chapter.

#### THE PSYCHOLOGY OF TECHNOLOGY AND MEDIA USE AMONG SPECIAL POPULATIONS

Chair: Nancy A. Cheever, California State University, Dominguez Hills

##### Synopsis

New communication technologies have changed the way people interact, learn, socialize and entertain themselves. A wide body of research on the effects of new media technologies indicates their use may also alter the way people behave, think, and process information, and is associated with a range of psychological disorders and conditions. This symposium, given by members of the George Marsh Applied Cognition Laboratory at California State University, Dominguez Hills, reveals the impact of media and technology use among specific populations.

The first talk explores the relationship between media use and posttraumatic stress disorder (PTSD) among military veterans. Specifically, Jose Lara-Ruiz explains how media use acts as a mediator between PTSD and academic performance. Next, Jeff Rokkum will discuss the relationship between Internet use, magical thinking and fantasy proneness. Our third talk, by Hugh Leonard, is a cross-cultural study comparing narcissistic personality traits among German and American students who use social media. In the next talk, Jamisson Costa examines how cultural norms and values relate to time use behavior among Brazilian and American students. Finally, Aimee Miller will explore the risk factors for becoming an online victim of human sex trafficking through young women's offline and online behaviors.

##### Presenters

RISK FACTORS FOR BECOMING A VICTIM OF HUMAN SEX TRAFFICKING, Aimee D. Miller & L. Mark Carrier (California State University, Dominguez Hills)

CROSS-CULTURAL INVESTIGATION OF THE EFFECTS OF TIME PREFERENCE ON MULTITASKING SKILLS, Jamisson Costa & L. Mark Carrier (California State University, Dominguez Hills)

DIGITAL MEDIA USE AS A MEDIATING FACTOR BETWEEN PTSD AND ACADEMIC PERFORMANCE, Jose Lara-Ruiz & Nancy A. Cheever (California State University, Dominguez Hills)

FINAL FANTASY: MAGICAL THINKING AND FANTASY PRONENESS, Jeffrey Rokkum, Nancy A. Cheever & L. Mark Carrier (California State University, Dominguez Hills)

### BODY LANGUAGE: LEARNING TO READ IT LIKE A PRO

Presenter: Frank J. Bernieri, Oregon State University

Chair: Clark Slagle, Western Oregon University

#### Synopsis

There is little doubt that expert readers of nonverbal behavior are walking among us. It is even plausible that some of those who have written “How to” books on this topic are legitimate pros. But is it possible for them to teach others their craft? Despite the large number of professionals whose job description requires them to read others accurately (e.g., health care professionals, interviewers, law enforcement, human services, teachers, etc.), few studies have examined the effectiveness of different training strategies. Nevertheless, a theme is emerging in the interpersonal perception literature that suggests automatic cognitive processes

operating outside of our conscious experience may be the primary driver of our perceptions and judgments of others. To the extent this is true then experts may be telling us more than they know. Therefore, the dissemination and memorization of decision rules for reading others may be a waste of time. So how does one learn to read body language like pro? Practice. Practice. Practice.

### Biography

Dr. Frank J. Bernieri received his Ph.D. in Social Psychology from Harvard University. He is currently an Associate Professor at Oregon State University School of Psychological Science and serves on the editorial board for the Journal of Nonverbal Behavior. He was one of two Psychologists given the Young Investigator award by the National Science foundation in 1992 for his research on the processes involved in face-to-face interactions including nonverbal behavior, interpersonal coordination, empathy, and interpersonal perception. He co-edited the book, *Interpersonal Sensitivity*, with Judy Hall and continues to study the accuracy and judgment processes governing interpersonal perception.

## SUBGROUP DYNAMICS ACROSS THE GLOBE: A SOCIAL IDENTITY PERSPECTIVE

Chair: Tamara L. Duggan-Herd, Claremont Graduate University

## Synopsis

Recent years have witnessed the significant influence subgroups, such as the Tea party, can have on their superordinate groups (i.e., the Republican party) and the substantial consequences this has for relations between the superordinate group and its outgroups (i.e., the Democratic party). Subgroups influence, reunite, change, and exit superordinate groups. Drawing from social identity theory (Tajfel & Turner, 1979) and its derivatives, this symposium explores the relations amongst subgroups, and between subgroups and their superordinate groups across four global settings. The symposium will begin with a brief background of social identity theory by chair Tamara Duggan-Herd. The first paper, presented by Sucharita Belavadi, examines the processes underlying language-based conflict and its' consequences for marginal subgroups in a southwestern Indian state. The second paper, presented by Jiin Jung, investigates the effects of superordinate and subgroup uncertainty on support for the reunification of North and South Korea (Study 1) and Scottish independence from Great Britain (Study 2). The third paper, presented by Tamara Duggan-Herd, considers the tendency for new and marginalized subgroups of Americans to be more discriminating in determining who should and should not be considered a true American. The final paper, presented by Joseph Wagoner, explores the intragroup processes underlying support for a subgroup, the state of Texas, to schism from its' superordinate group, the United States.

APA UNDERGRADUATE GUIDELINES 2.0: ASSESSMENT, SKILLS, AND THE SCIENTIST-EDUCATOR MODEL (OH MY!)

Presenter: R. Eric Landrum, Boise State University

Chair: Chehalis M. Strapp, Western Oregon University

### Synopsis

The publication of the APA Guidelines for the Undergraduate Psychology Major (Version 2.0) in October 2013 provides a focal opportunity for students, faculty members, departments, and programs to critically reflect upon the desired outcomes of the undergraduate psychology major. With a renewed emphasis on the assessment of skills, Guidelines 2.0 may be able to assist psychology educators to leverage current trends in higher education to make positive changes to current assessment practices (with an emphasis on skills) that benefits students, educators, future employers, and society.

### Biography

R. Eric Landrum is a professor of psychology at Boise State University, receiving his PhD in cognitive psychology from Southern Illinois University-Carbondale. His research interests center on the educational conditions that best facilitate student success as well as the use of SoTL strategies to advance the efforts of scientist-educators. He has over 300 professional presentations at conferences and published over 20 books/book chapters, and has published over 70 professional articles in scholarly, peer-reviewed journals. He has worked with over 275 undergraduate

research assistants and taught over 12,500 students in 21 years at Boise State. During Summer 2008, he led an American Psychological Association working group at the National Conference for Undergraduate Education in Psychology studying the desired results of an undergraduate psychology education. He is a member of the American Psychological Association, a fellow in APA's Division Two (Society for the Teaching of Psychology or STP), and is the current STP President.

SEE NO EVIL, HEAR NO EVIL, SPEAK NO EVIL: SUBSTANCE USE, PHYSICAL HEALTH PROBLEMS, AND HYPERVIGILANCE MAY ATTENUATE AWARENESS OF INSTITUTIONAL AND INTERPERSONAL BETRAYALS

Chair: Brianna C. Hailey, University of Oregon

### Synopsis

Betrayal trauma theory (Freyd, 1996) suggests that when an individual depends on a person or institution in a significant way, it can be adaptive to maintain full or partial unawareness of betrayal that occurs in the relationship. "Betrayal blindness" can help the individual preserve a relationship important for survival when awareness of any violations would set in motion behaviors that threaten the needed relationship (Freyd, DePrince, & Gleaves, 2007). Consistent with betrayal trauma theory, an impressive body of research has demonstrated robust links between betrayal and dissociation, or disengagement from current emotion, sensation, and perception. Beyond dissociation, the authors of this symposium propose that substance use, physical health problems (or, "somaticization"), and hypervigilance (which may represent displaced sensitivity to threat) may also attenuate betrayal-related distress and awareness. Increased understanding of these processes is critical for generating theory about the potential effects of interpersonal or institutional betrayal, as distinct from fear-inducing or distressing experiences that are not betrayals. The proposed symposium investigates psychological, physical, and cognitive processes that may help maintain betrayal blindness in the context of interpersonal or institutional betrayal. The first study investigated hypervigilance and dissociation, and found that while these processes may seem to be opposite poles of an awareness continuum, they were positively related. Additionally, both were related to experiences of interpersonal, but

- Friday

not non-interpersonal trauma. The second study investigated institutional betrayal as a moderator of the links between betrayal trauma and self-reported dissociation and physical health problems, and found that these associations were indeed amplified among individuals who had experienced institutional betrayal. The third study investigated correlates of betrayal trauma that might predict problematic substance use in young adulthood. This study found that difficulty evaluating risk interacted with trauma history type to predict amplified rates of problematic substance use for those with a history of traumas characterized by betrayal. Taken together, these studies suggest distinct experiences associated with betrayal-related, as opposed to low/no-betrayal-related events, experiences that are hypothesized to help attenuate awareness of betrayal.

## 2014 WPA PRESIDENTIAL ADDRESS

### LIFE AFTER TRAUMA: LESSONS FROM MY CLIENTS AND LIFE

Presenter: Victoria M. Follette, University of Nevada, Reno

Chair: Robert Levine, California State University, Fresno

#### Synopsis

Trauma, defined as emotional or psychological injury that can cause serious distress or suffering, can result from either common life situations or extraordinary situations such as terrorism or natural disasters. This presentation will focus on understanding and treating trauma using Acceptance and Commitment Therapy (ACT; Follette & Pistorello, 2007; Hayes, Strosahl, & Wilson, 2012). ACT provides guidance to develop mindful awareness and acceptance of both past and present experiences. When we commit to living life according to our values, we accept the difficult experiences that are encountered along the way. The practice of acceptance yields a sense of compassion for ourselves as we are able to accept our histories, thoughts and emotions without judgment. This compassion for the self often leads to an extension of our compassion toward others. Adopting this therapeutic approach leads clients and therapists alike to engaging in behaviors in accordance with deeply held

life values. Many of our clients have expressed their compassion through a desire to reach out and help minimize others' suffering. Their strength and dedication to living their valued lives continue to inspire the presenter's work. This presentation will address how doing ACT has shaped not only her clients but also her work with graduate students, and her own life.

#### Biography

Victoria Follette, PhD, is a Foundation Professor at the University of Nevada-Reno. She was named a Distinguished Alumna by the Department of Psychology at the University of Memphis, where she received her doctoral degree. She completed her M.S. degree at the University of Washington. Her work has focused on treating complex trauma using Acceptance and Commitment Therapy. She is a Fellow of the Western Psychological Association and is President of that organization. Her Guilford Press co-edited text *Mindfulness and acceptance: Expanding the Cognitive Behavioral Tradition* (Hayes, Follette, & Linehan, 2004) continues to be a standard in the field.

Chair: Kathryn Clancy, South Puget Sound Community College

### Synopsis

Each year, the Teaching Take-Outs offer effective and engaging new teaching activities and ideas developed by college faculty for use in undergraduate psychology courses. This year's sessions offer an array of interactive strategies for teaching a variety of topics.

- Saturday

#### Presenters

A CULTURALLY INFUSED CURRICULUM: PRACTICAL WAYS TO INFUSE CULTURE INTO OUR CLASSES, Sachi Horback (South Puget Sound Community College)

Many of us struggle to find ways to present our required topics within our courses, let alone include further information. You may have asked yourself: “How do I incorporate a topic that I don’t know much about?” If you have struggled with these concepts, you aren’t alone. The goal of this talk will be to explore some ways in which you might infuse culture and diversity within your curriculum. The key is that these methods are “infused,” not stand-alone chapters or large amounts of additional information. Together, we will explore in brief some examples of how to make our courses more accessible and applicable to people of various backgrounds and experiences.

ENGAGING PSYCHOLOGY STUDENTS IN ONLINE CLASSES, Helen Taylor (Bellevue College)

We all know how challenging it is to create a learning community online comparable to the face-to-face experience. In this session, a smorgasbord of ideas that work will be presented, including videotaping messages to the students, setting up rigorous online discussions that encourage critical thinking and application of the course concepts, and sending students to online activities that approximate what can be done in a classroom. Specific examples from general, abnormal, and cross-cultural psychology courses will be featured. Faculty-developed criteria for what constitutes a high-quality online class will also be presented.

SHALL WE PLAY A GAME? USING GAMES TO FACILITATE LEARNING, Kris Leppien-Christensen (Saddleback College)

Games provide a creative way to introduce students to a variety of topics. Games can also be used as an alternate method of assessment. By introducing games into your classroom, you will encourage learning and provides students with an alternate method of learning. Various games ranging from simple to elaborate will be discussed along with suggestions on how to integrate them into the classroom.

ETHNICITY AND INTERPERSONAL VIOLENCE: IDENTIFYING RISK AND PROTECTIVE FACTORS

Chair: Greg M. Kim-Ju, California State University, Sacramento

### Synopsis

A growing concern for communities of color is what predicts interpersonal violence and its psychological correlates. Research has shown that ethnic minority groups are disproportionately exposed to various forms of interpersonal and community violence. This symposium will address the following topics: 1) intimate partner violence attitudes and behaviors, 2) community violence exposure and adolescent externalizing and internalizing behaviors, and 3) family conflict, generalized anxiety and adolescent bullying/victimization.

Our first presentation examines the relationship between ethnicity, self-esteem, and previous experience of child and partner abuse to attitudes toward male dating violence among Asian, African, Latino, and White American college students. Among the significant findings, results show ethnic differences in these attitudes. Presenters will also discuss efforts to increase the awareness of protective factors of intimate partner violence for communities of color. The second presentation investigates ethnic and gender differences in unidirectional and bidirectional intimate partner violence perpetration and victimization with Asian, African, Latino, and White American college students. Results highlight specific ethnic differences in intimate partner violence perpetration and victimization. These differences and their implications with communities of color and outreach will be discussed. Our third presentation discusses how cultural factors (i.e., ethnic identity and acculturation) influence the relationship between community violence exposure and internalizing and externalizing behaviors with ethnic minority youth. The presenters will highlight the ways in which varying immigration and acculturation experiences may lead to divergent ways in which cultural factors may play a role in serving as a psychological resource in relation to community violence exposure for Hispanic and Asian American youth. The fourth presentation will explore the relationship between parent-child cultural conflict, general anxiety, and bullying/victimization with a large sample of ethnic minority adolescents. The presenter will focus on how tensions between children and parents in relation to acculturation can have implications for the types of bullying behavior that immigrant children may engage in. Implications of community-based efforts to address bullying with immigrant groups will be discussed.

Our discussant will reflect on themes in these presentations to identify links between ethnicity and interpersonal violence.

### MINDFULNESS: FROM THE BENCH TO THE BEDSIDE

Chair: M. Kathleen B. Lustyk, Seattle Pacific University

Mindfulness is an attention training strategy that requires purposeful, non-judgmental, present moment awareness. Incorporated into myriad cognitive-based treatment modalities, mindfulness as a meditative practice has been shown to reduce symptom complaints and/or improve symptom management of a multitude of mental and physical illnesses. Still, one challenge that continues to affect progress in this field of study is the limited reliable and valid self-reported measures of mindfulness as a behavior and/or trait. In this symposium we will report the findings from two mindfulness-based therapies as well as discuss issues related to self-report measures of mindfulness. The first presenter will share clinical outcome data from a Phase-III Clinical trial of Mindfulness-Based Relapse prevention as well as report treatment effects on cardiac vagal control and other stress system variables. The second presenter will share results from an adapted Mindfulness-Based Stress Reduction program developed for law enforcement personnel. The third presenter will address issues and limitations of mindfulness measurement methodology. Our Discussant will synthesize our clinical and measurement findings and speak to integration of mindfulness therapeutic techniques and assessment in clinical settings across various contexts.

Presenters:

### GROWTH CURVE MODELING WITH LATENT VARIABLES

Presenter: Sanjay Srivastava, University of Oregon

Chair: Christopher L. Aberson, Humboldt State University

#### Synopsis

If you want to study change, you need to study people changing – and that means collecting longitudinal data. But how do you analyze it? One powerful approach is growth curve modeling, which lets you go beyond describing how the average person changes and lets you model how different people change in different ways. Growth curves can be fit in either multilevel modeling software or structural equation modeling software; these two approaches overlap a great deal, but in practice lend themselves to somewhat different extensions. This session will focus on growth curve modeling within an SEM framework. We will begin with a conceptual overview of what a growth curve model is and what kind of data you need to do it (e.g., data from at least 3 and preferably 4+ timepoints). We will then cover how to specify a basic growth curve model in SEM, discuss important modeling decisions, and talk about how to interpret results. We will conclude with a preview of some of the ways to extend the basic model, including models with covariates, growth in multiple variables, etc. A solid understanding of regression is a must; some knowledge of SEM would be helpful.

#### Biography

### FIVE LATINO MENTAL HEALTH RESEARCH REPORTS FROM A SUMMER RESEARCH TRAINING PROGRAM IN MEXICO

Chair: Steven R. Lopez, University of Southern California

#### Synopsis

The National Institute of Minority Health and Health Disparities funded the University of Southern California, the Benemérita Universidad Autónoma de Puebla, and the Instituto Nacional de Psiquiatría to carry out a summer research training program. The main objective of the program is to enhance the research skills of students from communities that encounter significant health disparities. The focus of this specific program is on Latino mental health disparities. Twelve students were selected and participated in all facets of research, including writing proposals, carrying out data analyses, and writing up research manuscripts. In this symposium, the trainees will present five studies: a qualitative study and a quantitative study of the pro-social orientation of family caregivers of persons with schizophrenia; a study to assess the duration of untreated psychosis in patients with schizophrenia and schizoaffective disorders; a project that evaluates the training of promotoras to educate community residents to recognize psychosis in others; and a final study that identifies the barriers to integrating mental health care within primary care.

One of the specific aims of the training program is to help the trainees develop their Spanish language skills in professional settings. Accordingly, all the presentations will be carried out in Spanish.

**GRATITUDE AND PROSOCIAL BEHAVIOR: OTHER-ORIENTED PATHS TO GREATER HAPPINESS**

Co-Chairs: Sonja Lyubomirsky and Kristin Layous, University of California, Riverside

- Saturday

### Synopsis

This symposium explores the relationship between gratitude and prosocial behavior, as well as how gratitude and prosociality can promote greater happiness over time. First, Philip Watkins will discuss the mechanisms by which gratitude might lead to prosocial behavior. Specifically, he will provide evidence that prosocial behavior following gratitude is not simply a byproduct of the grateful person feeling indebted and needing to reciprocate. Second, Kristin Layous will discuss how prompting people to express gratitude throughout a kindness intervention not only increases the effort people put into prosocial behavior, but also fosters gains in well-being. Third, Giacomo Bono will explore the relationship between gratitude and prosocial behavior and well-being among adolescents over the course of 4 years, presenting gender as a moderator and examining different developmental trajectories of gratitude over time (e.g., starting high and staying high or starting high and then decreasing). Finally, S. Katherine Nelson will present results from a kindness intervention in which she tested how the target of one's kindness influences well-being outcomes for givers. Specifically, participants were randomly assigned to perform acts of kindness for themselves, for others, or for the greater good of humanity, or to a control condition.

### Presenters

A DEBT OF GRATITUDE? EXPLORING HOW GRATITUDE FOSTERS GIVING, Philip Watkins (Eastern Washington University)

GRATITUDE AS A MOTIVATOR OF PROSOCIAL BEHAVIOR, Kristin Layous, S. Katherine Nelson & Sonja Lyubomirsky (University of California, Riverside)

GRATITUDE'S ROLE IN PROSOCIAL BEHAVIOR AND WELL-BEING IN ADOLESCENTS OVER TIME, Giacomo Bono (California State University, Dominguez Hills) and Jeffrey Froh (Hofstra University)

THE HEDONIC IMPACT OF PERFORMING ACTS OF KINDNESS: DOES THE TARGET OF ONE'S KINDNESSES LEAD TO DIFFERENT WELL-BEING OUTCOMES FOR GIVERS? S. Katherine Nelson Kristin Layous & Sonja Lyubomirsky (University of California, Riverside)

### Biographies

Giacomo Bono, Ph.D., received his Ph.D. in social psychology from

Claremont Graduate University. His research activities focus on determinants and outcomes associated with positive responses to interpersonal harms (forgiveness) and benefits (gratitude). He is a professor at California State University, Dominguez Hills, and is now investigating the role of these strengths in positive youth development and resilience to better understand how healthy relationship functioning can promote achievement, adjustment, and well-being in youth.

Kristin Layous (B.A. UCSB, M.A. Ohio State) is a doctoral candidate at the University of California, Riverside. Her research interests include understanding how to sustainably increase happiness through the practice of simple positive activities, as well as the differential outcomes of discrete positive emotions.

Sonja Lyubomirsky (A.B. Harvard, Ph.D. Stanford) is Professor of Psychology at the University of California, Riverside and author of *The How of Happiness* and *The Myths of Happiness*. She investigates why some people are happier than others, the benefits of happiness, and how to sustainably increase happiness.

Katherine Nelson, M.A. is a doctoral candidate at the University of California, Riverside. The majority of her research focuses on understanding the elements of human happiness. Specifically, her research focuses on two broad questions: 1) When, why, and how do parents experience well-being? and 2) how can people actively and sustainably improve their own happiness?

Phil Watkins (B.S. University of Oregon, Ph.D., Louisiana State University) has taught at Eastern Washington University since 1990. After investigating implicit memory biases in depression, Phil shifted his focus to gratitude and how it impacts well-being. He developed one of the most utilized measures of trait gratitude, and has been called a “pioneer in gratitude research.” His work has focused on the relationship of gratitude to well-being, distinguishing gratitude from indebtedness, coping via grateful reappraisal, and exploring cognitive mechanisms of the gratitude/happiness relationship. Recently he served as an associate editor of the *Journal of Positive Psychology*, and has published an academic book on the science of gratitude titled *Gratitude and the Good Life: Toward a Psychology of Appreciation*.

### MEANING AND HEALTH: MULTIPLE PERSPECTIVES ON WHY MEANING AND MEANING-MAKING ARE IMPORTANT TO HEALTH

Chair: Arissa Fitch-Martin, Colorado State University

#### Synopsis

After decades of being considered a critical well-being and psychological health variable, an increasing number of empirical reports have emerged that show that meaning in life is important to physical health, too. People who experience greater meaning in life, and the related variable purpose in life, report better subjective health (Steger, Mann, Michels, & Cooper, 2009), more frequent engagement in health-promoting behaviors (Homan & Boyatzis, 2010), less frequent engagement in health-risking behaviors (Batthyany & Guttman, 2006), and even appear to live longer (Boyle, Barnes, Buchman, & Bennet, 2009; Krause 2009). Some research has begun to seek explanations for the link between meaning in health in the body's biological response to stress (Bower, Kemeny, Taylor, and Fahey, 2003), and other research has sought a protective role for meaning in bolstering neural health and functioning (Boyle, Buchman, Bennett, & Barnes, 2010).

The field is still at an early stage in exploring these links, and research typically has focused on special populations, most often those with some form of illness or the elderly. We know little about meaning and health in other populations, just as we know little about possible psychological models of the meaning-health relationship. This symposium seeks to fortify multidisciplinary research on meaning and health by presenting a range of new research and new thinking. Barenz will discuss emerging data on the connection between meaning in life and physical health variables among a representative sample of healthy adults. Steger's talk presents the first research on this relationship in a nationally representative sample from a non-Western country. Fitch-Martin and colleagues present a model joining meaning to health via specific aspects of a person's health orientation. Finally, O'Donnell offers a translational perspective on how research on meaning can bolster health prevention efforts.

DETECTING LIES AND PROFILING SERIAL KILLERS: RESEARCH FINDINGS, THE MEDIA, AND THE LEGAL SYSTEM

Presenter: Mark Costanzo, Claremont McKenna College

Chair: Eric Cooley, Western Oregon University

### Synopsis

The media is full of forensic psychology. In dozens of movies and television shows, profilers stalk serial killers and police detectives use their intuitive powers to reveal the hidden lies of criminals. In this talk I will explore a few of the ways in which media depictions of forensic science diverge from research findings. For example, to what extent is it possible to make accurate inferences about a killer's motivations and identity based on the characteristics of a crime scene? Can we reliably detect the lies of criminals by analyzing their overt behaviors and physiological responses? Have real-life crime investigators placed too much confidence in pseudo-scientific techniques that can lead them in the wrong direction? Drawing on decades of research and several real criminal cases, I will show how techniques such as profiling and lie detection have been used and misused by the legal system.

### Biography

Mark Costanzo is Professor of Psychology and Co-Director of the Center for Applied Psychological Research at Claremont McKenna College. He has published research articles on a variety of law-related topics, and is author of the books, *Forensic and Legal Psychology* (with Dan Krauss),

- Saturday

Psychology Applied to Law, and Just Revenge: Costs and Consequences of the Death Penalty. He has also co-edited four books, most recently, Expert Psychological Testimony for the Courts (co-edited with Dan Krauss & Kathy Pezdek).

He has served as a consultant or expert witness for more than 100 criminal cases involving coerced and potentially false confessions. He is the recipient of Outstanding Teaching and Mentoring Awards from the American Psychology-Law Society (APLS), the Society for the Psychological Study of Social Issues (SPSSI), the Western Psychological Association (WPA), and the Society for the Teaching of Psychology.

LEADERSHIP IS ONE TRANSFERABLE SKILL, BUT WHAT ABOUT THE OTHERS?

Chair: Jon E. Grahe, Pacific Lutheran University

### Synopsis

Students acquire valuable skills as psychology majors. Sometimes, graduates struggle with recognizing how their skills transfer to the job market. This interactive session will help students map the skills they developed in college onto job skills valued by future employers. At the end of the session, students will have concrete ideas on how to improve their resume and/or CV.

### BUILDING FUTURE RESOURCES BY SHARING PAST SUCCESSES

Presenter: Shelly L. Gable, University of California, Santa Barbara

Chair: Debi Brannen, Western Oregon University

#### Synopsis

A series of studies were conducted to examine how responses to positive event disclosures—capitalization responses—build personal resources known to facilitate resilience in the face of challenges. Laboratory studies in which participants were randomly assigned to a control condition, or to receive positive or neutral responses from a confederate as they described a past positive event were used to test participants' subsequent self-efficacy and persistence on difficulty unrelated tasks. Longitudinal and daily experience studies were used to examine whether receiving the quality of capitalization responses from others was associated with perceived control, self-efficacy, and perceptions of the availability of social support. Results demonstrated that receiving responsive reactions from others to the social savoring of positive events is associated with the building and maintaining of important personal resources.

#### Biography

Shelly Gable received a BA in Psychology from Muhlenberg College and a Master of Arts in Psychology from the College of William & Mary. She earned her Ph.D. in Social Psychology at the University of Rochester in 2000. She began her career in 2000 as an Assistant Professor at UCLA

where she earned tenure and co-founded the Interdisciplinary Relationship Science Program before joining the faculty at UCSB in January 2007. Dr. Gable's research focuses on motivation, close relationships, and positive emotions. Her work has been funded by the National Institutes of Health, the National Science Foundation, and the Positive Psychology Network. She is currently funded by a National Science Foundation CAREER grant for newer investigators. She serves on the editorial board of several journals and received a distinguished teaching award from the Psychology Department at UCLA. In 2005 she received the Early Career Award from the Close Relationships Group of the Society for Personality and Social Psychology; and in 2006 she received the Presidential Early Career Award for Scientists and Engineers (PECASE) from President George W. Bush.

A PSYCH FACULTY TRIFECTA! ASSESSING LEARNING OUTCOMES AND INCREASING PROSOCIAL BEHAVIOR ... WITHOUT ADDING (MUCH) TO YOUR WORKLOAD!

Chair: Vivian McCann, Portland Community College

### Synopsis

Psychology departments in all levels of higher education are facing increasing pressure from accreditation boards to formally assess student learning outcomes. Despite the importance of authentic assessment, this creates a challenge for faculty who are already juggling multiple roles and tasks. How, then, can we meet this new demand without creating even more work for faculty, and without taking time away from the already-burgeoning content?

We have a solution! We will present a modified version of the Heroic Imagination Project's bystander intervention, along with an accompanying assessment tool, that faculty can easily fit into their current curriculum in both Intro Psych and Social Psych. In the time you usually spend on the topic of bystanders, you can use our modified intervention to teach the same principles, while at the same time effectively changing students' prosocial attitudes and behavior in a measurable way. The simple assessment tool can then be easily administered by all faculty in your department who use the intervention, so that you end up with measurable

outcomes to share with administrators and accreditation boards - without adding too much to your workload.

### EATING DISORDER PREVENTION: INDUCING COGNITIVE DISSONANCE FOR HEALTH PROMOTION

Presenter: Eric Stice, Oregon Research Institute

Chair: Eric Cooley, Western Oregon University

#### Synopsis

Dr. Stice has conducted a 15-year research program that has evaluated an intervention that creates cognitive dissonance regarding pursuit of the thin ideal (the Body Project), which is a lynchpin risk factor for eating disorders. He will (a) provide a conceptual overview of the use of dissonance-induction for promoting attitudinal change (b) present results from an efficacy trial that found that the Body Project, wherein young women critique the thin ideal, reduced risk factors, eating disorder symptoms, functional impairment, and risk for future eating disorder onset, (c) present research that has examined the mediators that account for intervention effects and studies that have investigated the mechanisms of action, (d) describe findings from effectiveness trials that have found that the Body Project significantly reduced eating disorder risk factors and symptoms under real-world conditions when professional clinicians recruited young women at risk for eating disorders and delivered the intervention, and (e) describe findings from two trials that have found that the Body Project produces intervention effects when delivered by peer-leaders or over the Internet, both of which hold the promise of expanding the reach of this

program. He will conclude by discussing current dissemination efforts, including a new venture with Dove to deliver the Body Project to 3.5 million young girls in 16 countries.

### Biography

Dr. Stice completed a Ph.D. in clinical psychology at Arizona State University, an internship at the University of California San Diego, and a postdoctoral fellowship at Stanford University. After holding assistant professor and associate professor positions at the University of Texas at Austin, he accepted a position as Senior Research Scientist at Oregon Research Institute.

His program of research has primarily focused on elucidating factors that increase risk for onset of eating disorders, obesity, depression, and drug abuse as well as the development and evaluation of prevention programs for these conditions. For instance, he developed an eating disorder prevention program that uses dissonance-induction to reduce a lynchpin risk factor for eating pathology, which has reduced eating disorder risk factors and symptoms, as well as onset of future eating disorders, in multiple trials conducted by his research team and several independent teams. This intervention, the Body Project, is currently being disseminated to approximately 4 million young women in over 16 countries. He also uses brain-imaging procedures (functional magnetic resonance imaging [fMRI]) to investigate initial vulnerability factors for obesity and drug abuse, as well as neuroplasticity changes in reward, attention, and inhibitory regions that emerge in response to overeating and using drugs of abuse that may maintain these behaviors. He has published 192 scientific articles, 14 chapters, 6 books, and has received 28 grants from NIH or foundations to support his research program.

### INCREASING THE PROVISION OF ASSISTANCE TO PEOPLE WITH DEPRESSION: SOCIAL PSYCHOLOGICAL APPROACHES

Chair: Jason T. Siegel, Claremont Graduate University

#### Synopsis

Major depressive disorder is a treatable mental disorder that negatively

- Saturday

impacts all aspects of a person's life (CDC, 2011). However, unlike many physical illnesses where help seeking increases as severity intensifies, the more depressed an individual becomes the less likely the person is to seek help (Barney, Griffiths, Jorm, & Christensen, 2006; Keeler, Siegel, & Alvaro, 2013; Wilson, Rickwood, Deane & Patrick, 2007). Accordingly, approximately 60-70% of people with mental illness never seek treatment (Henshaw & Freeman-Doan, 2009) and half of the people who commit suicide do so without telling another person of their plans (Kisely, Campbell, Cartwright, Bowes, & Jackson, 2011). Increasing help seeking among people with depression is necessary (e.g., Siegel, et al., 2012); however, the risk of doing so has been exposed (Lienemann, Crano, & Siegel, 2013). Recent studies indicate that direct attempts to increase help seeking of people with depression can be successful, but boomerang effects have also been reported (see Klimes-Dougan & Lee, 2010 for examples of both). Simply, outreach efforts seeking to increase the likelihood that people with depression will seek help led to a reduced likelihood of help seeking. The goal of this symposium is to present findings from five different sets of studies with the common goal of increasing the assistance received by people with depression.

The first presentation will explore psychological reactance as a partial explanation as to why campaigns seeking to influence people with depression can backfire. The next presentation, influenced by Walster and Festinger's (1962) overheard communication technique, offers data indicating that mistargeted messages have the potential to successfully influence people with depression. With an eye towards a family-based intervention, two studies investigating the relationship between increased levels of depressive symptomatology, perceived family functioning, and willingness to ask family members for help follows. The next study investigates how attribution theory can offer a potential means for increasing the provision of help for women with postpartum depression. The final presentation informs about a novel approach that uses an attitude strength diagnostic survey for uncovering potential approaches for future campaigns.

### ISSUES OF POVERTY AND TODAY'S COLLEGE STUDENTS

Chair: Jeffery Scott Mio, California State Polytechnic University, Pomona

#### Synopsis

The issue of poverty and social class has been mostly absent in the psychological literature. In her seminal work in the late 1990s and early 2000s, Bernice Lott has brought such issues to light. Liu (2013) has furthered interest in this area with his edited book in the area. The present symposium will discuss the degree to which today's college student has experience with poverty, either personally or among their friends and relatives. It will also discuss frames of discussing the problem to increase support for governmental assistance to those who are experiencing poverty. Finally, it will present some data on helping those who have grown up poor overcome lowered expectations within a stereotype threat framework.

### MEANING IN LIFE IS DESIRABLE, BUT NOW WHAT? EMERGING RESEARCH ON THE RELEVANCE OF MEANING TO HEALTH

Presenter: Michael F. Steger, Colorado State University

Chair: Lauren Roscoe, Western Oregon University

#### Synopsis

Meaning in life refers to people's judgments that their lives are significant and endowed with some degree of purpose. Several hundred studies over the past five decades have established meaning in life as a cornerstone of well-being and optimal functioning. A cynical eye might characterize this great body of research as simply affirming, over and over again, that meaning in life appears empirically to be as desirable as it is thought to be colloquially. The future of research on meaning in life will need to address the practical and tangible impact of meaning beyond a constellation of survey responses. This necessity is particularly salient with regard to demonstrating an association between meaning in life and health. Examples of some of the exciting programs of research that have emerged within the past decade will be reviewed, with an emphasis on behavioral and physiological indicators of health. A model of the link between meaning and health will be presented, along with data from the presenter's lab that bears out key aspects of the model.

#### Biography

Michael F. Steger, Ph.D. is an Associate Professor of Counseling Psychology and Applied Social Psychology at Colorado State University. Dr. Steger received his Ph.D. with a dual specialization in Counseling and Personality Psychology from the University of Minnesota in 2005. His research interests concern better understanding the factors that promote human flourishing and ameliorate psychological suffering. In particular, he has focused on researching how people generate the sense that their lives are meaningful, as well as investigating the benefits of living a meaningful life. His current research examines meaning, health, and health-risking/health-promoting behaviors. He is an Associate Editor for *Journal of Personality*, and serves on the editorial board of numerous journals. His published works include two books, *Designing Positive Psychology*, and the recently-released *Purpose and Meaning in the Workplace*.

### ‘ISMS IN THE OBAMA ERA: HOPE, CHANGE, AND CHALLENGES

Chair: Jon E. Grahe, Pacific Lutheran University

#### Synopsis

Everyone agrees that the election of Barack Obama as the first African American President of the United States was an historic event. Not all agree on the meaning of this event. Some suggest his election signifies the entrance of a new era in which the color of one’s skin no longer matters. In other words, we now live in a “post-racial society.” Others disagree, and state that Obama’s prominence has actually resulted in a resurgence of overtly racist sentiments. These questions sparked a lot of interest among psychologists and there is now a growing body of research which addresses the impact of Obama on racist attitudes. This presentation will define the different types of racism and review the research literature in this area. This session will also be an interactive one in which participants will be encouraged to discuss these issues with the presenters, apply the concepts to their own experiences, and challenged to put ideas into action in working toward social justice.

### THE VOICE OF THE REFLECTION: PHOTOVOICE AS COMMUNITY-BASED PARTICIPATORY RESEARCH

Chair: David V. Chavez, California State University, San Bernardino

#### Synopsis

The main objective of this symposium is to present the use of Photovoice as an intervention to empower at-risk youth utilizing a mixed-methods approach. Photovoice, a qualitative participatory research approach, incorporates documentary photography with participatory action. It gives individuals who often have little money, power, or influence in the community the opportunity to use photography and developed narrative to portray their lives and concerns. By taking pictures and using structured interview prompts signified by the acronym "SHOWED", Photovoice uses a semi-structured process that builds empowerment. Individuals can share their stories about images, analyze for personal meaning and understanding, and display their photographs to others to help bring awareness to important issues in the community. This symposium reports the use of Photovoice as a method of determining the mental health needs and strengths of at-risk youth in the Boys and Girls Club of Waterman Gardens, a public housing complex in downtown San Bernardino. An overarching goal of the study was to help the youth develop their sense of efficacy and agency as they engage in identifying successful pathways of self-enrichment and empowerment that, in turn, help to create change in their community. The various individual presentations in this symposium build the rationale

- Saturday

for the project, present the methodology utilized in this study and present the qualitative and quantitative findings. Additionally, next steps in this collaborative action research project to address some of the issues raised by the youth are presented. Finally, Photovoice in particular and Community-Based Participatory Research in general are discussed as methods to empower community members.

WHERE ARE THE WOMEN SCIENTISTS? THE ROLE OF THREATENING ENVIRONMENTS IN WOMEN'S UNDERREPRESENTATION IN SCIENCE, TECHNOLOGY, ENGINEERING, AND MATHEMATICS (STEM)

Presenter: Bettina J. Casad, University of Missouri-St. Louis

Chair: Allen M. Omoto, Claremont Graduate University

### Synopsis

The research examines the impact of threatening intellectual environments on the academic success, major persistence, and psychological well-being of college women in STEM disciplines. We hypothesize that environmental cues highlighting a stigmatized status (i.e., gender) lead to a chain of psychological events that result in lower academic performance and persistence in STEM fields. These events include physiological threat responses, reduction in working memory capacity, and reduced motivation and task persistence. The model predicts that cognitive, affective, motivational, and physiological reactions to threatening environmental cues differ by characteristics of the person. Thus there are several pathways through which women can be encouraged or discouraged from pursuing an education and career in STEM fields. The longer term project goals are to better understand why women do not enter or leave STEM fields so that effective interventions can be developed.

### Biography

Dr. Casad is a social psychologist whose research examines processes involved in experiencing stereotyping, prejudice, and discrimination from both the target's and perceiver's perspectives. Her current research program investigates the mechanisms linking experiences of stigma to psychological well-being, educational and career achievements, and physical

health. This research is informed by multiple methodologies including the use of self-report, implicit, non-verbal, behavioral, and physiological measures. Her research program has been funded by the National Institutes of Health, National Science Foundation, Army Research Institute, Psi Chi, the Society for the Psychological Study of Social Issues, and the Haynes Foundation.

### WHAT MAKES YOU MOVE: USING THE TRANSTHEORETICAL MODEL TO UNDERSTAND PHYSICAL ACTIVITY BEHAVIOR CHANGE

Chair: Kelly A. Cotter, California State University, Sacramento

#### Synopsis

Physical activity is important for maintaining physiological and psychological health across the lifespan. However, many adults do not meet the minimum exercise recommendations to accrue health benefits. It is imperative to understand how to best promote this health behavior in order to improve public health. The Transtheoretical/Stages of Change Model (Prochaska, DiClemente, & Norcross, 1992) is a psychological theory accounting for how individuals change their behaviors. In this symposium, five presenters will apply the Transtheoretical Model and its components to the vital health behavior of physical activity. The first presentation will introduce the Transtheoretical Model and its components, explain its application to physical activity, and describe the demographic results of a longitudinal study. The following presentations will examine each component of the model for deeper understanding of physical activity adoption, maintenance, and relapse. The first of these presentations will focus on the processes of change, examining differential patterns between cognitive and behavioral change strategies. The next presentation will focus on decisional balance, assessing how perceptions regarding the costs and benefits of exercise relate to physical activity over time. This presentation will be followed by a study examining exercise self-efficacy, wherein change to confidence in one's ability to exercise over time will be examined for its relationship to physical activity change. The final presentation will examine social control, or efforts of social partners to change another person's health behavior. The presentation will compare the effects of positive to

- Saturday

negative approaches. We anticipate that the audience will come to a deeper appreciation of health behavior change and its implications for personal and public health as a result of this symposium. The findings from these studies will facilitate a better understanding of the complex nature of behavior change and how social and psychological factors impact physical activity over time.

### ASIAN AMERICAN PSYCHOLOGY: MENTAL AND PHYSICAL HEALTH

Presenter: Gordon C. Nagayama Hall, University of Oregon

Chair: Jeffery Scott Mio, Cal Poly Pomona

#### Synopsis

Asian American psychology is the study of cultural and sociocultural influences on the behavior of Asian Americans. A major emphasis in Asian American psychology over the past 40 years has been on mental health. Asian Americans have consistently been found to underutilize mental health services. I will discuss my recent research on methods to increase mental health service utilization. In addition, I will discuss my current research on cancer, a physical health issue that is prominent among Asian Americans. Asian Americans are the only U.S. ethnic group for whom cancer is the leading cause of death. Unlike mental health services, Asian Americans do not underutilize medical services. However, cancer

- Saturday

screening disparities exist for Asian Americans and I will discuss a research program that I am developing on physician cancer screening biases. I will also introduce a project I am developing on behavioral medicine pain management for Asian American cancer patients that has the potential to address both mental and physical health issues.

### Biography

Gordon C. Nagayama Hall is a Professor of Psychology at the University of Oregon. He previously was a Professor of Psychology at Penn State University and Kent State University. Dr. Hall served as President of the APA Society for the Psychological Study of Ethnic Minority Issues and of the Asian American Psychological Association. His research interests are in Asian American psychology and he is currently developing projects on Asian American cancer screening and pain treatment.

### TEACHING ABOUT SEXUALITY AND SEXUAL ORIENTATION

Presenter: Lisa Diamond, University of Utah

Chair: Stephanie M. Hoover, Western Oregon University

#### Synopsis

There may be few topics as difficult to teach about – and yet as important – as sexuality and sexual orientation. The past several decades have witnessed an explosion of social scientific research on the development and expression of sexual orientation over the life course, as well as profound changes in law and public policy on this issue. In this talk, I will discuss strategies that I have used in my own teaching and research on these issues, address common pitfalls, and review the difficulty that arises when teaching politically charged issues in a manner that fosters open discussion and critical thinking in diverse populations of students.

#### Biography

Lisa M. Diamond is Professor of Psychology and Gender Studies at the University of Utah. She studies the longitudinal course of sexual identity development and the psychobiological mechanisms through which intimate relationships influence physical and mental health over the life course. Her 2008 book, *Sexual Fluidity*, published by Harvard University Press, describes the changes and transformations that she has observed in the sexual attractions, behaviors, and identities of a sample of lesbian, bisexual, and “unlabeled” women that she has been following since 1995. *Sexual Fluidity* has been awarded the Distinguished Book award from the American Psychological Association’s Society for the Study of Lesbian/Gay/Bisexual/Transgendered Issues. Dr. Diamond has been awarded grants in support of her research from the National Institute for Mental Health, The W.T. Grant Foundation, the American Psychological Foundation, the American Institute for Bisexuality, and the Gay and Lesbian Medical Association.

### EVOLUTION OF RELIGIOUS PROSOCIALITY: HOW GODS MAKE US GOOD AND HOW THEY DON'T

Presenter: Azim Shariff, University of Oregon

Chair: Ethan A. McMahan, Western Oregon University

#### Synopsis

People have opined about the connection between religion and prosocial behavior for ages, but only in the last decade has psychology rigorously tested these claims. The body of results reveals a real, but complicated, relationship that helps us better understand the origins and functions of various aspects seen in modern religions. I'll review many of the recent findings on the effects of religion on prosocial behavior, as well as prejudice and happiness. I'll argue that looking deeper into the individual elements that comprise religion yields insights that are otherwise obscured by researching religion as a monolithic concept. Finally, I'll hazard some predictions about what these findings, and functionalist theories of religion more generally, suggest for the future of religion.

#### Biography

Azim Shariff is an assistant professor of psychology at the University of Oregon, where he runs the Culture and Morality Lab. He has studied the psychology of religion for 10 years, and was the 2012 recipient of the Margaret Gorman Early Career Award from the APA's Division 36 (Psychology of Religion and Spirituality).

### HOW TO PUBLISH

Chair: James Till, APA Journals

#### Synopsis

Publishing in established scholarly journals provides important career development for professional, scientific, and academic psychologists.

- Saturday

Experienced authors and editors sharing their knowledge of the ins and outs involved in becoming an established author can be invaluable. This session, sponsored by the APA Publications and Communications Board, is intended to help demystify the publication process and encourage productive manuscript writing. In addition to providing an overview of the publication process from organizing and writing the manuscript through its final publication, the panelists provide guidelines on writing discipline, selecting topics, and framing the research data for publication. They also illuminate the editorial processes involved in anonymous peer-review of manuscripts and provide guidelines for how reviewer comments should be considered. Beginning authors also receive instruction in what editors really mean in their decision letters and on the differences between various types of “rejection” letters. General support is provided for overcoming rejection in order to persevere in the publication process.

#### Panelists

Laura Brown (Feminist Community Therapy Project, Seattle; Consulting editor for the journal – Psychotherapy)

Allison Vaughn (San Diego State University)

James Till (APA Journals Department)

This panel is sponsored by the American Psychological Association

## PSI CHI CHAPTER EXCHANGE AND AWARDS 2:00-4:00 SALON G

---

Chair: Jon E. Grahe, Pacific Lutheran University

#### Synopsis

Psi Chi annually hosts a chapter exchange for chapters in the Western Region to share their activities and experiences with other chapters. Each chapter at the exchange will be encouraged to speak for about 5 minutes about their goals and activities for the year. Also, various recognition awards will be given during the chapter exchange.

## PSI BETA CHAPTER EXCHANGE AND SPEED RESEARCH COMPETITION

**2:00-4:00 SALON C**

---

Chair: Kris Leppien-Christensen, Saddleback College

### Synopsis

The chapter exchange serves as an opportunity for active and inactive chapters to share information on successful fundraising, recruiting, and club activities. Information regarding Psi Beta national awards and activities is also disseminated as well as information on how to start or reactive a chapter. Students will also have the opportunity to participate in a speed research competition where they will present their research in three minutes using a single PowerPoint slide.

### DISORDERED EATING AND BODY DISSATISFACTION AMONG LATINA/O UNDERGRADUATES: THE ROLE OF AGENTS OF SOCIALIZATION

Chair: Elizabeth Diane Cordero, San Diego State University, Imperial Valley

Agents of socialization are the people and institutions from which we acquire cultural values and ideals. Two such agents are our parents and the media, and they help us learn myriad appearance-related standards including what is considered attractive and whether or not we should be preoccupied with body weight and shape. Disordered eating and body dissatisfaction are problems that arise frequently from the internalization of stringent ideals or from problematic connections with agents of socialization, such as unsupportive relationships with parents or excessive susceptibility to media influence. Significant numbers of undergraduates engage in disordered eating or experience body dissatisfaction, and researchers have explored how agents of socialization affect these issues within this population. However, few studies have investigated these phenomena within female Latina and male Latino undergraduates despite the presence of disordered eating and body dissatisfaction within Latina/o undergraduates. This symposium will present three research studies pertaining to agents of socialization and how they predict either disordered

- Saturday

eating or body dissatisfaction within Latina/o undergraduates. The first two presentations focus on ways in which parents' behaviors predict disordered eating in Latina undergraduates, specifically the quality of the parent-daughter relationship as well as negative verbal and nonverbal messages about body weight and shape communicated by parents. Both of these presentations will discuss the variables of interest within the context of ethnic identity and the cultural value of familismo, or the cherishing and prioritizing of familial bonds. The final presentation shares the results of an experiment conducted in a predominately Latina/o undergraduate population. This experiment examined the effects of exposure to different media images on the state body dissatisfaction and state self-esteem of male and female undergraduates. The symposium will conclude with a discussion of the implications of each study's findings on prevention and intervention efforts.

Presenters:

DISORDERED EATING: THE IMPACT OF PARENTAL MESSAGES ON LATINA UNDERGRADUATES, Rodolfo J. Mercado, Rob Grijalva, Cecelia R. Carr & Elizabeth Diane Cordero (San Diego State University, Imperial Valley)

PARENT-DAUGHTER RELATIONSHIPS AND DISORDERED EATING IN LATINA COLLEGE STUDENTS, Kayla C. Hutchinson, Monica Martinez, Sergio Ojeda Jr. & Elizabeth Diane Cordero (San Diego State University, Imperial Valley)

### EVOLUTIONARY PSYCHOLOGY'S PLACE IN THE LANDSCAPE OF MODERN HIGHER EDUCATION

Presenter: Glenn Geher, State University of New York at New Paltz

Chair: Jamie M. Cloud, Western Oregon University

#### Synopsis

Over the past several decades, the evolutionary perspective within the behavioral sciences (i.e., evolutionary psychology or EP) has seen enormous growth. EP has shed light on phenomena across all of psychology. This said, EP has run into palpable challenges within the academy. This presentation will summarize research I've conducted regarding the state of EP within the broader landscape of academia, along with implications for possible futures of the field. These studies address the relatively interdisciplinary nature of EP along with the nature of attitudes toward EP held within the academy. Taken together, the studies to be described tell a story of EP as having achieved some great successes - along with a story of significant challenges

- Saturday

- making the future of this field unclear. Possible futures for EP will be discussed.

### Biography

Glenn Geher is chair and professor of psychology as well as director of evolutionary studies at the State University of New York at New Paltz, where he also directs the Evolutionary Psychology Laboratory. At New Paltz, Glenn has received accolades for teaching including the Alumni Association's Teacher of the Year award (2007) and the Chancellor's Award for Excellence in Teaching (2008). Glenn's scholarly work has largely focused on (a) cognitive processes that underlie the nature of human mating (i.e., mating intelligence) and (b) evolutionary psychology's place within the broader landscape of academia. His recent publications include *Mating Intelligence Unleashed* (2013; co-authored with Scott Barry Kaufman of NYU and published by Oxford), *Evolutionary Psychology 101* (2014; published by Springer), and *Straightforward Statistics* (2014; co-authored with Sara Hall, who studied with Glenn in the late 1990s in Monmouth when Glenn was a member of the Psychology Department at Western Oregon University).

GOING GAGA: INVESTIGATING, CREATING, AND  
MANIPULATING THE SONG STUCK IN MY HEAD

Presenter: Ira E. Hyman, Jr., Western Washington University

Chair: Robert G. Winningham, Western Oregon University

### Synopsis

Sometimes the mind acts like a broken record – repetitively playing the same song over and over again. Over the last several years, we have explored this commonly experienced intrusive thought using surveys, diary studies, and laboratory experiments. Contrary to the belief that only obnoxious songs get stuck, we have found that songs people know and like frequently became stuck in their thoughts. Additionally, stuck songs follow environmental cues, depend on cognitive load to reappear in consciousness, reflect attempts to suppress awareness, and may be related to individual differences. Sometimes songs come into our minds briefly and conscious

experience quickly moves to other thoughts. But when a song starts replaying in one's head, the song is likely to return over the course of hours and days. By creating and manipulating stuck song experiences, we have investigated intrusive thoughts more generally.

### Biography

Ira Hyman is a Professor of Psychology at Western Washington University. His primary area of interest concerns applied cognitive psychology. He has published research on the creation of false childhood memories, collaborative remembering, memory for traumatic events, memory for song lyrics, and inattention blindness for unicycling clowns. Recently his research group has investigated the song stuck in one's head phenomenon and other intrusive thoughts. He is the co-editor, with Ulric Neisser, of *Memory Observed: Remembering in Natural Contexts*. He is a regular contributor to *Psychology Today*. He received his undergraduate degree from Duke University and his Ph.D. from Emory University.

SERVICE LEARNING: USING PSYCHOLOGICAL RESEARCH TO ENHANCE EVERYDAY LEARNING FOR STUDENTS AND THE COMMUNITY

Chair: Andria Woodell, Central Oregon Community College

### Synopsis

The aims of the symposium are to examine the foundation of research-based non-profit organizations by introducing the Heroic Imagination Project (HIP), a 501(c)3 non-profit organization established by Dr. Phillip Zimbardo, that teaches people how to take effective action in challenging situations. By partnering with local and national colleges, as well as student organizations, HIP has created a series of student-driven service learning projects as a means of making a positive change. The three presentations will focus on the history and concept behind the organization, an illustration of a student-driven presentation, and a final discussion for potential faculty advisors addressing the logistics of developing and adapting the projects to their institutional setting.

### Presenters

INTRODUCTION TO THE HEROIC IMAGINATION PROJECT, Bryan Dickerson & Kristin Kay Gundersen (Heroic Imagination Project)

A DEMONSTRATION OF THE HEROIC IMAGINATION INTERVENTION, Micheal Morrison (Central Oregon Community College), Suci Sonnier (OSU-Cascades), Andrea Anaya & Katie Hawkins (Central Oregon Community College)

LOGISTICS FOR DEVELOPING THE HEROIC IMAGINATION SERVICE LEARNING PROJECTS, Andria Woodell (Central Oregon Community College)

### GENERAL PSYCHOLOGY AND MODERN BEHAVIORISM

Presenter: Inna Kanevsky, San Diego Mesa College

#### Synopsis

When the Cognitive Revolution rearranged American psychology, behaviorists responded by moving more and more away from the mainstream, and focusing on their own work, shared in their own publications and at their own, quite sizable, conferences. One of the unfortunate side effects of this dynamic was that a number of misconceptions and oversimplifications about the history of behaviorism, its nature, and its current state crept into Introductory Psychology textbooks. There they stayed, continuing to misinform students at the very beginnings of their acquaintance with psychology. This presentation will reintroduce behaviorism as it is today, and address a number of common concerns about that approach to psychology.

### THE KEY TO UNDERSTANDING DOGS

Presenter: Stanley Coren, University of British Columbia

Chair: Ethan A. McMahan, Western Oregon University

#### Synopsis

People have a great curiosity—and many misunderstandings—about how dogs think, act, and perceive the world. It is only over the past two decades that there has been a significant increase in the number of psychological researchers who are studying the canine mind. Perhaps the most significant breakthrough in canine cognitive research has been the application of techniques used to study young human children to the study of dogs. On the basis of such research it is becoming clear that the average mental abilities of dogs are roughly equivalent to those of children 2 to 3 years of age. This is true for language abilities, problem-solving, and it is even true that dogs may respond socially to their human caregivers in much the same

- Saturday

way that toddlers do. This talk will try to give listeners a peek into what we know about the inner lives and mental processes of our canine companions.

### Biography

Although best known to the public for his series of best-selling books on dogs, Stanley Coren is also a well respected scientist and Professor Emeritus of Psychology at the University of British Columbia. He did his undergraduate work at the University of Pennsylvania and completed his doctorate in Psychology at Stanford. He has authored or co-authored 36 books, including research monographs and a widely used textbook on sensation and perception. He has published over 450 articles and research reports in well respected scientific journals including: Science, Nature, New England Journal of Medicine, American Journal of Public Health, British Journal of Medicine, Psychological Review and others. His research has covered many areas of in psychology, such as human perception, neuropsychology, laterality, handedness, sleep, behavior genetics, cognitive processing as well as canine intelligence and personality.

Coren's psychological research and teaching has been honored many times and he has been named as a Fellow of the Royal Society of Canada and a Killam Senior Research Fellow. In recognition of the quality of his work he was elected to fellowship status by numerous professional societies such as the American Psychological Association, Canadian Psychological Association and the Association for Psychological Science. Other honors include an honorary degree of Doctor of Science by the University of Guelph for his scientific and literary contributions and a Canadian Psychiatric Association Research Award. In addition his ability to communicate with people has been recognized by his winning of the Robert E. Knox Master Teacher Award and by his service on the American Psychological Association's, Public Information Committee.

His writing and his books have also received numerous awards among which are the Maxwell Medal of Excellence from the Dog Writers Association of America and the Animal Behavior Society's Outstanding Children's Book Award. He was twice named Writer of the Year by the International Positive Dog Training Association.

Coren is popular with the media and has been featured on numerous television programs including Oprah, Larry King, and many more. He was the host of the nationally broadcast television show Good Dog! in Canada, and more recently he can be heard broadcasting a radio column on CBC.

He also writes a regularly appearing informational blog, “Canine Corner” (<http://www.psychologytoday.com/blog/canine-corner>) on the Psychology Today website and it typically receives in excess of 30,000 hits each week. Coren is also an instructor with the Vancouver Dog Obedience Training Club. This is a non-profit organization that supports beginners dog training in the community (for the general public) as well as advanced dog training for dog handlers who wish to compete in dog obedience competitions at local and national levels. He currently lives in Vancouver, Canada, with his wife, Joan, and an old Nova Scotia Duck Tolling Retriever, named Dancer and a young rambunctious Cavalier King Charles Spaniel named Ripley, who is in his early stages of training.

## NEURODEVELOPMENTAL RESEARCH AND TREATMENT OF BRIGHT YOUTH WITH LEARNING AND/OR BEHAVIOR CHALLENGES

Chair: Dana E. Lieberman, California School of Professional Psychology

### Synopsis

Many referrals to psychologists involve cases of children with IQs in the high average to very superior ranges who have learning, emotional, and/or behavioral challenges. Historically, research on very bright children, including intellectually gifted children, has focused on the most effective means with which to educate this population and little attention has been paid to their challenges. As a result, many of these children are misdiagnosed or underdiagnosed. More recently, the field has begun exploring the complexity of development in this population and its impact upon academic, emotional, and behavioral functioning. Our research has begun identifying the specific characteristics of these children that may contribute to social-emotional and behavioral difficulties. This knowledge of developmental challenges alerts clinicians to diagnostic possibilities. Additionally, identification of strengths and weaknesses allows

these children to benefit from educational programs and psychological interventions that are individualized for their specific needs. Appropriate assessment in this population is needed to identify their unique strengths and weaknesses. Specific implications for clinicians in understanding the unique characteristics of this population are necessary in order to improve case conceptualization, and prevent underdiagnoses and misdiagnoses. The chairperson will provide an overview of the unique challenges that these children and their families face and then provide concluding thoughts pertaining to the role of psychologists working with this population. The first presenter will provide an overview of the current state of the research literature examining neuropsychological and social/emotional functioning in bright youth, focusing on recent research conducted by this researcher and research team. The second and third presenters will discuss potentially useful clinical interventions (a mindfulness approach and parent training technique) for clinical child and family psychologists working with this population. The final presenter will review a case study of an intellectually gifted child with asynchronous development and highlight case conceptualization and treatment implications.

MULTIPLE REGRESSION: ASSUMPTIONS, ANALYSES, AND PRESENTATION

Presenter: Christopher L. Aberson, Humboldt State University

Chair: Dale E. Berger, Claremont Graduate University

### Synopsis

This workshop provides an overview of the application of multiple regression analysis from start to finish. I begin with a discussion of basic statistical values for OLS regression and provide a brief overview of their calculation and interpretation. Next, I cover evaluating regression assumptions and techniques for addressing violations. I then provide sample analyses and interpretations along with APA style presentation

examples. After covering these topics, I discuss advanced graphing techniques for detecting violations of assumptions, approaches for detecting and dealing with extreme scores, and application of approaches such as Hierarchical Multiple Regression. Attendees will receive a packet demonstrating use of SPSS and R for conducting analyses. A basic background in correlation and linear regression, consistent with the coverage in most introductory statistics textbooks, will be helpful.

### Biography

Chris Aberson is currently Professor of Psychology at Humboldt State University. He earned his Ph.D. at the Claremont Graduate University in 1999. His research interests in social psychology include prejudice, racism, and attitudes toward affirmative action. He serves as Associate Editor for *Group Processes and Intergroup Relations*. His quantitative interests focus on statistical power. His book, *Applied Power Analysis for the Behavioral Sciences* was published in 2010.

### WHEN ANIMALS ATTACK... WITH LOVE: ANIMAL-ASSISTED INTERVENTIONS AND PSYCHOLOGICAL DISORDERS

Chair: Brittany G Futch, University of La Verne

#### Synopsis

The following symposium covers recent research on the use of animal-assisted interventions (AAI) as treatment for several psychological disorders. Each talk is based on the attachment theory perspective. Through this model, it is believed that the bond formed between a human and animal, within a therapeutic setting, promotes psychological and physical improvements. The disorders to be discussed include dementia, autism, and schizophrenia. The talk will review the effectiveness of AAI on cognitive capacities, mood stability, and motor capabilities. Furthermore, common methodological designs will be mentioned, including experimental and non-experimental approaches. Finally, each of the talks will contain recommendations for directions in future research in this area.

### MEASURING MINDFULNESS AND ACCEPTANCE: PERSPECTIVES ON PROCESS AND OUTCOME

Chair: Dharmakaya P. Colgan, Pacific University

#### Synopsis

The empirical study and clinical application of mindfulness is rapidly expanding in Western medicine and psychology. Demonstrated effectiveness of mindful-based interventions is mounting. In the shadow of this excitement, however, there still is a lack of consensus regarding the conceptualization of mindfulness, as well as a lack of valid and reliable tools to measure this construct. An agreed upon operational definition continues to elude Western scientists because mindfulness is understood not only as a collection of techniques, but also a psychological process, a psychological trait, and the positive emotional outcomes of the practice itself (Hayes & Wilson, 2003).

The purpose of this symposium is to examine the construct and assessment of mindfulness and acceptance from several different perspectives. In the first presentation, we will review the state of the literature on mindfulness and acceptance assessments. In the second presentation, we will explore data from an empirical investigation of the psychometric properties of a recently developed, process-based mindfulness scale—The Mindfulness Process Questionnaire (MPQ; Erisman & Roemer, 2012)—among two student samples and a community sample. In the third presentation, data from a repeated measure, longitudinal study that compares the utility of the MPQ to the Five Facet Mindfulness Questionnaire (FFMQ; Baer et

al., 2006, an outcome-based mindfulness scale) in the prediction of several outcomes will be explored. In the fourth presentation, because behavioral activation is a key element among many mindfulness- and acceptance-based interventions, we will examine the psychometric properties of the Behavioral Activation for Depression Scale (BADs; Kanter et al., 2006) among a clinical sample. The discussant will facilitate a group discussion regarding the construct of mindfulness and the state of mindfulness and acceptance measures. Through the exploration of these multifaceted perspectives on mindfulness and acceptance, we hope to attain a deeper understanding of mindfulness and how to accurately assess it.

## ADDRESSING MENTAL HEALTH WITH IMPLICATIONS FOR COLLEGE STUDENTS

Chair: Michelle Pitts, University of Nevada, Las Vegas

### Synopsis

There has been an abundance of research showing mental health treatment is stigmatizing, particularly in collegiate and professional athletes with current or past substance abuse or dependence. In this symposium the college campus is used as an exemplary to demonstrate how environmental factors can be adjusted to enhance utilization of mental health services. First, we review examples of stigmatization that influence collegiate athletes to underutilize mental health services on college campuses. We report stigmatizing terms, methods, and environmental factors that are so often used in mental health recruitment and service implementation that providers have become desensitized to their ill effects. We then report alternative non-stigmatizing strategies, including positive terminology, physical aspects of the care facility, cultural adaptations, and active versus passive recruitment that is fun and encouraging. We briefly describe The Optimum Performance Program in Sports (TOPPS), which is a comprehensive program for college athletes being developed and formally evaluated with support from the National Institute on Drug Abuse. We discuss both evidence-supported and innovative aspects of TOPPS, including its standardized orientation, standardized assessments and interventions to enhance cultural perspective, consumer-driven prioritization of evidence-supported interventions from a menu of options and on-going utilization of Likert-ratings of helpfulness, significant other supported dynamic goals and contingent rewards, mental preparation exercises prior to and after meetings, and incorporation of significant others utilizing video- and telephone-therapy technologies. We also emphasize our efforts to create a welcoming, non-stigmatizing environment that has direct implications to non-campus mental health milieus, and our standardized process of case supervision.

**FOSTERING HIGH-QUALITY DEVELOPMENTAL  
RELATIONSHIPS AT SCHOOL AND WORK: IMPLICATIONS FOR  
RESEARCH AND PRACTICE**

Chair: Dana Kendall, Seattle Pacific University

## Synopsis

In this symposium, we present the very latest advances in research and practice in the area of on-the-job development through mentoring. First, we build the case that high-quality mentoring is essential for professional and personal growth and learning. Moreover, we take a closer look at the gap between men and women in the extent to which they receive mentoring and sponsorship throughout their careers. Second, we discuss the value of organizationally-sponsored programs that are created specifically to facilitate mentorships that would not have otherwise transpired naturally. Third, we examine from a psychometrics perspective the various measures available for capturing the inner-workings of dyadic exchanges between mentors and proteges. Finally, we present a case study and lessons learned from implementing a real mentoring program in a graduate school setting.

## Presenters

**META-ANALYSIS OF MENTORING MEASURES**, Joshua D. Weaver & Katie Kirkpatrick-Husk (Seattle Pacific University)

**FORMAL MENTORING PROGRAMS IN PRACTICE**, James Longabaugh & Robert Bullock (Seattle Pacific University)

**SPONSORSHIP IN ORGANIZATIONS: THE CRITICAL ROLE OF TRUST**, Katie Kirkpatrick-Husk, Dana L. Kendall & Robert Bullock (Seattle Pacific University)

**VARIABILITY IN IMPLEMENTATION AND DESIGN ELEMENTS OF WORKPLACE MENTORING PROGRAMS**, Dana Kendall, Kristen Voetmann, Maria Rodriguez & Zach Cook (Seattle Pacific University)

### WILL YOU STILL NEED ME WHEN I'M 64?

Chair: Mary P. Russell-Miller, Southern Oregon University

#### Synopsis

It's like a growing fad: At all costs we need to stop the aging process and live forever! Immortality is seen as desirable, and the look of youthfulness is almost a requirement. These cultural paradigms lead the media and scientists to make claims that they have the secret to longevity and successful aging. In America the percentage of individuals over age 65 will change from 12 % of the total population to 20% by the year 2030. The combination of extended life expectancy and the Baby Boomer generation reaching retirement age demands that our society responds to meet the considerable needs of our aging population and address age discrimination. How do we as a society then react to the reality of a growing elderly population and the resistance to accept aging? Issues specific to our elderly and their well-being include mental health and substance abuse, brain health, social services, and LGBT concerns. The broader field of psychology is in a position to offer considerable research-based knowledge as well as practice-oriented expertise to address both the realities and the myths surrounding aging. Specifically, research and practice in geropsychology are moving forward to meet these demands. Professionals with knowledge, experience, and motivation to work with and for the elderly are critical. The need for new knowledge and expanded services is also creating exciting career opportunities.

Will you still need me when I'm 64? will explore many facets of our aging population by reviewing contemporary research looking at new trends in both research and practice. Current research specific to brain health, mental health, LGBT issues, and how our society can move forward with creativity and innovation will be the focus. Our goal is to provide a summary of our current understanding of the aging population, challenges specific to the elderly, and the potential for future research and practice.

Multivariate Software Inc. - Creators of EQS  
Introduces a Technically Sophisticated, Feature Rich  
and User Friendly New Product!

## EQSIRT

### EQSIRT Features a Wide Variety of Item Response Theory Methods

- Dimensionality assessment
- Binary models - Rasch, 1PML, 2PL, 3PL
- Polytomous models - GRM, GPCM, NRM, RSM
- Multi-dimensional models
- Multiple group models
- All models with equality and fixed constraints
- Models with non-normal latent trait
- Models with covariates
- Models with DIF (differential item functioning)
- Equating
- Simulation with data generating modules
- Outcomes in R data object for further analysis
- R code for displaying ICC

**New from the EQS team!**

EQSIRT is available in MS  
Windows, Mac OS X, and  
Linux Platforms.
