Welcome to the
NINETY-SIXTH ANNUAL CONVENTION
OF THE
Western Psychological
ASSOCIATION

April 28 - May 1, 2016

AT THE
Long Beach Westin
Long Beach, California

The 96th meeting of the Western Psychological Association has:

The WPA Film Festival
Outstanding Invited Speakers
Special Programs for Students and Teachers
A Forum for Your Research

WESTERNPSYCH.ORG

HOSTED BY

CALIFORNIA STATE UNIVERSITY
FULLERTON™
Access to psychology literature and resources made simple

APA members and researchers across the behavioral sciences are discovering the quick and simple access solution that connects them to the essential psychology resources they need. Through a variety of APA PsycNET® subscription options, you too can access the most comprehensive set of psychology and behavioral science databases and explore the vast amount of literature and research to stay up-to-date in your field:

Explore the latest full text APA-published journal articles

Download the newest book chapters from an extensive library of behavioral science titles

Discover thousands of tests and measurement instruments for use in research and education

Access options for viewing exclusive, unscripted psychotherapy videos

And more

VISIT: www.apa.org/pubs/databases/individuals
to learn what access option is right for you.
WPA Thanks the Following Exhibitors

April 30th 6:30am
Free for all WPA attendees!
Starting point: Jogging path on Alamitos beach at the base of Shoreline Dr.
Parking available on Ylber off Shoreline Dr.
Dear 2016 WPA Conference Attendees:

On behalf of the faculty, staff and students of California State University, Fullerton, I am delighted to welcome you to the 96th Annual Western Psychological Association Conference. We are honored to serve as the host institution of this renowned gathering that brings together the top researchers in psychology.

As you know, many academic disciplines engage in research in psychological areas. Case in point, Cal State Fullerton sends several faculty members and students from the Department of Psychology and the Department of Child and Adolescent Studies to present at the WPA convention every year. This speaks to our ongoing aspiration to ensure our University is a place where cross-college collaboration and diverse groups of faculty and students come together to add depth to the human experience. Today, we are proud to share that spirit with universities around the country and look forward to learning from our esteemed colleagues whose work, research and aspirations align with our own.

California State University, Fullerton is a diverse, student-centered academic community ranked first in California and fifth in the United States in awarding bachelor’s degrees to Hispanics, as well as fifth in the nation in graduating students of color. More than a quarter million Titans have graduated from the University, and today, 55% of our nearly 39,000 students are the first in their family to attend college, making our impact substantial and our responsibility great. Ours is a community of high academic standards, stellar student support services, and one that respects and embraces all who come here. It is my hope this conference leaves with this same welcoming spirit and inspires you to visit campus in person in the near future!

I would like to acknowledge the efforts of the WPA Executive Board Members, the Convention Program Chair Dr. Melinda Blackman, the Chair of the Department of Psychology Dr. Eriko Self, and the Chair of the Department of Child and Adolescent Studies Dr. Katherine Bono for making this event possible.

Best wishes for an outstanding convention.

Sincerely,
Mildred Garcia
IMPROVING LIVES AND RELATIONSHIPS

Applying relational and individual centered approaches to inform clinical and research activities

Small classes | Dedicated faculty and staff
State-of-the-art facilities and technology

- MS in Counseling Psychology (MFT)
  Clinical Therapy Training
- MS in Clinical Psychology
  Emphasizing Research
- PsyD in Clinical Psychology
  Integrating Practice and Research
- Community Counseling Centers
  Oxnard and Westlake Village
- Hands-on training environment

Our PsyD Program is accredited by the American Psychological Association

WHAT WENT WRONG? CAMPUS UNREST, POLITICAL DIVERSITY, AND FREEDOM OF SPEECH
Program Book Activity Descriptions

The WPA convention program book lists and briefly describes every activity at the convention. The convention activities and presentations include Invited Speaker Addresses, Symposia, Poster Sessions, Paper Sessions, Presidential Address, Receptions, Film Festival, and Exhibits.

**WPA Speakers:** Each year distinguished psychologists are invited to give presentations at WPA. This gives everyone an opportunity to hear the latest research findings and theoretical ideas from leading researchers. All convention attendees are welcome at the talks by the speakers. Also, conversation hours with students will be scheduled for some of the speakers.

**Poster Session:** In a poster session, 30 or more presenters display the highlights of their research studies as posters mounted on bulletin boards. Presenters stand by their posters as attendees stroll along the rows, reading the posters and discussing them with the presenters. These sessions give you the chance to meet active research psychologists and ask questions and discuss findings. Each presenter welcomes your interest and questions no matter who you are. This is also a good opportunity to find out about graduate and undergraduate programs at other colleges and universities from the presenting professors and their students. Don't be shy!

**Symposium and Panel Sessions:** Two or more authorities in an area of make brief presentation. After the presentations, there is usually time for commentary and discussion.

**Paper Session:** Each presenter in a paper session delivers a brief talk. Four or five papers are scheduled per session. After each paper is presented, or at the end of a session, the audience is given an opportunity to ask questions.

**Film Festival:** The Film Festival showcases new films that span all areas of psychology. The films are organized by content so that related films show consecutively.

**Exhibitors:** During the convention, publishers, universities, psychology organizations such as Psi Chi and the American Psychological Association, and companies that have psychology-related merchandise and research tools are located in the same large ballroom where poster presentations occur. Here you can browse through the latest books, see demonstrations of lab equipment, talk with universities about their graduate programs. Be sure to stop in the booths that interest you and chat with the representatives. They appreciate your interest.

**Receptions:** Everyone is invited to receptions on Thursday and Friday.

WPA 2015 is our new Conference App. This FREE resource will be an online convention program that will place the entire conference at your fingertips and help you to get the most out of your WPA experience. The app will be available before, during, and after the conference.

**Why should I use the app?**
- Browse session schedule
- Browse special events and film schedules
- Create your own personal schedule
- Stay up to date with conference announcements
- Learn about exhibitors
- New and updated information added daily!
- Download files provided by speakers
- Search the conference program

**What devices can I use?**
- Laptop or desktop computer
- iPhones, iPads or Android phones/tablets
- Any mobile device with a browser

**How can I get the app?**
- Using you computer or mobile device, simply visit http://eventmobi.com/wpa2015
- You can also get the app by scanning this QR code with your smart phone.
- There is no need to visit the app store.

How do I save this app in my phone? After opening the wpa2015 app on your phone or tablet, you may save the link as an icon on your home screen.

IMPORTANT: The menu has a button for Refresh App. You need to use the refresh button when you have a wifi connection in order to update the information on your app. For more information, visit http://support.eventmobi.com/customer/portal/articles/1092879-how-do-i-use-the-app-

PROGRAM PLANNING AND ORGANIZATION

THE PROGRAM COMMITTEE
The primary function of the Program Chairperson is to plan and organize the invited portions of the program. This is a complex and demanding process that starts almost two years before a given convention and one that assures an attractive and diversified program. This year, Melinda Blackman accepted the challenge of serving as the Program Chair for the convention. Together with Dr. Blackman and WPA President Howard Friedman, they arranged a splendid program that will provide each of us with an excellent and memorable convention. We thank them for their outstanding contributions to our association.

TEACHING AND STUDENT EVENTS
In coordinating the planning and the organization of the Teaching and Student Events that enrich our program each year, we have had the opportunity and the pleasure of working with a number of dedicated people who are responsible for the excellence of this dimension of our program.

Special thanks go to the following people whose creativity, resourcefulness, and dedication to the teaching/learning process led to the development of outstanding program events of special interest to psychology teachers and students.

Kris Leppien-Christensen
Termin Teaching Conference

Heidi Riggio
Society for the Teaching of Psychology (STP)

Ethan McCahan
Psi Chi, The International Honor Society in Psychology

Vivian McCann
Psychology Teachers at Community Colleges (PT@CC)

Kimberley Duff and Kris Leppien-Christensen
Psi Beta
The Teaching and Student Events at our annual convention receive needed financial support from several groups. Their generosity contributes substantially to the sustained high quality of these events. We thank the following groups for their help in enhancing the excellence of our convention with their financial support.

American Psychological Association
 APA Education Directorate
 APA Science Directorate
 Palo Alto University
 Psi Chi, The International Honor Society in Psychology

PROGRAM REVIEW COMMITTEE

Each of the submitted abstracts was read by two of the distinguished psychologists listed below, who consented to serve as members of the Program Review Committee for the Convention. Their independent reviews were the criteria used in selecting the papers, posters and symposia that are included in this program, and for the selection of the Western Psychological Foundation Student Scholarship Awards.

The members of the Program Review Committee are as follows:

WPA COUNCIL OF REPRESENTATIVES

Eighty-nine western universities and college campuses have designated a member (or members) of their faculty to serve as a member of the WPA Council of Representatives. Members of this group, in addition to their advisory role, act as liaison on their campus for WPA. In forming this group, which is chaired by Kimberly A. Barchard, the current Representative-at-Large, our aim was to strengthen communication and, in so doing, enhance the ability of WPA to meet its goals. If you do not see your university or college among those listed below and you wish to become involved, please contact the WPA office.

ARIZONA

Arizona State University, Delia S. Saenz
Glendale Community College, Ladonna Lewis
Mesa Community College, Ann Ewing
Northcentral University, Jeannine Klein
Northern Arizona University, Robert Horn and William Kolodinsky

CALIFORNIA

American Jewish University, Susan Kapitanoff
Azusa Pacific University, Priscilla Diaz
Bakersfield College, Ginger LeBlanc
California Baptist University, Anne-Marie Larsen
California Lutheran University, Marylie Gerson
College of the Canyons, Deanna Riveira
College of the Desert, Chris Jones-Cage
Cal Poly Pomona, Nicholas Von Glahn, Alejandro Morales and Lori Barker
Cal Poly San Luis Obispo, Debra Valencia-Laver and Laura Freberg
Cerritos College, Kimberly Duff
Chapman University, David Frederick
Claremont Graduate University, Dale Berger and Stewart Donaldson
Claremont McKenna College, Mark Costanzo, Ronald Riggio and Harvey Wichman
Crafton Hills College T.L. Brink
CSU Bakersfield, Anne Duran
CSU Channel Islands, Virgil Adams and Beatrice de Oca
CSU Chico, Lawrence Herringer
CSU Dominguez Hills, Mark Carrier and Carl Sneed
CSU East Bay, Marvin Lamb and Eleanor K. Levine
CSU Fresno, Robert Levine
CSU Fullerton, Melinda Blackman and Pamella Oliver
CSU Long Beach, Christopher Warren
CSU Los Angeles, Gaithri Ann Fernando
CSU Monterey Bay, Jill Yamashita and Jennifer Dyer-Seymour
CSU Northridge, Brennis Lucero-Wagoner, Jill Quilici, and Adele Eskeles Gottfried
CSU Sacramento, Kelly Cotter
CSU San Bernardino, Jodie Ullman
CSU San Marcos, Sharon Hamill and Heike Mahler

South Puget Sound Community College, Kathryn Thompson-Clancy
Tacoma Community College, Pamela Costa
The Evergreen State College, Carrie M. Margolin
University of Puget Sound, Sarah Moore
Washington State University, Donelle Posey
Western Washington University, Ira Hyman
Whitworth College, Patricia Bruininks
Based on a masked review of their abstracts, the Program Review Committee has selected the following students who were listed as first authors of their abstracts for the Western Psychological Foundation Scholarship Awards. Each of these outstanding students will receive their awards at the WPA Awards Presentation on Friday, at the Convention. Each student scholar will receive a cash award. The awards are made possible by the gifts of a substantial group of concerned WPA members who share the conviction that the development of excellence in research and scholarship among our student members is an important goal of our association.

The following names of the student first authors selected and their affiliations are:

David B Newman ..................... University of Southern California
Rhonda K. Rodgers ..................... Claremont Graduate University
Noe F. Tesillo ........................... University of California, Irvine
Sarah I. Ashley .............................. University of San Francisco
Julia C. Singleton. ............................ University of California, Davis
Austin Sleeper ............................. Point Loma Nazarene University
Bernajane M. Palisoc .............................. University of Nevada, Las Vegas
Krissy Ruiz ............................... California Baptist University
Andrew Budde ............................. Eastern Washington University
Meagan M. Suen ............................. California State University, Long Beach
Edwin J. Vazquez ............................ Humboldt State University

Robert L. Solso Research Awards
Ekarin E. Pongpipat, San Diego State University
Siyuan Huang, San Diego State University
Sandra Vazquez Salas, Arizona State University

Christina Maslach-Philip Zimbardo Research Awards in Social Psychology
Greysi Geraldine Vizcardo-Solis, California State University, Long Beach
Alison G. Tan, Loma Linda University

Gottfried WPA Student Research Award in Developmental Psychology
Duyan Trang, San Diego State University

Dr. Steven Ungerleider WPA Graduate Research Award
Cynthia Hartman, Arizona State University
Scott C. Fraser Student Research Award in Applied Psychology
Jessica Quintanilla. University of California, Irvine

Barbara Tabachnick Award for Outstanding Application of Quantitative Methods
Rosalyn G. Sandoval. California State University, Sacramento

Multivariate Software Award
Peter Bentler and Eric Wu, creators of EQS structural equation modeling software published by Multivariate Software, award a license for EQS along with a cash prize to a student who presents outstanding research at the WPA convention.
Nathan Echols, San Diego State University

REGISTRATION
The Convention is open to anyone who has paid the appropriate registration fee.

**Convention Registration Fees**
- WPA Professional Member: $90
- Professional Non-Member: $165
- Student: $90
- Non-Professional Spouse/Partner of Registrant (not for presenters or co-authors): $50
- One-Day Only (Student): $50
- One-Day Only (Professional): $75
- ½ Day Sunday Only (All Categories): $20

CONVERSATION HOURS
The WPA student representatives have scheduled conversation hours following some of the presentations. Please join your colleagues for stimulating discussions with our speakers. Thanks to Ryan Stoll for organizing the conversation hours.

CONVENTION POLICIES

**Identification Badges**
Identification badges will be available for those who have pre-registered at the registration booth upon arrival at the convention. Persons who choose to wait to register at the convention will receive a badge after they have paid their registration fee. We request that you wear your badge at all times because only persons who have registered for the convention will be admitted to any of the scheduled programs or activities.

**Additional Programs**
Additional copies of the program may be purchased for $5 until our limited supply of extra copies is exhausted.

**Smoking Policy**
Smoking is not permitted in the hotel
MESSAGES
A message board will be maintained near Convention Registration. Messages left on the WPA phone will be picked up (928-277-4660).

EXHIBITORS
Exhibits are located in the Exhibit Hall and will be open on Thursday, Friday, and Saturday. Our exhibitors provide substantial support for the convention, and the best way to say thank you is visit with them.

ADVERTISERS
Each advertisement is listed in the Table of Contents of this program.

FUTURE WPA CONVENTIONS
2017 Sacramento, California
April 27 - 30

2018 Portland, Oregon
April 26-29
2016
WPA FILM FESTIVAL
ALPHABETICAL DESCRIPTION OF FILMS

The following alphabetical listing gives a brief description and presentation time of each offering included in this year’s Film Festival. All films will be shown in the Melbourne Room. All information provided in the listing is for DVDs and does not include shipping charges, if any. All presentations will be shown in groups according to content area as indicated in the film schedule for each day (given at the beginning of each day’s activities within the daily program). Notably, a special Encore! Presentation of last year’s Film Festival winner will take place Saturday afternoon. Last year’s winning films are so noted in the alphabetical listing below. A more complete description of each film will be available for your inspection in the screening room, and free brochures also will be available for most of the films. The names and addresses of participating film distributors are provided immediately following the present listing.

A BAPTISM OF FIRE (52 mins)

**Friday 10:00 a.m.**

“As it gets harder to sell pictures, we take greater and greater risks,” explains Corentin Fohlen. A war correspondent still in his twenties, Fohlen is part of a new generation of freelance journalists who fly to war zones from Libya to Afghanistan on their own dime in the hope of selling images to news media outlets.

- Rental Price $150; Purchase Price $390

A BRAVE HEART: THE LIZZIE VELASQUEZ STORY (78 mins)

**Thursday 2:00 p.m.**

Born with a rare syndrome that prevents her from gaining weight, Elizabeth “Lizzie” Velasquez was first bullied as a child in school for looking different and, later online as a teenager when she discovered a YouTube video labeling her “The World’s Ugliest Woman.” The film chronicles details of Lizzie’s physical and emotional journey up to her multi-million viewed TEDx talk, and follows her pursuit from a motivational speaker to Capitol Hill as she lobbies for the first federal anti-bullying bill.

- Rental price $200 for universities; Purchase price $375 for universities
AMERICA 1979 (14 mins)

**THURSDAY 1:45 P.M.**

The Iran Hostage Crisis is in full effect, and even thought Regina’s parents are Iranian, she was raised to be American. When political tensions create problems for her in school, Regina’s confusion about her identity causes problems at home. The film is a springboard for discussion on topics such as bullying, xenophobia, sibling rivalry, forgiveness, family dynamics, and how politics affects the personal.

   Lila Yomtoob, self-distributed (2014; DVD, Blu-Ray).
   Rental Price TBD; Purchase Price $150 for educational use

AUTISM IN LOVE (75 mins)

**THURSDAY 9:30 A.M.**

A new highly acclaimed documentary that explores the experiences of four adults on the autism spectrum as they search for love and romance. Through multidimensional and nuanced storytelling, this educational documentary encourages all of us to challenge our assumptions and enriches our understanding of love.

GOOD DOCS (2015; DVD).

   Purchase Price Campus Screening License + DVD: $549;
   Digital Streaming License: $549; College & Universities DVD: $349;
   K-12, Public Library, Non-Profit DVD: $99; Community Screening: $179

BECAUSE I WAS A PAINTER (104 mins)

**SATURDAY 4:00 P.M.**

In 1945, when the Allies liberated the concentration camps, they discovered thousands of secretly created artworks. These drawings, hidden from the Nazis, offer an unparalleled understanding of life in the camps. Featuring interviews with surviving artists, this fascinating documentary considers the ability of art to capture, reflect and survive under unimaginable conditions.

   The Cinema Guild (2013, DVD). Rental Price: contact distributor;
   Purchase Price $195

CONSEQUENCES AND RECOVERY (42 mins)

**FRIDAY 11:45 A.M.**

This documentary includes interviews with adults whose addiction to marijuana has had long-lasting negative consequences on their health and happiness. Researchers discuss the damage THC can do to the brain, including alarming side effects like depression and psychosis.

   Rental Price n/a; Purchase Price $299
FACING FEAR (23 mins)

**THURSDAY 11:30 A.M.**

In this Academy Award-nominated short documentary, worlds collide when a former neo-Nazi skinhead and the gay victim of his hate crime attack meet by chance 25 years after the incident that dramatically shaped both of their lives. Together, they embark on a journey of forgiveness that challenges both to grapple with their beliefs and fears, eventually leading to an improbable collaboration... and friendship.

Rental Price $75; Purchase Price $195

FORGET ME NOT - LOSING MEMORY - FINDING LOVE (88 mins)

***WINNER OF THE 2015 WPA FILM FESTIVAL***

**SATURDAY 2:15 P.M.**

Filmmaker David Sieveking weaves an astonishingly candid, loving and revelatory chronicle of the changes his mother’s Alzheimer’s has on his family. Although dealing with his mother’s disease is painful, caring for her does offer Sieveking a chance to reconnect with his family and immerse himself in the secrets and passions of his parents’ long and fascinating lives. What emerges is a poignant and rich study of family ties and the unexpected rewards that come from living life to the fullest.

Bullfrog Films (2012; DVD). Rental Price $95; Purchase Price $295

FROM MIND TO BRAIN: THE HISTORY OF BRAIN AND COGNITIVE SCIENCES AT MIT (32 mins)

**THURSDAY 8:45 A.M.**

MIT’s Department of Brain and Cognitive Sciences evolved from the Department of Psychology founded by Prof. Hans-Lukas Teuber in the early 1960s and based on the revolutionary idea that the study of mind and brain are inseparable. As the field of neuroscience developed within medical schools and cognitive science developed within psychology departments, MIT kept them in the same department and sought to bridge levels of analysis between them. This film tells the stories of both fields through the eyes of distinguished professors who first came to MIT as students or junior researchers: Susumu Tonegawa, Emilio Bizzi,
The key to being able to treat a mental disorder is identifying it. In this program, Dr. Schwartz discusses the importance of accurate, evidence-based diagnosis. He begins by providing an overview of mental disorders.

Rental Price n/a; Purchase Price $299

Homecoming is a documentary film exploring how United States Marines experience Post Traumatic Stress Disorder. Using interviews with Marine combat veterans of OIF and OEF, the film takes viewers beyond the abstract concept of “PTSD” to reveal what it means to live with the memories of war after coming home. It invites the viewer to rethink the idea of Combat Post Traumatic Stress Disorder and their own responsibility to our men and women in the armed services.

Rental Price n/a; Purchase Price $200/universities & colleges

2015 Academy Award Nominee for Best Documentary Short Subject, Joanna is a tender and heartbreaking portrait of a young wife and mother facing terminal cancer who, wishing to leave something behind for her eight-year-old son, begins
writing an online journal that resonates with and becomes embraced by millions of devoted readers.

The Cinema Guild (2013, DVD). Rental Price: contact distributor; Purchase Price $350

LIMITED PARTNERSHIP (74 mins)
**Saturday 1:15 p.m.**

This award-winning documentary tells the poignant story of Richard Adams and his husband, Tony Sullivan, who in 1975, became one of the first same-sex couples to be legally married in the world. Limited Partnership recounts their 40-year struggle to stay together as it parallels the history of the LGBT marriage and immigration equality movements.

The Cinema Guild (2014, DVD). Rental Price: contact distributor; Purchase Price $395

MARIJUANA TODAY (35 mins)
**Friday 11:00 a.m.**

As marijuana legalization increases, and the medicinal benefits are being more widely discussed, it is important that the risks of marijuana use are not overlooked, particularly among children and adolescents. This video includes interviews with teens speaking about their experiences with marijuana addiction, to illustrate the very real problems associated with a drug whose reputation is more benign than its reality.

Microtraining Associates (2015; DVD). Rental Price n/a; Purchase Price $299

MASKS (35 mins)
**Thursday 10:45 a.m.**

Margot is a fabulous dresser who belts out tunes, interviews herself on TV, and dispenses safe-sex advice. Roxana is a Russian ex-patriot who is married to a Cuban fisherman and has a penchant for singing Russian songs while wearing opulent gowns. In the macho world of Cuban culture, Margot Parapar and Roxana Rojo stand out—they are two of the country’s best-known drag queens.

Icarus (2014; DVD). Rental Price $150; Purchase Price $298
**PAPER TIGERS** (102 mins)

**Friday 1:30 p.m.**

*Paper Tigers* follows a year in the life of an alternative high school that has radically changed its approach to disciplining its students, becoming a promising model for how to break the cycles of poverty, violence and disease that affect families.

*Tuugg Inc (2015; DVD, Blu-Ray).*

Rental price $250 for universities; Purchase price $350 for universities

---

**SCHOOL OF BABEL** (89 mins)

**Friday 3:15 p.m.**

Welcome to a one-of-a-kind Paris education program for immigrant children from around the globe. In her feature documentary debut, director Julie Bertuccelli (*SINCE OTAR LEFT, THE TREE*) follows one class of students ranging from 11 to 15 years of age as they begin life in a new land.

*Icarus (2013; DVD).* Rental Price $150; Purchase Price $348

---

**SEX, LIES & TABLOIDS!** (52 mins)

**Thursday 4:15 p.m.**

They’re lurid, obnoxious, disdainful and explicit. And we love them - and love to hate them. *Sex, Lies & Tabloids!* charts the rise and fall of tabloid papers in the UK and US, including the New York Post, The Sun, and notorious supermarket tabloids like the National Enquirer and The Star.

*Icarus (2015; DVD).* Rental Price $150; Purchase Price $390

---

**SHE’S BEAUTIFUL WHEN SHE’S ANGRY** (92 mins)

**Saturday 10:15 a.m.**

An essential documentary about the birth of the women’s liberation movement. Featuring never-before-seen archival footage and new interviews, *She’s Beautiful When She’s Angry* tells the story of one of the most important social movements of the 20th century, bringing to light the efforts of lesser-known activists and grassroots organizations from across the country who played a pivotal role in the struggle.

*The Cinema Guild (2014, DVD).*

Rental Price: contact distributor; Purchase Price $395
THE KILL TEAM (79 mins)
Friday 8:30 a.m.

*The Kill Team* goes behind closed doors to tell the riveting story of Specialist Adam Winfield, a 21-year-old infantryman in Afghanistan who attempted -- with the help of his father -- to alert the military to heinous war crimes his platoon was committing. With extraordinary access to the key individuals involved in the case, including Adam, his passionately supportive parents, and his startlingly candid compatriots, *The Kill Team* is an intimate look at the personal stories so often lost inside the larger coverage of the longest war in US history.

Bullfrog Films (2013; DVD). Rental Price $125; Purchase Price $350

THE LIFE & CRIMES OF DORIS PAYNE (72 mins)
Saturday 9:00 a.m.

A sensational portrait of a rebel who defied society’s prejudices and pinched her own version of the American Dream, *The Life and Crimes* of Doris Payne relates the fascinating story of how a poor, single, African-American mother from segregated West Virginia became the world’s most notorious jewel thief.

The Cinema Guild (2014; DVD). Rental Price: contact distributor; Purchase Price $350

THE RAISING OF AMERICA: EARLY CHILDHOOD AND THE FUTURE OF OUR NATION - SIGNATURE HOUR (58 mins)
Friday 12:30 p.m.

Learn how the growing squeeze on parents for time, money and resources can literally alter their young children’s developing brains. What are the consequences for the nation, and how might we better assure a strong start for all our children?

California Newsreel (2015; DVD). Rental Price n/a; Purchase Price $295 DVD + 3-year site/local streaming, $149 DVD only
What happens when a college psych study goes shockingly wrong? In this tense, psychological thriller based on the notorious true story, Billy Crudup stars as Stanford University professor Dr. Philip Zimbardo, who, in 1971, cast 24 student volunteers as prisoners and guards in a simulated jail to examine the source of abusive behavior in the prison system. The results astonished the world, as participants went from middle-class undergrads to drunk-with-power sadists and submissive victims in just a few days. Professor Phil Zimbardo will screen the recent film *The Stanford Prison Experiment* starring Billy Crudup as Dr. Zimbardo. The film won major awards at Sundance and has an 85% “fresh” rating on Rotten Tomatoes. The Rotten Tomatoes website description: “As chillingly thought-provoking as it is absorbing and well-acted, *The Stanford Prison Experiment* offers historical drama that packs a timelessly relevant punch.” Dr. Zimbardo will be joined by Dr. Christina Maslach (UC Berkeley) who was instrumental in stopping the study. They will leave plenty of time to discuss the film and answer audience questions.

IFC Films (2015; DVD).

TOUCHING MEMORY (11 mins)

*Touching Memory* is about an extraordinary therapeutic garden—the culmination of Dr. Santostefano’s lifelong efforts to incorporate the natural world into clinical practice. Despite ridicule and a lack of support, Dr. Santostefano always found a way to bring his patients outdoors so that they could “touch” their memories, and thereby initiate the healing process.

Iridescent Film (2015; DVD, Blu-Ray).

Rental Price $50; Purchase Price n/a

UNDER THE MANGO TREE (30 mins)

*Under the Mango Tree* is a story of survival and selflessness as the clinic staff struggles to continue their work with few resources.

Motorking Productions (2015; DVD).

Rental Price: Donation; Purchase Price: Donation
UNSLUT: A DOCUMENTARY FILM (40 mins)

Thursday 3:30 P.M.

Through the stories of five North American women and interviews with sexuality experts, advocates, and media figures, *UnSlut: A Documentary Film* explores the causes and devastating effects of sexual shaming and offers immediate and long-term goals for personal, local, and institutional solutions.

Tugg Inc (2015; DVD).
Rental price $295 for universities; Purchase price $350 for universities

WHAT OUR FATHERS DID: A NAZI LEGACY (92 mins)

Thursday 12:00 P.M.

A bracingly rigorous examination of inherited guilt and pain, *What Our Fathers Did* explores the relationship between Niklas Frank and Horst von Wächter, each of whom are the children of very high-ranking Nazi officials but possess starkly contrasting attitudes toward their fathers. Written and hosted by eminent human rights lawyer Philippe Sands, who became fascinated by its central figures while researching the Nuremberg trials, the film is a compelling examination of brutality, self-deception, guilt and the nature of justice.

Bullfrog Films (2015; DVD). Rental Price $95; Purchase Price $350
The Western Psychological Association would like to thank the following distributors for providing films for this year’s Convention. Questions about rental and sales should be sent to the appropriate distributor at the address below.

THE TWENTY-SECOND
LEWIS M. TERMAN TEACHING CONFERENCE

A FOCUS ON ASSESSMENT

Centennial C Ballroom

8:30 a.m.    Continental Breakfast
9:00 a.m.    Welcome and Introductions – Chris Cozby, WPA Executive Director, and J. Kris Leppien-Christensen, Terman Conference Chair
9:15 a.m.    The Nuts and Bolts of Highly Effective Teaching: Some More Thoughts
              Eugene Wong, California State University, San Bernardino

10:15 a.m.   Coffee Break
10:30 a.m.   Fostering Mega-Cognitive Dialogues in Psychology Courses through the Reading Apprenticeship Model
              Andrea Pantoja Garvey, American River College
11:30 a.m.  We Are Not Alverno College: Designing a Customized Assessment System for Closing the Loop at Any Institution
Sharon Hamill, California State University, San Marcos

12:30 p.m.  Lunch Break

1:15 p.m.  It's Time: Getting Serious about National Advocacy for Undergraduate Psychology Majors
R. Eric Landrum, Boise State University

2:15 p.m.  Intro Psych: What Are We Trying to Do?
Sue Frantz, Highline Community College

3:15 p.m.  Coffee Break

3:30 p.m.  Beyond Compliance – Making Student Learning Outcome Assessment More Useful
Jerry Rudman, Psi Beta Executive Director and Irvine Valley College

4:30 p.m.  A Quiet World: The Wonders of Hearing and Hearing Loss
David Myers

5:30 p.m.  Conference Closing and Evaluation – Diane S. Brown, Terman Conference Associate Chair

THE NUTS AND BOLTS OF HIGHLY EFFECTIVE TEACHING: SOME MORE THOUGHTS
Eugene Wong, California State University, San Bernardino

Our conversation will provide us with an opportunity talk about teaching within the context of story-telling. We learn so much when we hear stories! So, as teachers, “story-telling” in the classroom is integral in supporting student learning and engagement. We will consider what it means to tell a story in class and also explore some of the core components of highly effective teaching that you can adapt for your own classroom. We’ll also be able to look at what students find to be especially important in highly effective instructors and how that may be integrated with teaching practices to create optimal learning settings.
Eugene Wong is a developmental psychologist whose research focuses primarily on the academic experience of school-age through college-age students. Specifically, his interests are in understanding how students’ performance can be supported in the classroom. Additionally, Eugene conducts research that examines the efficacy of computer-assisted training programs in remediating working memory and attention weaknesses which directly impact academic
performance in the K-12 and university settings. Eugene has been recognized for his teaching at the University of Maine at Farmington and at CSU San Bernardino. Most recently he received the WPA Teaching Award.

FOSTERING MEGA-COGNITIVE DIALOGUES IN PSYCHOLOGY COURSES THROUGH THE READING APPRENTICESHIP MODEL
Andrea Pantoja Garvey, American River College

Vygotsky’s theory and socio-constructivist research of cognitive development have for many decades provided supporting evidence that learning occurs as students engage in social dialogues with one another and their instructors related to course-specific texts. The implementation of socio-constructivist principles into specific teaching practices continues to be challenging for many college professors who have to balance content-delivery with time constraints. The Reading Apprenticeship Model (Schoenbach, Greenleaf, & Murphy, 2012) helps translate socio-constructivist ideas into specific teaching routines. At the core of the Reading Apprenticeship Model is its emphasis on scaffolding meta-cognitive dialogues, fostering a culture of inquiry in the classroom. This presentation introduces the audience to some basic premises of the Reading Apprenticeship Model followed by a hands-on demonstration of specific teaching routines applied in a lower-division Child Psychology class.

Andrea Pantoja Garvey has been teaching full-time at American River College since 2003. Her teaching is primarily focused on transfer-level, lower division developmental psychology courses, both online and face-to-face. Prior to her employment at ARC, she was a full-time Psychology professor at CSU-Chico, teaching developmental psychology courses. She completed her undergraduate degree in developmental psychology in 1994 at the Federal University of Pernambuco, Brazil (country of origin), her master’s degree in developmental psychology in 1997 and her Ph.D. degree in developmental psychology in 2000, both at the University of Utah.

In addition to teaching at ARC, she is actively involved in the ARC Reading Apprenticeship Project, which involves providing training to faculty and staff on campus on the reading apprenticeship framework as well as conducting research on the effectiveness of reading apprenticeship teaching routines on student academic engagement, success and retention.

Andrea Pantoja Garvey also maintains a research program focusing on the application of dynamic systems theory to the developmental investigations of mother-infant interactions. Specifically, she examines change processes in the
mother-infant communication system with an emphasis on the study of positive emotions in relational contexts, using a longitudinal data set. Her undergraduate research assistants will be presenting a poster on the topic of individual differences in infant smiling this Thursday at the 11:30am session. She is also a faculty co-adviser for her campus Psi Beta club. Her Psi Beta students will also be presenting a poster on Friday, during the Psi Beta poster session.

WE ARE NOT ALVERNO COLLEGE: DESIGNING A CUSTOMIZED ASSESSMENT SYSTEM FOR CLOSING THE LOOP AT ANY INSTITUTION
Sharon Hamill, California State University, San Marcos

The assessment literature is replete with examples of how to collect assessment data to assess student learning. However, few resources are available on how best to disseminate and use the information to close the loop and make program improvements. Whereas “best practice” institutions such as Alverno College serve as exemplary models of this process, the systems developed at these institutions may not generalize to other campuses. Each campus has its own unique culture and politics, and they vary considerably in terms of the time and financial resources available to conduct meaningful assessments. Collectively, these factors make the development of a system for appropriate dissemination of information even more complex. Using Walvoord’s approach to diagramming an assessment structure, this presentation describes the diagnosis and redesign of an assessment system through a case study of a public institution. This presentation will provide a step-by-step approach to create a simple, meaningful and sustainable assessment system that can be adapted to specific campuses and their unique cultures.

Sharon B. Hamill received her BA from CSU Long Beach and her Ph.D. in Social Ecology from the University of California, Irvine in 1990. She joined the Psychology faculty at CSUSM in 1996 and was chair of the department from 2005 to 2008. She is currently a Professor of Developmental Psychology at CSUSM, the Faculty Director of the Institute for Palliative Care, and the Program Director for the new Child and Adolescent Development Program. Her research interests include the development of personal and social responsibility among adolescent and emerging adult caregivers, multi-generational families of Alzheimer’s Disease patients, and ethnic group differences in caregiving. Dr. Hamill was recently named the Harry E. Brakebill Distinguished Professor recipient for 2015-2016. Sharon’s interest in how to promote positive development in adolescents and emerging adults has been life-long. However, her interest in the scholarship of teaching and learning developed over the past 25 years; she likes to credit her 3 sons for teaching her that it is much more important to focus on what students
are learning than what she is saying. Sharon has served as the Accreditation Liaison Officer (ALO), the Director of Academic Assessment, and the General Education Assessment Coordinator at CSUSM. She currently chairs the Core Competencies Team and works extensively with CSUSM’s instructional development team to provide training in assessment to campus faculty. She graduated from the WASC Assessment Leadership Academy, Cohort IV, and currently serves as a reviewer for WASC.

IT’S TIME: GETTING SERIOUS ABOUT NATIONAL ADVOCACY FOR UNDERGRADUATE PSYCHOLOGY MAJORS
R. Eric Landrum, Boise State University

Majoring in psychology has been described as a double-edged sword; the skills acquired prepare students for numerous career opportunities, yet psychology graduates are not exclusively qualified for a particular career (unless graduate school is pursued). The popularity of the undergraduate psychology major makes it a frequent attack target by government leaders and aspiring politicians; unfortunately, psychology educators have no national data to refute the claims in a meaningful and persuasive way. If we care about the future of our discipline, it is now time to become serious about studying ourselves and the career paths of psychology baccalaureates.

R. Eric Landrum is a professor of psychology at Boise State University, receiving his PhD in cognitive psychology from Southern Illinois University-Carbondale. His research interests center on the educational conditions that best facilitate student success as well as the use of SoTL strategies to advance the efforts of scientist-educators. He has over 375 professional presentations at conferences and published over 25 books/book chapters, and has published over 75 professional articles in scholarly, peer-reviewed journals. He has worked with over 300 undergraduate research assistants and taught over 13,000 students in 23 years at Boise State. With the launch of a new APA journal in 2015—Scholarship of Teaching and Learning in Psychology—he serves as one of its inaugural co-editors. Eric served as Vice President for the Rocky Mountain region of Psi Chi (2000-2011). He is a fellow in APA’s Division Two (Society for the Teaching of Psychology or STP), served as STP secretary (2009-2011) and served as the 2014 STP President. Eric is currently the President-Elect of the Rocky Mountain Psychological Association.
INTRO PSYCH: WHAT ARE WE TRYING TO DO?
Sue Frantz, Highline Community College

In the Intro Psych course, we have students who will be future leaders and on-the-ground workers in politics, business, medicine, and technology. We have one term to tell them what they need to know about themselves and others. What do they need to know about psychology? What skills do we want them to develop? How do we know they have achieved that knowledge and those skills? And how do we know if they retain them after the course is over? These and other questions will be addressed.

Sue Frantz is working on her third decade in the college classroom at Highline College near Seattle. Throughout her career, she has been an early adopter of new technologies in which she saw pedagogical potential. In 2009, she founded her blog, Technology for Academics. The blog features both new tech tools and tips for using not-so-new tools effectively. She currently serves as Vice President for Resources for APA Division 2: Society for the Teaching of Psychology. In 2013, she was the inaugural recipient of the APA award for Excellence in the Scholarship of Teaching and Learning at a Two-Year College or Campus.

BEYOND COMPLIANCE – MAKING STUDENT LEARNING OUTCOME ASSESSMENT MORE USEFUL
Jerry Rudman, Psi Beta Executive Director and Irvine Valley College

Accountability to stakeholders requires that we assess what students are learning, use the findings to make improvements, and somehow share this publicly. The ACCJC/WASC assessment mandate from 14 years ago has led to a climate of compliance. We are “doing SLOs” but the process has not been particularly helpful or informative. Can we make assessment more useful? APA’s Learning Guidelines (2.0) can help us develop a relevant assessment program that provides departments and students with useful information, while satisfying our accreditors. Jerry Rudmann will introduce a comprehensive assessment process that aligns with APA Learning Guidelines (2.0), includes learning outcomes derived from coursework and co-curricular programs, and produces departmental and student level performance profiles.

Jerry Rudmann served on both APA task forces (Guidelines 1.0 and 2.0). His work history includes teaching psychology at Irvine Valley College, Human Factors
Engineering at Rockwell International, and Supervising Institutional Research at Coastline College. He currently co-advises a Psi Beta chapter, serves as Psi Beta’s Executive Director, and is President of the Association of College Honor Societies (ACHS).

A QUIET WORLD: THE WONDERS OF HEARING AND HEARING LOSS
David Myers

With audio and video demonstrations (available to Terman conferees), David Myers will explore the biology and psychology of hearing and hearing loss. He will also explore user-friendly assistive technologies that reflect “the human factor,” and will describe efforts to apply social psychological principles to the transformation of American listening.

David Myers’ vocation is doing and communicating psychological science. His avocation is supporting Americans with hearing loss, for which he has received awards from the American Academy of Audiology, the Hearing Loss Association of America, and the hearing industry. He represents Americans with hearing loss on the Advisory Council of NIH’s National Institute on Deafness and Other Communication Disorders.

SPECIAL PRESENTATION

10:30-11:30  OCEAN BALLROOM

MUNICH ’72 AND BEYOND

Presenter: Steven Ungerleider, Global Sports Development

Chair: Melinda Blackman, California State University, Fullerton

Synopsis
Dr. Ungerleider is the producer of the film MUNICH ’72 AND BEYOND. It’s the powerful story of a 43-year struggle for justice and recognition of the Munich Olympic Massacre - and it reveals shocking new details about this seminal terrorist event, and ultimate redemption with a memorial finally being built in Munich. Film highlights and discussion with Dr. Ungerleider will provide a unique and powerful experience with the audience.

PAPER SESSION

11:30-12:30 NAPLES

SOCIAL/PERSÖNÄLITY 1

11:30  IDENTITY UNCERTAINTY DYNAMICS IN SUPERORDINATE-SUBGROUP RELATIONSHIPS, Jiin Jung, Michael A. Hogg (Claremont Graduate University), Hoon-Seok Choi (Sungkyunkwan University) & Gary Lewis (University of York)

11:45  WHEN WE DON'T KNOW WHO WE ARE: THE EFFECTS OF ENTITATIVITY THREAT ON IDENTITY-UNCERTAINTY AND EXIT, Jiin Jung, Michael A. Hogg (Claremont Graduate University), Andrew Livingstone (University of Exeter) & Hoon-Seok Choi (Sungkyunkwan University)

12:00  INDEPENDENCE IN RELATIONAL SELF-CONSTRUAL AND IMPLICATIONS FOR WELL-BEING, Daniel Weidler (Northern Arizona University)

12:15  IMPLICIT PREJUDICE TOWARD TATTOOS: WHY IS IT SO DIFFICULT TO CONTROL? Colin A. Zestcott, Ariana Torrejon & Jeff Stone (University of Arizona)

WPA TEACHING AWARD ADDRESS

12:00-1:00 CENTENNIAL A

BEYOND THE CLASSROOM: PUTTING IT ALL TOGETHER IN A LABORATORY SETTING

Presenter: Terry Cronan, San Diego State University

Chair: Jennifer Trevitt, California State University, Fullerton

Synopsis

Having students work with faculty on research provides opportunities to practice many of the lessons learned in traditional classes. In the research/laboratory setting students get “hands on” experience on how to ask research questions, to develop methods to answer the questions, to work with people or animals to collect data, to solve problems as they occur in the research setting, to analyze the data, to determine the meaning of the data, and to develop the next steps in the research process. In the lab setting students get to see the faculty member
in roles other than the “teacher.” Students also learn that research is complex and often requires teamwork and multi-tasking. They develop relationships with their peers, as well as with more advanced students or postdoctoral fellows. This provides additional mentoring. There are also often opportunities to present the findings at professional conferences or to publish the findings in refereed journals. Laboratory settings combine many facets of the academic environment and provide professional development opportunities.

SYMPOSIUM
12:00-1:30 OCEAN BALLROOM

NEW DEVELOPMENTS IN LANGUAGE BROKERING RESEARCH AMONG LATINAS/OS

Chair: Alejandro Morales, California State Polytechnic University, Pomona

TRENDS AND GAPS IN LANGUAGE BROKERING RESEARCH, Juan Cedillo & Alejandro Morales (California State Polytechnic University, Pomona)

HOW TO GET IN AND THROUGH GRADUATE SCHOOL

Join us as Psychology Graduate Admissions Directors share what they are looking for in successful applicants. Current graduate students and faculty will also offer tips about navigating the application process and their time in graduate school.

STATISTICS WORKSHOP 1
12:30-2:30 CENTENNIAL C

APPLIED STATISTICAL POWER ANALYSIS

Presenter: Christopher L. Aberson, Humboldt State University

Chair: Jodie Ullman, California State University, San Bernardino

Synopsis
The recent replication crisis in psychology and related fields identifies low statistical power as one of several causes of replication failures. Many findings in our field come from studies with low power. When a study with low power produces significant results, it often represents an anomalous finding that fails to stand up to replication. In response to these issues, several outlets (e.g. Psychological Science, Social Psychological and Personality Science) adopted stringent policies regarding power. This workshop begins by addressing the consequences of low power then moves on to practical issues such as determining effect sizes for use in power analysis and how to report analyses in line with new criteria. Examples cover designs using t-tests, between subjects ANOVA, and multiple regression. A detailed handout provides code for conducting power analyses using SPSS and R and links to additional resources for other designs.

POSTER SESSION 4
12:45-1:45 CENTENNIAL B

SOCIAL/PERSONALITY 2
GENDER-RELATED ISSUES
CLINICAL PSYCHOLOGY 1

12:45 AGING AND NOTHINGNESS: GROUP THERAPEUTIC FACTORS WITH OLDER ADULTS, Marc Parker & Claudia Jacova (Pacific University)

1:00 EMDR PILLARS OF LIFE: COMPARATIVE ANALYSIS WITH THREE MAJOR THERAPIES, Trisha M. Kivisalu & Merle L. Canfield (Alliant International University)

1:15 EXAMINATION OF THE EFFECTS OF CHILD NEGLECT TYPE AND CASE STATUS ON SELF-REPORTING OF CHILD MALTREATMENT POTENTIAL IN MOTHERS REFERRED BY CHILD PROTECTIVE SERVICES FOR SUBSTANCE ABUSE, Christopher P. Plant, Jesse Scott, Marina Galante & Brad Donohue (University of Nevada, Las Vegas)

1:30 RELIABILITY GENERALIZATION OF THE SOCIAL PROVISIONS SCALE (SPS), Trisha M. Kivisalu, Chelsi King, Colleen E. Phillips & Siobhan K. O’Toole (CSPP - Alliant International University)

SYMPOSIUM

1:00-2:15 TOKYO/VANCOUVER

A NUANCED LOOK AT PARENTS’ EMOTIONAL EXPERIENCES: THE ROLE OF STRESS, GUILT, AND MENTALIZATION

Chair: Margaret L. Burkhart, Claremont Graduate University

IF FEELINGS COULD TALK: PARENTAL MENTALIZING, ATTACHMENT, AND PARENTING SATISFACTION, Margaret L. Burkhart (Claremont Graduate University), Jessica L. Borelli (Pomona College), Hannah F. TWINS REARED APART: A WORLD TOUR OF SOURCES, FINDINGS AND NEW CASES

Presenter: Nancy Segal, California State University, Fullerton

Chair: Pamella Oliver, California State University, Fullerton
Synopsis
Twins reared apart come in different varieties and from multiple sources. Some
countries maintain large systematically gathered twin registries, while others
include volunteer twin participants. This presentation reviews methods and
findings from existing reared-apart twin studies, with a focus on the Minnesota
Study of Twins Reared Apart and the ongoing Fullerton Study of Chinese Twins
Raised Apart and Together. Separated pairs raised in different countries (e.g.,
South Korea and the United States; South Korea and France; England and the
United States) are also being identified with greater frequency, largely owing
to the Internet. There is also a rare subset of switched-at-birth twins who
participated in the recent Colombian Twins Project (Segal & Montoya) and
in other case studies. Such inadvertent twin exchanges generate monozygotic
twins raised apart (MZAs) and their inverse, i.e., virtual twins (VTs) or same-
age unrelated siblings who share environments, but not genes. The research
significance of these unusual pairings with reference to factors underlying
individual differences in behavior will be considered. Film clips of twins meeting
for the first time will be presented.

AN UNFORGIVING RATIONALE AGAINST ORGANIZATIONAL DISHONESTY

Presenter: Robert Cialdini, Arizona State University

Chair: Howard S. Friedman, University of California, Riverside

Synopsis
Pragmatically-centered arguments against unethical organizational conduct are commonly based on the harmful consequences of detection. These arguments appear misguided, as individuals engaging in such conduct typically do not expect to be caught. We present a countervailing rationale grounded in the effects of unethicality on fundamental psychological processes that undermine organizational effectiveness through their impact on subsequent underperformance, turnover, and malfeasance. In two experiments, exposure to dishonest workgroup practices caused members to become immediately less able to perform a critical thinking task, more likely to seek to leave the group, and, among those choosing to remain with a dishonest group, more likely cheat their
group. A follow-up survey replicated these findings among currently employed individuals and revealed mediation of the effects through employees’ emotional distress.

Robert B. Cialdini is Regents’ Emeritus Professor of Psychology and Marketing at Arizona State University. He has been elected president of the Society of Personality and Social Psychology. He is the recipient of the Distinguished Scientific Achievement Award of the Society for Consumer Psychology, the Donald T. Campbell Award for Distinguished Contributions to Social Psychology, the (inaugural) Peitho Award for Distinguished Contributions to the Science of Social Influence, and the Distinguished Scientist Award of the Society of Experimental Social Psychology. Professor Cialdini’s book Influence: Science and Practice, which was the result of a three-year program of study into the reasons that people comply with requests in everyday settings, has sold over three million copies while appearing in numerous editions and 30 languages.

FILM: “THE STANFORD PRISON EXPERIMENT”

Presenter: Phillip Zimbardo, Stanford University

Chair: Scott C. Fraser, Applied Research Associates

Synopsis
Professor Phil Zimbardo will screen the recent film The Stanford Prison Experiment starring Billy Crudup as Dr. Zimbardo. The film won major awards at Sundance and has an 85% “fresh” rating on Rotten Tomatoes. The Rotten Tomatoes website description: “As chillingly thought-provoking as it is absorbing and well-acted, The Stanford Prison Experiment offers historical drama that packs a timelessly relevant punch.” Dr. Zimbardo will be joined by Dr. Christina Maslach (UC Berkeley) who was instrumental in stopping the study. They will leave plenty of time to discuss the film and answer audience questions.

Philip Zimbardo is Emeritus Professor at Stanford University and Palo Alto University and past president of the American Psychological Association and the Western Psychological Association. He is internationally recognized as the ‘voice and face of contemporary American psychology through his widely seen PBS-TV series, Discovering Psychology, his classic research, The Stanford Prison Experiment, authoring the oldest current textbook in psychology, Psychology and Life, going into its 19th Edition, and his popular trade books on Shyness in adults and in children; Shyness: What it is, what to do about it, and The Shy Child.
Zimbardo co-authored The Time Paradox, a new view of how time perspective influences our decisions and actions. His latest book, with Nikita Coulombe and published this April, is Man, Interrupted: Why Young Men are Struggling & What We Can Do About It. Zimbardo has scheduled a WPA book signing for Saturday.

APPLIED MISSING DATA ANALYSIS

Presenter: Craig Enders, University of California, Los Angeles

There have been substantial methodological advances in the area of missing data analyses during the last 25 years. Methodologists currently regard maximum likelihood estimation (ML) and multiple imputation (MI) as two state of the art missing data handling procedures. The purpose of this workshop is to familiarize participants with ML and MI and to demonstrate the use of these techniques in popular software packages. The workshop content will be accessible to researchers with a foundation in multiple regression.

MINORITY STATUS AND ACADEMIC ACHIEVEMENT IN COLLEGE: THREAT AND REJECTION

Presenter: Rodolfo Mendoza-Denton, University of California, Berkeley

A growing body of research documents how experiences of threat and rejection are pervasive for racial/ethnic minorities, lower-income students, and women in many college environments. In this talk, I will share some of my lab’s contributions to this body of work. Harnessing experimental and longitudinal methodologies, I will mainly draw on my lab’s work on status-based rejection sensitivity, a contextually-activated disposition to anxiously expect rejection on the basis of a marginalized group membership (e.g., race, social class, gender). I will discuss research showing how status-based RS interacts with a number of other intrapersonal (e.g., entity theories), interpersonal (e.g., cross-race friendships) and contextual (e.g., room decor) variables to provide an emerging
picture of how the threat of group-based rejection can affect stable processing dynamics as well as “get under the skin,” but also be shifted depending on contextual variables.

PT@CC INNOVATIVE TEACHING SESSION
9:00-10:30 BARCELONA/CASABLANCA

TEACHING TAKE OUTS

Chair: Vivian McCann

Synopsis
This popular annual session offers cutting-edge teaching ideas, engaging activities, and provocative demonstrations you can take out” of the conference for immediate use in your own classrooms. This year, we offer take-outs focused on helping students overcome the temptations of multitasking, a creative new Infographics assignment that meets a variety of the APA Guidelines for the Undergraduate Psychology Major, and an engaging new technique for building effective classroom groups.

Presenters
Psychology Saves the Day! Eric Kim (Lane Community College) American culture encourages the myth of multitasking, and our students are living, breathing examples. Reducing multitasking, however, can promote a plethora of positive changes—better memory, better relationships, receiving more help, and fewer accidents and mistakes.

Demonstrating Psychological Literacy Using Infographics, Jaye Van Kirk (San Diego Mesa College) Infographics offer a unique opportunity for students to critically evaluate scientific information, and to collaborate on ways to creatively communicate that information to non-scientific audiences in a clear, concise, and visual format. In doing so, students engage in critical thinking, problem solving, communication, team collaboration.

Speed Teaming: A Modern Method for Creating Groups, Inna Kanevsky (San Diego Mesa College) Most research methods courses -- and many other courses in psychology-- rely on the student-dreaded group research projects. I will present to you a method for creating groups based on the speed dating approach, which will allow students to be more invested in their group creation, and more compatible with their collaborators.

PSI CHI DISTINGUISHED SPEAKER
THE SCIENCE OF INSIDE OUT
10:00-11:00 CENTENNIAL A

Presenter: Dacher Keltner, University of California, Berkeley
Chair: Ethan A. McMahan, Western Oregon University

Synopsis
In this talk I will detail the some of the science based insights that led to elements of the film, “Inside Out.” I will focus in particular on four themes: that people are their emotions; that emotions guide our thought and memory; that emotions shape our social interactions; and that the good life requires a mixture of many emotions, both negative and positive.

Biography
Dacher Keltner is a full professor at UC Berkeley and director of the Berkeley Social Interaction Lab (http://socrates.berkeley.edu/~keltner/) and faculty director of the Greater Good Science Center (http://greatergood.berkeley.edu). Dacher’s research focuses the biological and evolutionary origins of compassion, awe, love, and beauty, emotional expression, and power, social class, and inequality. Dacher is the co-author of two textbooks, as well as the best-selling Born to Be Good: The Science of a Meaningful Life, and The Compassionate Instinct. Dacher has published over 190 scientific articles, he has written for the New York Times Magazine, The Wall Street Journal, The London Times, and Utne Reader, and has received numerous national prizes and grants for his research. He served as a consultant for Pixar’s Inside Out, has worked at Facebook and Google on emotion-related projects, and WIRED magazine recently rated Dacher’s podcasts from his course Emotion as one of the five best educational downloads, and the Utne Reader selected Dacher for one of its 50 2008 visionaries.

CHALLENGES AND OPPORTUNITIES IN TEACHING
INTRODUCTORY PSYCHOLOGY: A CONVERSATION WITH TEXTBOOK AUTHORS

Chairs: R. Eric Landrum, Boise State University and Sue Frantz, Highline College

Synopsis
During this conversation with successful introductory psychology textbook authors, we start with these two questions: 1. If you could change one thing about introductory psychology (the course, the textbooks, the marketing, etc.), what would that be, and why? 2. Five years from now you encounter someone (psych major or non-major) who had taken an Intro Psych course where the instructor used your textbook. What do you hope students remember or took away from your book? This panel presentation allows for open interactions between panelists and audience members.
Panelists
Laura Freberg, California Polytechnic State University
Laura Freberg is Professor of Psychology at California Polytechnic State University, San Luis Obispo, where she teaches courses in Introductory Psychology, Biological Psychology, and Sensation and Perception. She also serves as an adjunct instructor for Argosy University Online, teaching courses in Statistics, Research Methods, Writing in Psychology, Sensation and Perception, Social Psychology, and Cognitive Psychology. She was recently appointed to the Council of Representatives for WPA. Freberg enjoys incorporating novel technologies, such as Google Glass, into the classroom, and she has maintained a psychology blog since 2006. Her current research interests focus on subjective first impressions of persons and situations using q-methodology.

Susan Nolan, Seton Hall University
Susan A. Nolan is a Professor of Psychology at Seton Hall University in New Jersey. She earned her Ph.D. at Northwestern University. Susan conducts research on interpersonal consequences of mental illness and the role of gender in STEM careers, the latter funded in part by the National Science Foundation. She is the Vice President of Diversity and International Relations of the Society for the Teaching of Psychology, and is Past President of the Eastern Psychological Association (EPA). She is a Fellow of EPA, APA, and APS. Susan is a 2015-2016 U.S. Fulbright Scholar, where she conducted research on the assessment of psychology education in Bosnia and Herzegovina.

Greg Feist, San José State University
Gregory J. Feist currently is Professor of Psychology in Personality at San José State University and Director of the MA Program in Research and Experimental Psychology. He has also taught at the College of William & Mary and the University of California at Davis. He received his PhD in 1991 from the University of California at Berkeley and his undergraduate degree in 1985 from the University of Massachusetts-Amherst. One major focus of his research is establishing the psychology of science as a healthy and independent study of science, along the lines of the history, philosophy, and sociology of science. A second major focus is the identification and development of scientific talent, as seen in finalists of the Westinghouse and Intel Science Talent Search. Feist is former President of APA's Division 10. His teaching efforts have been recognized by outstanding teaching awards at both UC Berkeley and UC Davis.

David Myers, Hope College
Hope College social psychologist David Myers is a communicator of psychological science to college students and the general public. His scientific writings, supported by National Science Foundation fellowships and grants, have appeared in three dozen academic periodicals. He has digested psychological
research for the public through articles in four dozen magazines and through seventeen books. He is also an advocate for Americans with hearing loss, whom he represents on the Advisory Council of NIH’s National Institute on Deafness and Other Hearing Disorders, and through articles and a website (www.hearingloop.org) that promote a more user-friendly hearing technology in public venues.

Noland White, Georgia College
Noland White is a Professor of Psychology at Georgia College in Milledgeville, GA. He joined the faculty in 2001, after receiving his Ph.D. in Counseling Psychology from The University of Tennessee. He currently teaches courses in Introductory Psychology, Psychology of Adjustment, Behavioral Neuroscience, Advanced Behavioral Neuroscience, Senior Seminar, Clinical and Counseling Psychology, and leads a section of Advanced Research Methods with an emphasis in psychophysiology. He and his students are engaged in ongoing research of psychophysiological characteristics and neuropsychological performance of adults with and without ADHD.

10:30-11:30 OCEAN BALLROOM

ADVANCES IN THE CULTURALLY COMPETENT ASSESSMENT AND MANAGEMENT OF SUICIDE

Presenter: Joyce Chu, Palo Alto University

Chair: Joshua Swift, Idaho State University

Synopsis
Despite evidence that cultural factors impact the development and experience of suicidal ideation and behaviors, clinical practice and research related to suicide prevention, assessment, and management have been lacking in systematic inclusion of cultural competency considerations. This presentation will provide an overview of advances in the culturally competent assessment and management of suicide, providing basic and applied recommendations that can be utilized by psychologists to transform the field of suicidology for diverse ethnic minority and LGBTQ populations.

MODERN CULTURE AND INDIVIDUALISM: HAS SELF-FOCUS MADE US BETTER OR WORSE?

Presenter: Jean Twenge, San Diego State University

Chair: Lisa Mori, California State University, Fullerton

Synopsis
We all know that American culture is different than it was 50 or 100 years ago. But how is it different? And what has caused these changes? Based on data from 11 million Americans, most from nationally representative samples, I conclude that almost all generational and time period differences can be traced to a single factor: The growth of individualism, or an increased emphasis on the rights of the individual over the rules of society. Increasing individualism underlies increases in positive self-views, equality, and acceptance of premarital sex, as well as decreases in religious participation and belief, civic engagement, and confidence in institutions. Thus, each generation is more individualistic than the one before it (Millennials, GenX, Boomers, Silent). Modern individualism is a trade-off: It results in freedom and equality, but may compromise relationships and social life. As a result, it seems to lead to more happiness for young people and less happiness for mature adults.

APPLIED, FORENSIC/LEGAL, INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY
Synopsis
Folk wisdom and a variety of religious texts emphasize that our actions are important—they advise that it is more blessed to give than to receive, that actions speak louder than words, and ask what of us will echo in the future. Many studies also link religiosity/spirituality to mental and physical health outcomes (e.g., Koenig, 2012) with three probable paths typically identified: emotional, social, and behavioral. Behavioral explanations generally focus on health-behaviors such as lower rates of smoking and drinking; social explanations tend to highlight social support/integration; and emotional explanations center on individual, internal coping styles. Although overlap amongst these three areas is recognized, one’s actions of engagement are relevant to each of the three areas, and are deserving of particular attention. A large body of literature now exists to support the idea that volunteer activities not only provide a social benefit, but are also meaningfully linked to one’s own health and well-being, including greater life satisfaction, better physical functioning, lower levels of depression, and even lower mortality risk (e.g., Lum & Lightfoot, 2005; Pillemer et al., 2010; Thoits & Hewitt, 2001).

SPEED RESEARCH SESSION 1
12:30-1:30 CENTENNIAL C

Calling all undergraduate and graduate students.....
Have you ever wanted to sit down with a faculty member and pick their brain about research, graduate school or career advice? Well this event is for you!

Come meet The WPA Fellows who will discuss their research (e.g. developmental, I/O, health, legal, clinical, etc...) and answer questions in small groups with 3-4 students for 10-minute intervals at WPA. After 10 minutes, students will rotate to another Fellow. This format will allow for about 5 rotations so that students can meet with several faculty members.

Sign up for one or both sessions at http://wpa.memberlodge.com/event-2182504.

ACADEMIC CAREER WORKSHOP
12:30-1:45 TOKYO/VANCOUVER

ENTERING THE ACADEMIC MARKETPLACE: ADVICE FROM EXPERTS

Chair: Sharon Hamill, California State University San Marcos

Synopsis
What is the “right” academic job, and what does it take to land it? This workshop is designed for aspiring academics who are currently graduate students and postdocs. Five questions and others regarding the professoriate will be discussed. Expert panelists will share their insights, with plenty of opportunity for discussion.

Panelists
Joyce Chu, Palo Alto University
Pete Ditto, University of California, Irvine
Jessica Henderson Daniel, Harvard Medical School, Boston Children’s Hospital
Will Dunlop, University of California, Riverside
Noland White, Georgia College

Sponsored by the American Psychological Association Science Directorate
THE HOW, WHAT, AND WHY OF HAPPINESS: THE SCIENCE OF INTERVENTIONS AIMED AT INCREASING WELL-BEING

Presenter: Sonja Lyubomirsky, University of California, Riverside

Chair: Lisa Mori, California State University, Fullerton

Happiness not only feels good; it is good. Happy people have more stable marriages, superior health, and higher incomes. Fortunately, experiments have shown that people can intentionally increase their happiness. In this presentation, Lyubomirsky will draw on her two decades of research with thousands of participants to introduce a program to boost health, productivity, and happiness in our day-to-day lives. To this end, Lyubomirsky will introduce the positive activity model, which explains when and why such practices as gratitude, kindness, or savoring work “best.” In sum, this presentation will present new research on how small and simple activities can transform people into happier and more flourishing individuals. Her findings have significant implications for increasing happiness in the workplace, as well as in other life domains and settings.

MEANING-MAKING AND ADJUSTMENT TO STRESSFUL LIFE EVENTS

Presenter: Jason Holland, University of Nevada, Las Vegas

Chair: Sawssan Ahmed, California State University, Fullerton

A number of studies have now shown that the ability to make some benign or positive meaning of a stressful life event is one of the strongest predictors of adjustment following a range of difficult life stressors. In this presentation, research on the role of meaning-making will be discussed in a variety of contexts, including among bereaved individuals, combat Veterans, and older adults who have experienced a range of late-life transitions. Implications of these findings for clinical practice and future research will be discussed, focusing particularly on
the potential of a cognitive-constructivist approach for working with individuals dealing with uncontrollable stressors and existential concerns.

Dr. Jason M. Holland is a licensed clinical psychologist and Assistant Professor at the University of Nevada, Las Vegas. He graduated with his doctorate in Clinical Psychology in 2008 from the University of Memphis and completed his internship at the Palo Alto VA (PAVA), specializing in geropsychology. Upon graduation, he worked as a postdoctoral fellow at PAVA and Stanford University. His program of research focuses on stressful late-life transitions, such as bereavement, caregiving, and coping with a debilitating illness. Holland has published more than 60 peer-reviewed articles on these topics and currently serves as the associate editor for Death Studies.

SLEEP SUPPORTS REST AND DIGEST... OF INFORMATION

Presenter: Sara Mednick, University of California, Riverside

Chair: Jessie Peissig, California State University, Fullerton

Synopsis

New memories need to be transformed into more stable representations or they will be forgotten. Just as there are many forms of memory, there are likely many routes whereby these recent memories can be consolidated. It is well established that sleep is one period optimized for consolidation. In my talk, I will address two questions. First, what is the nature of sleep-dependent consolidation in terms of critical electrophysiological events that determine successful memory retrieval? I will review our recent work using pharmacological interventions to explore the critical function for consolidation of individual sleep events and events that are coupled together. Second, what is the role of the autonomic nervous system in memory consolidation? Specifically, is the “rest and digest” function of the parasympathetic nervous system critical for sleep-dependent cognitive processes? For this question, I will discuss our recent data on heart rate variability during sleep and it’s relationship with memory improvement. In summary, I hope to illustrate a dynamic relationship that exists between the autonomic and central nervous system that facilitates the consolidation of recent experiences into long-term memories.

PERSPECTIVES OF THE FAMILY: WHO KNOWS BEST?
Chair: Kathleen Preston, California State University, Fullerton

Synopsis
How family members get along and support each other has proven important for psychological functioning and adjustment. However, individual family members may have varying perspectives on the nature of positive family relationships (PFR). The present research is based on a novel scale assessing PFR utilizing the unique aspects of modern measurement theory. In this symposium, presentations will address fundamental issues pertaining to how parents and children perceive the family and their meaning of these perceptions as they relate to a longitudinal network of psychological outcomes. Issues addressed include correspondence between parents’ and children’s perceptions, transactional pathways of these
perspectives from childhood through adolescence, how each perspective relates to psychological outcomes such as family conflict and cohesion, interactions, self-concept, educational outcomes, behavior problems, life satisfaction, and leadership. Additionally, variables that predict PFR such as temperament and personality will be addressed. This symposium should be of interest to both basic and applied researchers as well as practitioners and clinicians.

Presenters
INTRODUCTION TO THE ISSUES, Allen W. Gottfried (Fullerton Longitudinal Study)

MEASURING POSITIVE FAMILY RELATIONSHIPS IN CHILDREN AND PARENTS, Kathleen S. J. Preston (California State University, Fullerton)

HOW DO FAMILY MEMBERS PERCEIVE THE FAMILY? Jonathan Park (California State University, Fullerton)

2:00-3:30 TOKYO/VANCOUVER

REDUCING THE DURATION OF UNTREATED PSYCHOSIS THROUGH COMMUNITY EDUCATION

Chair: Steven R Lopez, University of Southern California

Spanish-speaking Latinos in the US are at high risk to delay seeking services for serious mental illness. In response, a 3-year Spanish language communication campaign has been launched to teach community residents to identify the
main symptoms of psychosis. The overall objective is to reduce the duration of untreated psychosis for persons with first-episode psychosis. We expect the intervention to result in improved psychosis literacy and earlier treatment seeking among the targeted community. This symposium will focus on recruitment strategies, psychosis literacy, and the assessment of a narrative film for the communication campaign.

RECRUITMENT OF LATINO PATIENTS WITH FIRST EPISODE PSYCHOSIS: FACILITATORS AND CHALLENGES, Mercedes Hernandez (University of Southern California), Richard Franco, Alex Kopelowicz (University of California, Los Angeles), Maria Hernandez (University of Southern California), Yesenia Mejia (University of North Carolina Greensboro), Concepcion Barrio & Steven Lopez (University of Southern California)

THE SCIENCE OF COMPASSION AND COOPERATION IN THE SERVICE OF THE GREATER GOOD

Presenter: Dacher Keltner, University of California at Berkeley

Chair: Ethan McMahan, Western Oregon University

Synopsis
In this talk I will detail latest advances in the scientific study of human goodness,
focusing on compassion, gratitude, and awe. This talk will detail the latest evolutionary thinking about these states, their neurophysiological underpinnings, and their social functions. I will then detail how this science has been used in informing Facebook design, reform of the criminal justice system, and approaches to human wellness in at risk populations (e.g., Veterans).

Biography
Dacher Keltner is a full professor at UC Berkeley and director of the Berkeley Social Interaction Lab (http://socrates.berkeley.edu/~keltner/) and faculty director of the Greater Good Science Center (http://greatergood.berkeley.edu). Dacher’s research focuses the biological and evolutionary origins of compassion, awe, love, and beauty, emotional expression, and power, social class, and inequality. Dacher is the co-author of two textbooks, as well as the best-selling Born to Be Good: The Science of a Meaningful Life, and The Compassionate Instinct. Dacher has published over 190 scientific articles, he has written for the New York Times Magazine, The Wall Street Journal, The London Times, and Utne Reader, and has received numerous national prizes and grants for his research. He served as a consultant for Pixar’s Inside Out, has worked at Facebook and Google on emotion-related projects, and WIRED magazine recently rated Dacher’s podcasts from his course Emotion as one of the five best educational downloads, and the Utne Reader selected Dacher for one of its 50 2008 visionaries. Dacher’s newest book, “The Power Paradox: How We Gain and Lose Influence” (Penguin Books), will be available in May.

SCIENTIFIC LITERACY IN INTRODUCTORY PSYCHOLOGY: A GLOBAL PERSPECTIVE

Presenter: Susan A. Nolan, Seton Hall University

Chair: Melinda Blackman, California State University, Fullerton

Synopsis
In our increasingly global world, psychology faculty members, students, and job-seeking graduates often explore opportunities across nations. Against this backdrop, a broad understanding of scientific literacy is an essential tool to international mobility and collaboration. A major goal of the introductory psychology course is to teach students to think like psychological scientists – to be appropriately skeptical about psychology-related claims. This goal is part of the American Psychological Association’s guidelines on the undergraduate
psychology major (APA, 2013), but it goes beyond the APA, increasingly pervading psychology higher education globally. In this talk, I will discuss how different systems and cultures approach scientific literacy in the psychology classroom, particularly in introductory courses. I will also examine what we in the U.S. can learn from abroad, and especially from the Bologna Process and the EuroPsy guidelines that can be embedded within it. Finally, I will explore how an international discussion of scientific literacy can inform how we approach our introductory classes.

Biography
Susan A. Nolan is a Professor of Psychology at Seton Hall University in New Jersey, and earned her Ph.D. at Northwestern University. Susan has conducted research on interpersonal consequences of mental illness and the role of gender in STEM careers, the latter funded in part by the National Science Foundation. Susan is coauthor (with Sandra Hockenbury and Don Hockenbury) of introductory psychology textbooks and (with Tom Heinzen) of statistics textbooks. Susan is Vice President of Diversity and International Relations of the Society for the Teaching of Psychology, a member of APA’s Committee on International Relations in Psychology, an Associate Editor of the international journal Psychology Learning and Teaching (PLAT), and Past President of the Eastern Psychological Association (EPA). She is a Fellow of EPA, APA, and APS. Susan is a 2015-2016 U.S. Fulbright Scholar, where she conducted research on the Bologna Process, including the assessment of psychology education, in Bosnia and Herzegovina.

SYMPOSIUM
2:30-3:30 BARCELONA/CASABLANCA

METAPHOR FRAMING OF SOCIAL ISSUES

Chair: Jeffery Mio, California State Polytechnic University, Pomona

Synopsis
This symposium will examine metaphorical framing of social issues. One area will be on framing support for issues of poverty and examining the degree to which a framing metaphor designed to resonate to those with conservative ideations will be effective in influencing them to support government programs to support those in poverty. The second area will frame people’s perceptions to accept that social group identity is an important source of identity beyond one’s unique experiences and also one’s connection to universal characteristics. Our final area will test the metaphor extension hypothesis using metaphors that arose during the first year of President Obama’s second term of office.
Presenters:
THE EXPERIENCE OF POVERTY IN TODAY'S COLLEGE STUDENTS, Jeffery Mio (California State Polytechnic University, Pomona)

2016 WPA AWARDS

Western Psychological Foundation Student Scholarships are awarded to WPA Student Members whose first-author presentations were judged to be highly meritorious by the Program Review Committee. The students listed below will receive a scholarship award. These scholarships are funded through generous contributions to the Student Scholarship Fund.

David B Newman, University of Southern California
Rhonda K. Rodgers, Claremont Graduate University
Noe F. Tesillo, University of California, Irvine
Sarah I. Ashley, University of San Francisco
Julia C. Singleton, University of California, Davis
Austin Sleeper, Point Loma Nazarene University
Bernajane M. Palisoc, University of Nevada, Las Vegas
Krissy Ruiz, California Baptist University
Andrew Budde, *Eastern Washington University*
Meagan M. Suen, *California State University, Long Beach*
Edwin J. Vazquez, *Humboldt State University*

**WPA SPECIAL AWARDS**

These special awards are funded by endowments created and supported by the individuals and institutions indicated in the titles of the awards.

**Robert L. Solso Research Awards**
Ekarin E. Pongpipat, *San Diego State University*
Siyuan Huang, *San Diego State University*
Sandra Vazquez Salas, *Arizona State University*

**Christina Maslach-Philip Zimbardo Research Awards in Social Psychology**
Greysi Geraldine Vizcardo-Solis, *California State University, Long Beach*
Alison G. Tan, *Loma Linda University*

**Gottfried WPA Student Research Award in Developmental Psychology**
Duyen Trang, *San Diego State University*

**Dr. Steven Ungerleider WPA Graduate Research Award**
Cynthia Hartman, *Arizona State University*

**Scott C. Fraser Student Research Award in Applied Psychology**
Jessica Quintanilla, *University of California, Irvine*

**Barbara Tabachnick Award for Outstanding Application of Quantitative Methods**
Rosalyn G. Sandoval, *California State University, Sacramento*

**Multivariate Software Award**
Peter Bentler and Eric Wu, creators of EQS structural equation modeling software published by Multivariate Software, award a license for EQS along with a cash prize to a student who presents outstanding research at the WPA convention.
Nathan Echols, *San Diego State University*.

The WPA Fellows and Awards Committee, chaired by Dale E. Berger (Claremont Graduate University), has made the following awards to recognize outstanding achievements of WPA members.
2016 WPA Lifetime Achievement Award
Robert Cialdini, Arizona State University

2016 WPA Outstanding Teaching Award
Heidi Rose Riggio, California State University, Los Angeles

2016 WPA Early Career Research Award
Cameron L. Neece, Loma Linda University

2016 WPA Outstanding Service Award
Anne Duran, California State University, Bakersfield

2016 WPA Social Responsibility Award
Roxane Cohen Silver, University of California, Irvine

2016 Enrico E. Jones Award in Clinical Psychology Research
Joshua Swift, Idaho State University

2016 WPA Fellows
Steven Regeser Lopez, University of Southern California
Rodolfo Mendoza-Denton, University of California, Berkeley
Radmila Prislin, San Diego State University
Heidi A. Wayment, Northern Arizona University
Eugene H. Wong, California State University, San Bernardino

2016 WPA PRESIDENTAL ADDRESS

HEALTHY MODELS: PATHWAYS TO THRIVING AND LONGEVITY

Presenter: Howard S. Friedman, University of California, Riverside
Chair: Jodie Ullman, CSU San Bernardino

Synopsis
Why do some people thrive well into old age while others falter, become ill or die young? In our Longevity Project, we have been studying the lives of 1,500 Americans who were first assessed as children in 1921. They have been followed and evaluated through every decade, some for over 90 years. Key elements of personality, social relations, and biopsychosocial behaviors move some individuals on a step-by-step path to health. A laid-back, worry-free life is not the secret. On the contrary, those who thrive are on pathways that keep them productive, active, educated, and involved in healthy ways with other people. The emerging findings
bust common myths and point to how to structure societies with children who will grow into persistent and dependable adults, who are socially-integrated and will live flourishing, long lives.

Biography
Howard S. Friedman is Distinguished Professor of Psychology at the University of California, Riverside, and the 96th President of the WPA. For his work on “changing how we think about the nature of health,” and on disease-prone and self-healing personalities (terms he coined), he received the career James McKeen Cattell Award from the APS, and the Outstanding Contributions to Health Psychology award from the APA. Devoted also to teaching, he has received most recently, the Elizabeth Hurlock Beckman prize, for “inspiring students to make a difference in the community.” He has also received UCR’s Distinguished Teaching Award, the UCR Award for Excellence in Undergraduate Mentoring, and the WPA Outstanding Teaching award. His book, The Longevity Project: Surprising Discoveries for Health and Long Life from the Landmark Eight-Decade Study (with Leslie Martin) has won worldwide recognition, including first place in the “Wellness” category in the Books for A Better Life awards. It was one of ten books on J. P. Morgan’s Annual Summer Recommended Reading List, and an Editor’s Pick by the journal Nature.

WPA WALK/RUN – SPECIAL SATURDAY EVENT

Join us on Saturday, April 30th on a Walk/Run on the beach in downtown Long Beach! Free for all WPA attendees.

We are walking or running along the beach path, starting at the base of Ylber Street, heading south. Because this is an “out and back” course you can walk/run as far as you like, but we will have representatives to let you know where to turn back for a 5k (3.2 mile) loop. Parking, including handicapped parking is available at the base of Ylber Street. You can find a map at the registration link below. Hope to see you there!

When: Saturday, April 30th; 6:30am start time
Where: The jogging path at the base of Ylber Street will be our starting point. But this is free form so come and explore the Long Beach coast for as long or little as you like.

Registration and map here:

UNDERSTANDING AND APPLYING MODERN ROBUST STATISTICAL METHODS

Presenter: Rand R. Wilcox, University of Southern California

During the last 50 years, three major insights have made it clear that conventional methods based on means, least squares regression and Pearson’s correlation can be highly misleading and can have relatively poor power under general conditions. These insights have to do with skewed distributions, outliers and heteroscedasticity (unequal variances). When dealing with regression, a fourth insight has to do with curvature. The more obvious strategies for dealing with these issues, based on standard training, are known to be relatively ineffective and in some cases technically unsound. At least six books describe more effective and technically correct techniques for dealing with known concerns. In effect, we have the technology to get a deeper, more accurate and more nuanced understanding of data. This workshop will cover the basics of modern robust methods with illustrations demonstrating their practical value.

PSI CHI SESSION: CAREER OPTIONS AND STRATEGIES FOR SUCCESS FOR ALL PSYCHOLOGY GRADUATES

Presenter: R. Eric Landrum, Boise State University

Psychology educators often present the getting a good job with your bachelor’s degree vs. going to graduate school in psychology as divergent routes. Although the destinations are different, the preparation and strategies for success for both routes are surprisingly similar. During this presentation, I highlight the similarities over the differences, and provide evidence-based arguments about how outside-of-class (i.e., high impact) practices are vital for all psychology graduates, regardless of the intended career path.

MORAL INTUITIONISM AND THE ILLUSION OF PUBLIC REASON

Presenter: Peter Ditto, University of California, Irvine

Chair: Laura Zettel-Watson, CSU Fullerton

Morality is something we feel more than think. This emerging view that judgments about right and wrong are grounded in emotion and intuition rather than principled reasoning has important implications for understanding political beliefs and behavior. In this talk, I present evidence that the differing moral intuitions of Liberals and Conservatives shape their reasoning in ways that lead each side to see their own moral vision as principled, logical, and effective and the other side’s vision as hypocritical, illogical, and counterproductive. Motivated
reasoning cloaks moral conflict in a veneer of public reason (Rawls, 1971) such that politicians and pundits make data-based arguments for preferred policy positions that are little more than moral justifications wrapped in factual clothing. I conclude that this tendency for people to confuse what they value with what they believe to be true is a key contributor to the corrosive political polarization that plagues contemporary American politics.

THE TAPESTRY OF DIFFERENCE: WEAVING COGNITION AND AFFECT INTO PSYCHOLOGY

Presenter: Jessica Henderson Daniel, Harvard Medical School, Boston Children's Hospital

Chair: Ethan A. McMahan, Western Oregon University

Learning about human differences includes cognition and affect. Providing a balance between the two as emotionally laden topics are raised can be a challenge. The presentation will include critical concepts that can guide one through learning about differences and provide inclusive and flexible lens to integrate an awareness and respect of those differences in practice, research and education.

The existence of multiple generations results in a nation of knowledge and ideas that can stretch back over 100 years. Managing the heterogeneity of knowledge, feelings and questions about current situations that are embedded in the past can be a challenge. No one has immunity from “the danger of a single story” based on limited experiences and knowledge. The participants will be taught history in the context of terms such as “stereotype threat,” “racial/ethnic micro-aggressions” and “implicit bias.” Theory meets the day to day lives of people who face and sometimes manage these three concepts. Psychology is a dynamic discipline that seeks knowledge about thoughts, affect and behaviors— their origins as well as consequences and possible interventions to promote change. Examining the tapestry will be one way to create pathways to understanding human differences.

THE FICTION OF MEMORY

Presenter: Elizabeth Loftus, University of California, Irvine
Chair: Heidi Rose Riggio, California State University, Los Angeles

Synopsis
People sometimes remember things that never happened, and my research explores how, when and why this happens. Sometimes the errors in memory are relatively small, as when people remember details of recent events differently than they really occurred. Sometimes the errors are large, as when people are led to remember entire events that did not occur to them, which we call “rich false memories.” False memories, like true ones, have repercussions, affecting later thoughts, intentions, and behaviors. We’ve discovered some easy ways to distort memory and to plant rich false memories. Even people with highly superior autobiographical memories are susceptible to contamination. We haven’t had much luck finding reliable methods for discriminating true from false memories. They can be as emotional, detailed, persistent, and confidently held as true ones.

Biography
Elizabeth Loftus is Distinguished Professor at the University of California, Irvine. She holds faculty positions in the Department of Psychology & Social Behavior; the Department of Criminology, Law & Society, and the School of Law. She received her Ph.D. in Psychology from Stanford University. Since then, she has published two dozen books and over 500 scientific articles. Her books have been translated into Dutch, French, German, Japanese, Chinese and other foreign languages.

Loftus’s research of the last several decades has focused on the malleability of human memory. She has been recognized for her research with seven honorary doctorates and election to the Royal Society of Edinburgh, the American Philosophical Society, and the National Academy of Sciences. These include the Scientific Freedom and Responsibility Award from the American Association for the Advancement of Science (for “the profound impact that her pioneering research on human memory has had on the administration of justice in the United States and abroad.”). In 2012, she received the University of California, Irvine Medal for “exceptional contributions to the vision, mission, and spirit of UC Irvine,” the highest honor the university bestows. In 2013, she received the Gold Medal Award for Lifetime Achievement in Science from the American Psychological Foundation. Loftus is past president of the Association
for Psychological Science, and was twice elected President of the Western Psychological Association.

COoping WITH LIFE’S PERSONAL AND COLLECTIVE TRAGEDIES

Presenter: Roxane Cohen Silver, University of California, Irvine

Chair:
At some point, most people encounter stressful events that can have a major impact on the course and direction of their lives. Decades of research have demonstrated that these traumatic experiences can have both acute and long-term mental and physical health consequences. This presentation will describe a program of research on coping with traumatic events, ranging from personal losses such as death of an infant and childhood sexual abuse to larger collective events such as natural disasters (earthquakes, firestorms) and man-made disasters (9/11 terrorist attacks, the 2013 Boston Marathon bombings). Widely held myths about the coping process will be juxtaposed against empirical evidence; hypotheses as to why mistaken assumptions about the coping process are maintained in the absence of supporting evidence will be considered. Predictors of individual and collective vulnerability versus resilience to traumas at an individual and community level will be reviewed. Finally, some theoretical, clinical, social, and policy implications of this program of research will be explored.

**PT@CC INVITED SYMPOSIUM**

**12:30-2:00 OCEAN BALLROOM**

**GIVING PSYCHOLOGY AWAY: BUILDING VIBRANT HERO NETWORKS FROM CLASSROOM TO COMMUNITY**

Chair: Vivian McCann, Portland Community College

Synopsis

Today’s students are mostly Millennials, and as a cohort they place a higher value on social consciousness than the two generations that preceded them. The Heroic Imagination Project (HIP), founded by Dr. Philip Zimbardo, appeals to that desire and offers practical tools for students to make a difference in their worlds in both large and small ways. HIP is built on the premise that heroism doesn’t require a cape or supernatural powers – on the contrary, we can all be everyday heroes, acting with more compassion and kindness, simply by overcoming the social forces that inhibit prosocial actions. HIP’s engaging workshops teach about the social psychological principles that create common barriers to effective action, and offer solutions that empower and motivate students to change their own behaviors to become Heroes-in-Training. In this panel, we will discuss a variety of ways we have integrated HIP’s lessons into our classrooms and communities, and offer suggestions you can use with your own students to build hero networks that make a difference.
Presenters
CAPES OPTIONAL: BUILDING HERO SQUADS TO CREATE EVERYDAY HEROES IN LOCAL SCHOOLS, Brian Detweiler-Bedell, Gemma Baumer, Eddie Tellez, Jackie Potter, and Willow Wood (Lewis & Clark College) and Vivian McCann, Heriberto Aguilar, Jason Flores, and Brandon Velasquez (Portland Community College)

Today’s students are eager to make a difference in the world, and crave opportunities to do so. Last year, we began a collaboration between Lewis & Clark College and Portland Community College that offers student interns a chance to have a positive impact on local at-risk high school students while simultaneously building their own skills as science educators, team collaborators, and workshop presenters. In doing so, we also build bridges from high school to community college to university in our city and community. We will outline our program, discuss what we’ve learned so far, and how you can adapt this promising model at your own campus. Our student interns will also talk about the ways the program has impacted each of them.

MY HEROIC IMAGINATION IN INTRO PSYCH, Brian Metcalf (Hawaii Pacific University)

In the Hawaiian language, Pohakea means “to bring forth light.” At Hawaii Pacific University, in coordination with our Pohakea* Heroic Imagination Project, I have begun incorporating “heroism” as a theme in my Introduction to Psychology class sections. In this session, I will briefly describe the weekly conversations we have about what heroism means to us and how we can become better “heroes in training.” For example, each week we identify one new member in our “League of Super Heroes,” organizations that do everyday heroics. Whenever possible, this is a local organization that ties in with the psychology topics being covered that week -- the Hawaiian Eye Foundation when we cover vision in sensation/perception, the Aloha Chapter of the Alzheimer’s Association when we cover memory, and so on. I share the work of the organization and alert students to volunteer, internship, and employment opportunities. We then pass the hat around and collect spare change to send off to that charity. To partially satisfy Gen Ed requirements for the class for enhancing oral and visual communication, each student is responsible for creating and giving a very open-ended 4-6 minute “My Heroic Imagination Presentation.” Options include giving their presentation in front of the class or creating a video to share their thoughts or experiences on heroism and what it means to them. I will discuss the overwhelmingly positive student reactions to these assignments, and offer examples to illustrate how you can adapt these ideas to your own classroom.
INSPIRING HOPE WITH HIP, Sonja Terdal Olshove (Northwestern Michigan College)

In Andrew Solomon’s TED Talk he states the antidote to depression is not happiness, but vitality and resilience. Happiness research supports this idea that genuine, long-lasting “happiness” comes from meaningful work and connection to others, and that the joys from the quick fixes promoted in pop-culture are fleeting. In my experience teaching Introduction to Psychology and Social Psychology, I have found that highlighting HOPE through social action and connection has been the most powerful motivator to student engagement. I will highlight some of the ways I incorporate these principles into my teaching, and demonstrate how the Heroic Imagination Project has inspired hope and engagement in my students (and myself!).

WHAT MAKES PEOPLE SUCCESSFUL? EARLY LIFE PREDICTORS OF ADULT SUCCESS

Presenters: Allen Gottfried, Fullerton Longitudinal Study and Ronald E. Riggio, Claremont McKenna College

Chair: Mitch Okada, California State University, Fullerton

What makes an adult successful? What are the trajectories toward success? We argue that it is a combination of well-being, positive psychological capital, educational attainment, and leadership achievements and potential. Using data from the Fullerton Longitudinal Study (FLS) – three-decades of research following individuals from infancy to adulthood – we will explore how early life experiences and behavioral characteristics predict positive outcomes in adults. We will see that adult success can be predicted by very early life experiences and patterns of behavior. The benefits of long-term longitudinal studies will be explained, and implications for psychological research, both for the FLS project, and for psychologists, will be emphasized. Find out what’s next in our ongoing exploration of adult success, well-being, and accomplishments.

FINDING SOLUTIONS TO THE PROBLEM OF BURNOUT

Presenter: Christina Maslach, University of California, Berkeley
Chair: Eriko Self, California State University, Fullerton

Synopsis
Whenever the topic of job burnout gets raised, the key question is often “what can we do about it?” Although many different ideas have been proposed about how to deal with burnout, very few of them have ever been implemented or evaluated systematically. Furthermore, there is a bias toward fixing people, rather than fixing the job situation. However, current research argues that newer models of job-person fit will lead to better definitions of healthy workplaces and to better strategies of social change processes.
2:45  DOES READING ABOUT GENEROSITY MAKE US MORE GENEROUS? Erika Baron & Erica L. Wohldmann (California State University, Northridge)

PSI CHI CHAPTER EXCHANGE AND AWARDS
3:00-4:30  BARCELONA/CASABLANCA

Chair: Ethan A. McMahan, Western Oregon University

Psi Chi annually hosts a chapter exchange for chapters in the Western Region to share their activities and experiences with other chapters. Each chapter at the exchange will be encouraged to speak for about 5 minutes about their goals and activities for the year. Also, various recognition awards will be given during the chapter exchange.

PSI BETA CHAPTER EXCHANGE AND SPEED RESEARCH COMPETITION
3:00-4:30  TOKYO/VANCOUVER

Chair: Kimberley J. Duff, Cerrritos College

The chapter exchange serves as an opportunity for active and inactive chapters to share information on successful fundraising, recruiting, and club activities. Information regarding Psi Beta national awards and activities is also disseminated, as well as information on how to start or reactivate a chapter. This is a great opportunity for students and advisors to connect and to share their chapter activities for the past year. Students will also have the opportunity to participate in a speed research competition where they will present their research in three minutes using a single PowerPoint slide.

ANALYZING MULTIPLE GROUP STRUCTURAL EQUATION MODELS

Presenter: Jodie Ullman, California State University, San Bernardino

Chair: Christopher Aberson, Humboldt State University

Multiple group structural equation models allow rich tests of moderation hypotheses. For example we tests hypotheses that examine difference in complex structural equation models as a function of gender or ethnicity. This type of modeling approach can also be very interesting when applied to experimental or quasi experimental designs. Multiple group modes are also a helpful method for testing differences between latent means. This is an applied workshop some example printout will be provided. Familiarity with regression is important for understanding. Additionally, some basic SEM background would also be helpful.
